

Experts in Energy & Renewable Maintenance

FIT-FORGET-COLLECT

Complete package:
1 years remote monitoring & maintenance
of your solar PV products

£199

***Smart Meter included**
***Renewal options available**

Includes:

- Smart generation meter.
- Free Feed-In-Tariff (FIT) sign up for MCS accredited systems.
- Never miss a FIT meter reading, we do this for you remotely on your behalf.
- Fully managed system, with half hourly reports to flag up when your system is underperforming, minimising losses in FIT and energy savings.
- Monitoring of your defects ensures any faults are picked up and rectified within your warranty period.
- Liaison with utility company to ensure timely and correct payments.
- Produce annual report showing key performance data.
- You can also monitor how your PV system is performing and has done historically. These live graphs and statistics are available via your online portal 24/7.

! COMMON ISSUES !

All these issues can go unnoticed unless monitored regularly.

- 1. Broken panel** - Restricts efficiency of other panels, limiting the amount of energy your system produces.
- 2. Broken cable** - System stops producing energy and is a fire hazard.
- 3. Inverter error** - No energy being produced meaning reduced energy savings and FIT.
- 4. Tripped fuse** - System stops generating electricity.
- 5. Meter fault** - Won't record the energy your system is producing resulting in losses in FIT.
- 6. Switched off** - Your system is not live or producing energy.

Make the most of your system, ensure it has been installed correctly.
