

Purific

Natural sanitising water

What is it?

Apart from being totally new and revolutionary PURIFIC is...:

- A NATURAL Sanitising Water that kills 99.9% of bacteria in seconds
- Highly effective as a cleanser as the water provides its base, and its only other ingredient, a NATURAL ACID (Hypochlorous Acid) which is produced in the human body to fight bacteria and germs, provides its antibacterial properties

What makes it different?

- It does *not* contain Alcohol, fragrances, preservatives or harmful chemicals such as: Triclosan, Benzalkonium Chloride (BAC), Triethanolamine, Parabens, Phthalates, Sodium Laurel Sulphate (SLS), etc.
- It does *not* dry out or irritate the skin
- It does *not* need to be rinsed off
- It has *multiple uses* at home, out and about and whilst travelling
- It is *gentle*, powerful and extremely safe
- It is *harmless* if swallowed
- It is *safe* to be handled unsupervised by infants
- It is as *safe as drinking water!*

Where can it be used?

Aquaint 100% Natural Sanitising Water can be safely used...

- on the hands and skin (for all members of the family, from birth)
- To deodorise the body
- as a mouthwash
- on hard and soft surfaces, e.g. cutlery, tables, toilet seats, high chairs, toys etc.
- on surfaces that come into contact with the mouth e.g: pacifiers, feeding bottles and even food such as fruit!

Perfect to sanitise on-the-go...

How it compares...

Chemical / Safety Related	PURIFIC	TRADITIONAL
Safest sanitiser on the market	😊	😞
Kills 99.9% of bacteria	😊	😊
Alcohol Free, Fragrance Free, Preservative Free	😊	😞
Virtually 100% natural & contains no toxic chemicals	😊	😞
Does not dry out or irritate the skin	😊	😞
