

# TWINSON COMPOSITE FENCING

The natural warmth of wood, the durability and low maintenance of PVC

# INTRODUCING THE ONLY FENCING SYSTEM THAT'S 100% RECYCLABLE

## Twinson composite fencing system

Now tired old wooden fencing or crumbling concrete fence panels can be replaced quickly and easily with an innovative new fencing system.

Twinson Composite Fencing combines nature and technology to produce a revolutionary fencing solution.

A unique single base material which gives you the best of both worlds, where nature and technology go hand in hand.

**100% Lead Free**  
Calcium Organic

# HARDWEARING. GOOD LOOKING. LONG-LASTING. RECYCLABLE.

## Kind to the environment

Twinson composite fencing contains pinewood that grows quickly in continuously replanted forests. PEFC accreditation ensures that the number of trees harvested are no greater than the number replanted and that biodiversity is retained, giving respect to the natural habitat of fauna and flora as well as soil and climate.

Twinson fencing will last for years, and after use can be 100% recycled and reused without any loss of quality - making it an environmentally friendly alternative to tropical hardwood.

## Easy to maintain

Twinson colours will weather gradually but will not require painting or staining. The boards will not split, rot or splinter. They are UV stable and resistant to water and insects.

The fence kits are easy to assemble with concealed fixings. Planks should be mixed prior to installation for a natural blended effect.

# WHY CHOOSE TWINSON COMPOSITE FENCING KITS?

- ▶ Unique single base material combining all the advantages of wood and PVC
- ▶ Natural patina without the need for painting or staining
- ▶ UV-stable and resistant to weather, water and insects
- ▶ Durable and doesn't split, splinter or rot
- ▶ Robust and low maintenance
- ▶ PEFC certified and 100% recyclable
- ▶ Easy to assembly with concealed fixing

## Wide range of colours to complement any design scheme

Eight colours are offered in the Twinson fencing panel range, and a choice of two colours for the post and rail kits.

Twinson fencing contains wood fibres which will have differences in colour and appearance. Twinson colours will lighten over time as UV stabilisation takes place, bringing a subtle effect to your garden.
