

CATALOGUE 2013

Oase
LIVING WATER

A woman with long brown hair, wearing a white tank top, is lying on her stomach on a wooden deck. She is resting her head on a green cushion and smiling at the camera. The deck is situated next to a pond with white lily pads and flowers. In the background, there are potted plants with purple and blue flowers.

garden.«*

OASE – PASSIONATE ABOUT WATER.

Editorial

Thomas Ferchland | Managing Director Customer Business

Dear OASE customers,

We hope that you have been able to enjoy your water garden in 2012, and that you are already looking forward to the 2013 garden season.

We present to you our new catalogue so that you can prepare for the new garden season, and we extend our best wishes for your enjoyment and inspiration and wonderful garden moments in 2013.

As a premium supplier of water garden products it is our goal to become a little better every year and to be available to you as a competent partner in water gardening. In this regard, it is self-evident that we deal with the environment in a manner that is gentle and sustainable, and focus on energy-saving and intelligent products.

With this catalogue we would particularly like to direct your attention to the following new products and special topics:

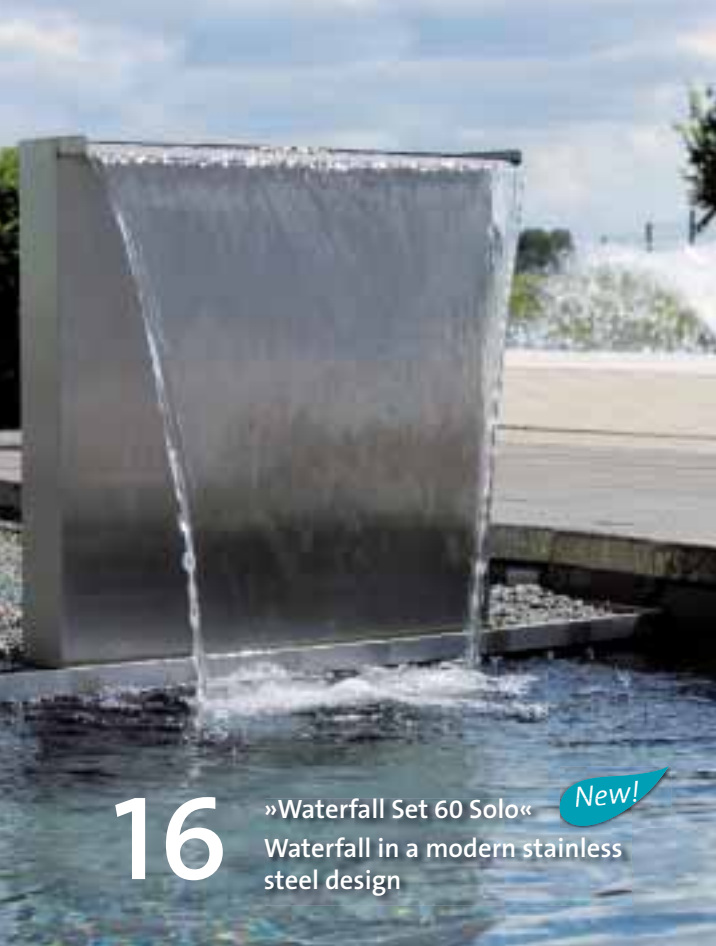

For example, in the area of filter & watercourse pumps we are introducing the new generation of energy-saving AquaMax Eco Classic pumps in the size classes 2,500 – 14,500. In the fountain area there are many new possibilities for water and light with the staging

of the new Waterfall Set 60 Solo. Also the Filters & Aerators and Cleaning & Care sectors offer you many new possibilities, so that your garden will be even more beautiful.

Suggestions of what a dream water garden could look like are provided at www.oase-gartenwelten.com or on our website, www.oase-livingwater.com.

Together with you we look forward to the new garden season and extend our best wishes.

Discover your »passion for water with OASE«.

WATER FEATURES: MOVING AND EASY TO IMPLEMENT

Whether gentle waterfall or a dynamic jet: Moving water fascinates just about everyone. There are many possibilities for enhancing your garden or your pond with fountains from OASE.

Moving water creates a special ambiance that you will experience in your garden.

Maybe you favour a gentle gurgling bubbling stone. A bubbling foam fountain is a good fit in a modern ambiance. Or maybe you prefer a simple elegant fountain. OASE offers the right fountain for every style, guaranteed. However even without a pond you can lend that certain something to

*»Water in its most
beautiful form.«*

**Modern design
with individual
elegance**

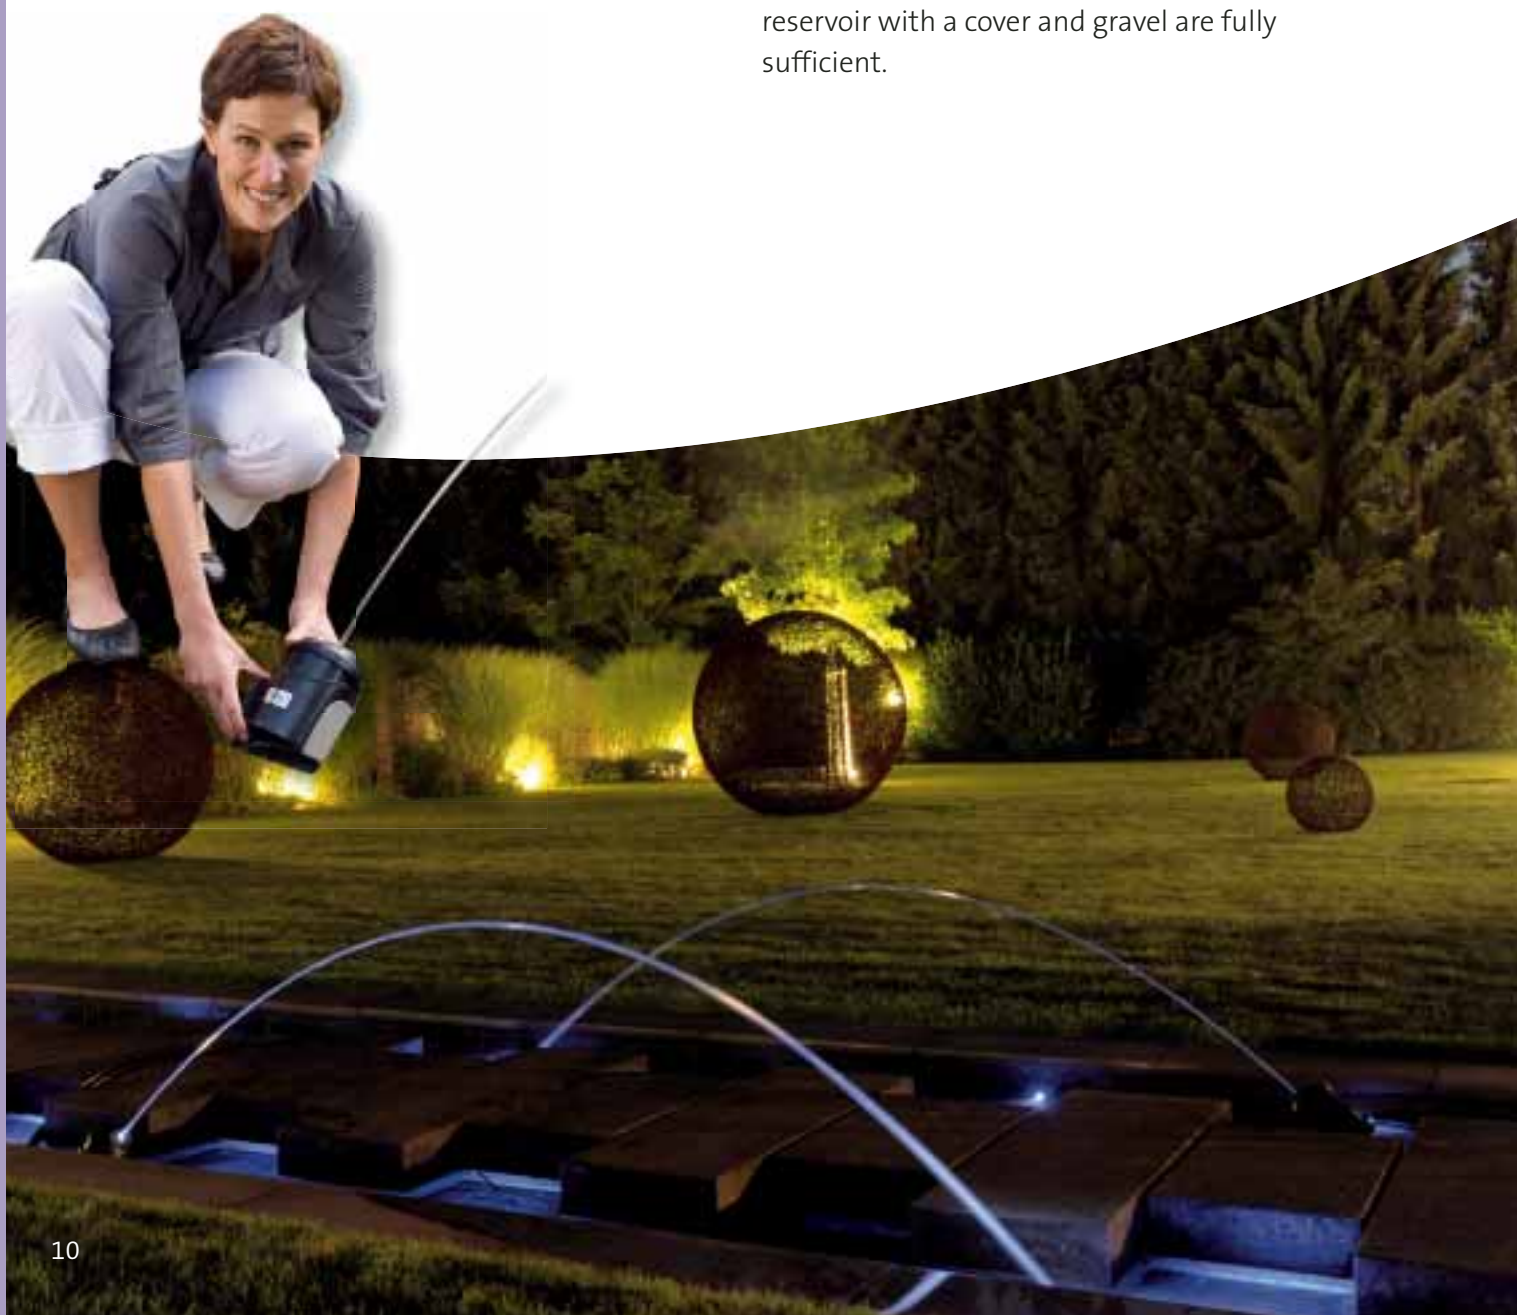

your garden. Recessed in a gravel bed or in a decorative planter box, fountains on the terrace or the balcony set attractive accents. And if atmospheric lighting is added, summer evenings become unforgettable moments.

Our Water Entertainment products are a special enhancement for your garden. Thanks to the »Plug'n Spray« principle, installation is quick so that there is more time for enjoyment. Experience all possibilities on the pages that follow.

Water Entertainment: So beautiful, and so easy to install!

Illuminated water jets that appear out of nowhere, luminous, leaping fountains with ever-changing patterns: These are the new entertainment artists in the residential garden. The complex effects of fountains are incredibly easy to install. You can make your garden into a stage in no time.

For some products the composition can vary entirely in accordance with your desires thanks to convenient, versatile adjustment possibilities via remote control. And you do not even need a pond to install a Water Entertainment product. Depending on the fountain, a discrete architectural pool or a water reservoir with a cover and gravel are fully sufficient.

REMOTE CONTROL enables easy and convenient selection of the various permanently stored programs. In addition all Water Entertainment products are characterised by easy installation – »Plug'n Spray«.

WATER ENTERTAINMENT

INDIVIDUAL

WATER QUINTET CREATIVE Give your fantasy free rein with this individually configurable fountain. The five individual pumps can be set up or suspended in a wide variety of configurations. They are individually activated and illuminated. The stored programs in which fountain height and light intensity vary can be selected by remote control.

HIGH ABOVE

WATER TRIO / QUINTET These water effects with three or five individually adjustable nozzles satisfy the most demanding requirements. Fountain heights between 30 and 140 cm and the speed can be adjusted via selection of the permanently set programs. The light intensity of the high-quality LED rings varies depending on fountain height.

RADIANT

WATER JET LIGHTNING The water jets glow in a wide variety of colours that can be changed with permanent programs. The jet length can vary, the random program »random play« shows all the settings in changing colours. Energy-efficient 12 V technology and fast installation are other standout features of this product.

FLOATING

WATER STARLET Floating on the water surface, or placed on the ground, this compact fountain is quickly installed. The five nozzles equipped with LED illuminated rings can be aligned individually and present different water patterns. The pumps and light elements run on energy-efficient 12 V technology.

Waterfalls of stainless steel: Stylish, expressive, timelessly beautiful

An absolute eyecatcher for your garden, the terrace or your pond – the design objects from OASE. The complete Waterfall Set 30 is ideal for uncomplicated installation at the edge of the pond, in gravel or in a suitable planter box. The new Waterfall Set 60 Solo, includes hose and adapters, which you can combine with the matching NEW AquaMax ECO Classic. The right lighting, (Waterfall Illumination, page 18 /19) with which you can make special effects in the evening, rounds out the series.

With OASE Waterfall 30 /60 /90 you can create your own very personal waterfall that can also be integrated in a wall design with wonderful simplicity. For this you will require an additional pump; the delivery capacity of the pump depends on the height of the structure and the diameter and length of the hose. Your OASE stockist would be pleased to recommend the optimal combination for a uniformly beautiful water pattern.

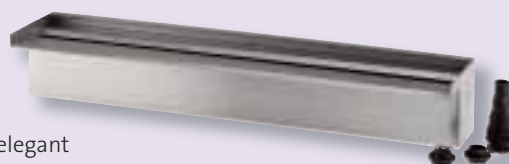

WATERFALLS

Tip!

For long-term satisfaction with the waterfall, clean the stainless steel surface regularly, so that calcium deposits and dirt do not adhere.

WATERFALL 30/60/90 Now the elegant series is complete. Recessed or bolted to the wall, with a width of 30/60/90 mm, graceful waterfalls are created. You will find the matching pump »AquaMax Eco Classic« for operating the waterfall, on page 66–67.

WATERFALL SET 30 The complete set incl. pump and hose in a modern stainless steel design has an outflow width of 30 cm. The two side fastening lugs make installation fast and easy – whether in a bed of gravel or at the edge of the pond. It is also easy to install in combination with a water reservoir and cover (see page 223) as a stand alone fountain.

WATERFALL SET 60 SOLO New – Now also available in 60 cm width (in the Set **without pump**).

This is how easy it is: Sample setup of a Waterfall Set 30

First provide an even and firm surface – a solid base, e.g. of concrete, that serves as the pedestal.

The Waterfall 30 is then placed on this straight slab: To do this simply fasten the two side fastening lugs with stainless steel screws.

For a perfectly aligned fountain, ensure that it is setup horizontally. Use a spirit level for this.

Now connect pump and hose. Then open the rear wall and fasten the hose. The hose is then routed out at the rear opening, and the pump is lowered into the water. That's it!

Stainless steel watercourse elements: For the modern garden design with style

Architectural gardens often pursue totally new paths in water design: Modern and unconventional, they put shapes and materials in the centre of focus and thus permit a variety of creative possibilities. The modular stainless steel watercourse system adapts to the individual requirements of modern garden design. A selection of six elements enables free design of the watercourse:

Whether in conjunction with an architectural pool as the end point, or as self-supplying circuit with the aid of an underground water reservoir – the system is installed quickly and easily, and is very low-maintenance. The high-quality stainless steel has a long service life and still retains its beauty over the long-term.

STAINLESS STEEL WATERCOURSE ELEMENTS

All you need to install your waterfall are the appropriate stainless steel elements, a suitable water reservoir with cover (see page 223), a pump (see page 48 /49) and sufficient hose, as well as material to compact the substrate, as horizontal installation is extremely important. The illumination with the LunAqua Terra LED (see page 185) rounds out the design of the waterfall.

This is how easy it is: Sample setup – stainless steel watercourse elements

Measure the area that you are considering and select the suitable watercourse elements.

After excavation, check whether the substrate is solid enough or still must be compacted.

Fleece additionally protects the excavated area against root penetration.

Ideally the water reservoir is placed at the head end of the start element, and it should be concealed, but accessible. The hoses are simply laid out in the gravel bed along the watercourse elements.

Place the elements upside down so that they match. Then the connecting strips are bonded on.

The stainless steel connecting element is placed on and connected with eight nuts and washer screws. Ideally with a second person – turn the bolted watercourse right-side up.

Now is the time to insert the LunAqua Terra LED, if you have planned for a lighting element. Connect the hoses and pump; place the pump in the water reservoir.

The horizontal alignment of the system is extremely important – ensure that you check whether the watercourse elements are horizontal, in both directions. Thereafter the edge design can be finished – that's it!

Extras

Top 3 product characteristics

- Sophisticated and graceful waterfalls of high quality, non-rusting stainless steel
- Individual and easy installation possibilities in three widths
- Even and uniform water pattern to 1 m in height

The correct selection of the pump with the matching water flow rate is particularly important for a uniform waterfall. (See table: Pump recommendation)

Application example: **Waterfall 60** with the suitable Waterfall Illumination (see page 18 and 19)

WATERFALL

Attractive waterfalls of stainless steel

- Compact and robust waterfall of high-quality stainless steel
- Easy installation permanently recessed in the ground or bolted onto the wall
- Individual design through 3 different widths: 300 mm, 600 mm or 900 mm
- Included in the scope of delivery: Each with threaded opening on both the rear and underside, as well as a hose adapter and a plug.

Recommendation

Regularly clean the stainless steel surface, so that deposits do not adhere.

Application example: Waterfall Set 30 installed in a watertight reservoir with cache pot

WATERFALL SET

Waterfall set in modern stainless steel design

- Waterfall stand in 300 mm or 600 mm width
- Two side fastening lugs enable easy attachment on a solid substrate (e.g. concrete slab) for use in the shallow water zone or at the edge of the pond. In addition, the Waterfall Set 60 Solo has a mounting base that ensures additional stability.
- An additional possibility is installation in combination with the OASE Water Reservoir and the

corresponding cover (WR 60 for Waterfall Set 30 and WR 125 for Waterfall Set 60 Solo (page 223). Simply bolt onto the suitable reservoir cover and decorate with pebbles – that's it!

- Only Waterfall Set 30 Includes a pump, 2500 l/h, as well as 3 m ¾" hose
- Easy maintenance thanks to removable back
- Stainless steel: 1.4401

Creativity for terrace and garden: Stainless Steel Watercourses

Extras

Top 3 product characteristics

- Modern, sophisticated design of high-quality stainless steel elements
- Versatile combination possibilities for individual design concepts
- Easy installation with ingenious connection technology

Recommendation

For installation, first ensure that you have an even, compacted substrate, and if necessary, fill the excavated channel with sand.

Ensure horizontal installation and never fill with too much water, so that the system does not overflow.

Depending on the length of the watercourse and the desired quantity of water, the right selection of the pump (Aquarius Fountain Set, page 48–49) and of the appropriate water reservoir (page 223) are particularly important.

STAINLESS STEEL WATERCOURSES

High-quality crafted elements for individual garden concepts

Application examples: 4 x LunaLED 9 s on a suitable base construction, combined with the aid of the OASE multiple distributor

LUNALED

Innovative illumination with modern LED technology

- Each has 6 or 9 neutral-white LEDs
- Suitable for use underwater and above the water
- Protection class IP 68
- High-quality stainless steel cap, with which the water flow rate can be regulated
- Diameter 30 mm or 50 mm
- Half peak angle of the LED: 30°
- Incl. low-volt plug transformer
- Easy installation via the innovative hose connector

PRODUCT DETAILS

Hose connector

The innovative hose connector makes the installation easy. The power cable can be routed out through the opening and does not need to be threaded through the entire length of the hose.

Stainless steel cap

The high-quality stainless steel cap enables fast adjustment of the water flow rate and protects the LED from damage.

LunaLed 6 s		LunaLed 9 s	
Height	l/min	Height	l/min
2 cm	3	2 cm	7
3.5 cm	5	3.5 cm	9
6 cm	6	6 cm	11
12 cm	8	12 cm	14

Amount of water required

The right pump is crucial for an appropriate fountain height; it is best to select the pump based on the water flow rate. Do not forget that hose length and diameter also play a role.

Extras

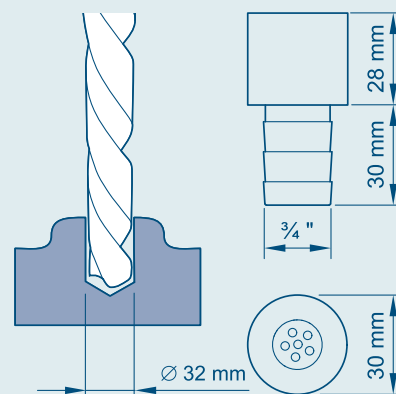

Top 3 product characteristics

- High-quality stainless steel cap
- Easy installation through hose connectors, ideal for bubbling stones
- Adjustable fountain height

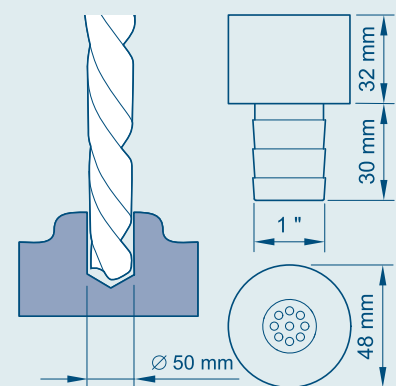

Recommendation

Be creative – combine multiple LunaLeds using the OASE multiple distributor (page 212) and design your individual fountain.

Recommended supplemental products

Water feature pumps Aquarius Universal page 44 – 45

Additional pond construction material, such as hoses, hose connectors, etc. from page 211

Application examples: LunaLed Creative Set used in different decorative planter boxes

LUNALED CREATIVE SET

A creative fountain, quickly and easily – even in the smallest space

- Calming, splashing fountain, including pleasant LED lighting
- Can be implemented indoors and outdoors
- Water feature height approximately 5 cm with white LED illumination
- Energy-efficient and safe 12 V technology
- Complete set includes: LunaLed 9s, transformer, pump, plastic foam, cover that can be cut to size and water container (H 190 mm, Ø 225 mm)

PRODUCT DETAILS

Installation – this is how easy it is

All you need is a suitable decorative planter box, some pebbles and a pair of scissors.

Cut to size

First cut the cover to fit your planter box.

Insert in the decorative planter box

Place the water container in the decorative planter box, and if necessary use an elevation. The cover can bear up to 2 kg of decoration material. If the load is greater an additional support must be planned.

Concealed technology

The pump »disappears« under the plastic foam and cover in the supplied water container.

Connect

Before decorating the cover with pebbles, do not forget to fill your container with water. Now just decorate with pebbles, connect, and your own custom fountain is ready!

Extras

Top 3 product characteristics

- Complete set for installation in existing planter boxes, lawn, or flower beds
- Suitable indoors and outdoors
- Including LED illumination

Recommendation

The LunaLed Creative Set offers a variety of creative possibilities. The clear advantage of this fountain is the fast and uncomplicated installation.

Planter boxes or vases are suitable, and so are flower beds or lawn.

Installation tips

The inner diameter for round containers should be at least 23 cm, and at the most 39 cm. For square pools the side lengths should always be at least 16 cm, and at the most 27.5 cm! For implementation in larger decorative planter boxes OASE recommends using a separate elevation element.

Schematic diagram: Water Starlet in the garden pond

WATER STARLET

Compact and dynamic – the floating fountain with LED illumination

- Compact, floating fountain with 5 fountain nozzles
- »Plug'n Spray« principle enables easy installation
- Can be implemented as a floating unit or it can be setup on the ground
- Protected LED rings provide constant illumination of the water jets
- Different water patterns can be presented as a permanent program loop
- Safe, energy-efficient 12 V technology
- Can even be used in swim ponds
- Low maintenance requirements
- Included in the scope of delivery: Water feature (incl. 5 pumps, 5 illuminated rings, each with 6 LEDs), transformer and cable

LED-illuminated nozzles

The five nozzles can be aligned individually and ensure a wide variety of water patterns.

Robust floor plate

The perforated floor plate provides optimal protection against fouling.

12 V transformer

Thanks to the energy-efficient 12 V technology, the system is very safe.

Extras

Top 3 product characteristics

- Floating fountain complete set with LED lighting
- »Plug'n Spray« – principle for easy installation
- Can be used in swim ponds thanks to 12 V technology.

Recommendation

Best light effects in the evening twilight.

This fountain can be used in many different environments – from the garden pond to the architectural pool.

Schematic diagram: **Water Trio** in a reservoir

WATER TRIO

Luminous fountains for modern garden design

- High-quality water feature with three varying fountains, including LED lighting
- »Plug'n Spray« principle: Immediately ready for use and easy connection
- Variations in fountain height (30 – 140 cm) and light intensity can be played back in permanently set programs
- The programs can be conveniently selected via remote control from a distance of up to 80 m
- Can be connected to a timer
- Flexible setup on a wide variety of substrates
- Robust floor plate protects against damage
- Easy maintenance
- Low energy consumption
- Safe, energy-efficient 12 V technology
- Can even be used in swim ponds
- Included in the scope of delivery: 3 pumps / nozzles, external control unit, transformer and cable are included in the scope of delivery

PRODUCT DETAILS

External control system

Compact and easy to conceal:
The control unit can be easily connected
and includes a transformer, as well as
a ground stake.

Illuminated nozzles

The individually controllable nozzles,
each with 6 LEDs, are easy to align.

Height adjustable

The fountain is height adjustable, so that
the water level can vary by 20 cm.

Remote control

The remote control unit included in the
scope of delivery has a range of up to 80 m
without obstruction.

Extras

Top 3 product characteristics

- Remote-controlled water feature
with varying fountains and white
LED illumination
- Easy installation thanks to
»Plug'n Spray«
- Can be used in swim ponds

Recommendation

Splash water can be minimised by select-
ing a pool with at least a 3 m diameter.
The OASE water reservoir WR 100 can be
extended with pond liner, for example.

Accessories

Water reservoir cover Trio / Quintet

Tailored opening for the
»Water Trio« and »Water
Quintet« fountains.
Additional service opening
with cover.

Item no. 50327 (Page 223)

Water reservoir WR 100

The weather-resistant solution
for flexible installation.

Item no. 37112 (Page 223)

Pond liner

Almost any idea can be a reality
with OASE pond liners.
Additional information (Page 206)

WATER QUINTET

More individuality and it is easy to operate – with the remote-controlled Water Quintet

- High-quality water feature with five varying fountains, including LED lighting
- »Plug'n Spray« principle: Immediately ready for use and easy connection
- Variations in fountain height (30 – 140 cm) and light intensity can be played back in permanently set programs
- The programs can be conveniently selected via remote control from a distance of up to 80 m
- Can be connected to a timer
- Flexible setup on a wide variety of substrates
- Robust floor plate protects against damage
- Easy maintenance

WATER QUINTET CREATIVE

The creative water effect: Flexible setup for individual requirements

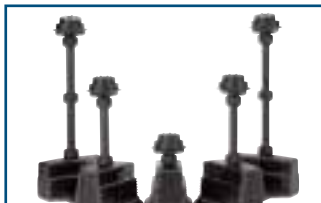

- Completely individual fountain for flexible configurations: Vertical and suspended
- Variations in fountain height and light intensity can be played back in permanent programs
- The programs can be conveniently selected via remote control from a distance of up to 80 m
- Programs with alternating fountain heights (30–140 cm)
- Can be connected to a timer
- »Plug'n Spray« principle enables easy installation
- Easy maintenance
- Low energy consumption
- Safe, energy-efficient 12 V technology
- Can even be used in swim ponds
- Included in the scope of delivery: 5 pumps / nozzles, external control unit, transformer and cable are included in the scope of delivery

PRODUCT DETAILS

External control system

Compact and easy to conceal:
The control unit can be easily connected
and includes a transformer, as well as
a ground stake.

Height adjustable

The fountain is height adjustable, so that
the water level can vary by 20 cm.

Suspended mounting

The pumps can also be mounted,
suspended from a suitable carrier plate.

Remote control

The remote control unit included in the
scope of delivery has a range of up to
80 m without obstruction.

Extras

Top 3 product characteristics

- A fountain with white LED lighting that can be designed individually
- Different programs can be selected via remote control
- Can be used in swim ponds

Recommendation

The pumps can be setup in almost any
desired configuration, e.g. in pebbles,
in a straight line, or in a semicircle.

Other popular variants are the recessing
in or placing under covers of any type.
Then only the water jets are visible.

Schematic diagram: Water Jet Lightning in a garden pond

WATER JET LIGHTNING

Coloured water jets – a special highlight, even for small areas of water

- Illuminated multi coloured, laminar water arches for special effects in the garden
- Variations of jet lengths, jet height, and RGB colours are played back in programs
- The programs can be selected via remote control from a distance of up to 80 m
- The water jet angle can be individually adjusted
- Your favourite colour of the water arch can be easily set
- High-quality stainless steel base can be bolted onto different substrates
- Maximum jet length 1.8 m; maximum jet height 0.9 m
- Can be connected to a timer
- »Plug'n Spray« principle enables easy installation
- Easy maintenance
- Low energy consumption
- Included in the scope of delivery: 2-unit set Water Jet Lightning, pump, external control unit, transformer and cable

PRODUCT DETAILS

External control system

Compact and easy to conceal:
The control unit can be easily connected
and includes a transformer, as well as
a ground stake.

High-quality materials

An appealing design – total Water
Entertainment from OASE.

Remote control

The remote control unit included in the
scope of delivery has a range of up to
80 m without obstruction.

Adjustable jet angle

Because the angle of the Water Jet
Lightning units can be adjusted, there
are many variation possibilities.

Extras

Top 3 product characteristics

- A special feature in the garden:
Coloured arching water jets
- »Plug'n Spray« principle:
Complete set for easy connection
- Can be implemented in the swim pond

Recommendation

Enjoy the different colours of the luminous
water jets at twilight. This is when they
are particularly effective.

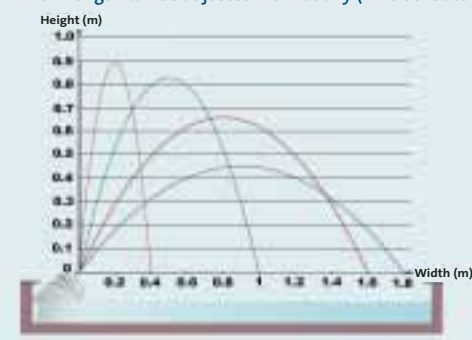

The fountain should be installed where it
is protected from wind, so that the water
arches maintain their perfect form.

For maximum enjoyment, ensure good
water quality.

Throw length can be adjusted individually (2 x distributor)

JumpingJet Rainbow Star Set: Dramatic, coloured fountain

Whoever experiences the arcs that a JumpingJet Rainbow Star playfully forms out of water, cannot resist the enchantment. The effects from the lights are fascinating. You get everything in a set that can be installed quickly and offers the possibility of extension.

Please note the following: For the JumpingJet Set you require the powerful OASE Aquarius Universal 6000 pump. For switching the pump on and off we recommend the InScenio FM-Master 3 garden outlet. Then on the pump itself you can individually regulate jet length and height.

The JumpingJet Set can also be extended by an additional JumpingJet. The advantage of the Add-on Set: Another pump does not need to be connected in addition to the Aquarius Universal 6000. The system is easily connected via the existing control box (12 V Master) that already controls the first JumpingJet. The Add-on Set can easily be integrated – thanks to the Y-distributor, the 1" stainless steel hose clamps, as well as the suitable hoses.

Extras

»Rainbow Star Set« scope of delivery

- 1 x JumpingJet with solid stainless steel base
- 1 x control box (12 V master)
- 1 x wireless remote control
- 1 x black 1" fabric hose; 4 m
- 2 x stainless steel hose clamps 1"
- 1 x control cable
- 1 x power supply cable 12 V

»Add-on Set« scope of delivery

- 1 x JumpingJet with solid stainless steel base
- 1 x black 1" fabric hose; 5 m
- 4 x stainless steel hose clamps 1"
- 1 x control cable
- 1 x power supply cable 12 V
- 1 x Y-distributor

SYSTEM REQUIREMENTS

- For full exploitation of the JumpingJet's impressive light and water effects, OASE recommends that the set be operated with clean or treated water if possible (without fish stock).
- Poorer water quality can impair the clarity of the jet and increase maintenance.
- The set can be installed indoors, as well as outdoors; if installed outdoors a position that is protected from wind should be selected.
- In colder months the JumpingJet must be stored where it is protected from frost.

Schematic diagram: JumpingJet Rainbow Star Set in a garden water feature

JUMPINGJET RAINBOW STAR

Effect-rich, coloured fountain for a grand appearance

JumpingJet Rainbow Star Set

JumpingJet Rainbow Star Add-on Set

PRO

- Ready to connect complete set
- Variations of water effects and colours are played back in the programs, LED light intensity remains uniform
- The programs can be selected via remote control from a distance of up to 80 m
- Jet lengths to 4 m and jet heights to 2 m can be controlled individually
- Can be implemented indoors and outdoors
- Connection control box (12 V master) additionally enables connection of a JumpingJet Rainbow Star Add-on Set
- Synchronous control through one remote control unit when connecting the Add-on Set
- Complete set contains: JumpingJet, control box, remote control, as well as 1" stainless steel hose clamps for fixing hoses in place, as well as accessories

Add-on Set

- Consists of: JumpingJet Rainbow Star, 1" hose, control cable, power supply cable and Y-distributor
- The Add-on Set can only be operated in addition to an existing JumpingJet Rainbow Star Set
- Connection is executed via an existing control box of a JumpingJet Rainbow Star Set
- Add-on set and JumpingJet Rainbow Star Set always run synchronously

PRODUCT DETAILS

Stainless steel base

In addition to the robust body in high-quality design, the solid stainless steel base ensures stability and enables individual adjustment of the jet angle.

Scope of delivery

The set includes a black 1" fabric hose, 4 m in length, and two stainless steel clips for easy installation.

Control box (12 V master)

Easy installation and commissioning. Thanks to the remote control unit included in the scope of delivery, the permanently set programs can be conveniently selected.

Programmed combinations

These consist of the colours, blue, red, white, green, cyan (light blue), magenta (purple), yellow, and the functions, jet chopper, continuous light and random programs in rainbow colours.

Extras

Top 3 product characteristics

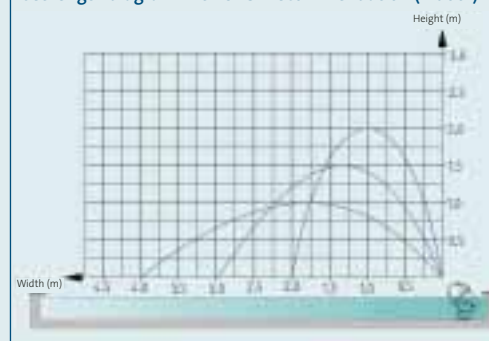

- Water feature with coloured LED lighting
- Programs with colour, light, and water effects can be conveniently selected by remote control
- An additional Jumping Jet Rainbow Star can be connected to the set

Recommendation

For installation of the JumpingJet Rainbow Star Set, we recommend the OASE Aquarius Universal 6000 fountain pump.

In addition the existing set can be extended with a second JumpingJet. An additional pump is not required for this. For maximum enjoyment, ensure good water quality.

Jet length diagram with OASE recommendation (indoor)

Recommended supplemental products

(Not included in the scope of delivery)

Aquarius Universal 6000

This fountain pump is the ideal partner for the JumpingJet Rainbow Star Set.

Item no. 56637 (page 47)

InScenio FM-Master 3

Wireless remote control garden power outlet for electronic adjustment.

Item no. 36311 (page 195)

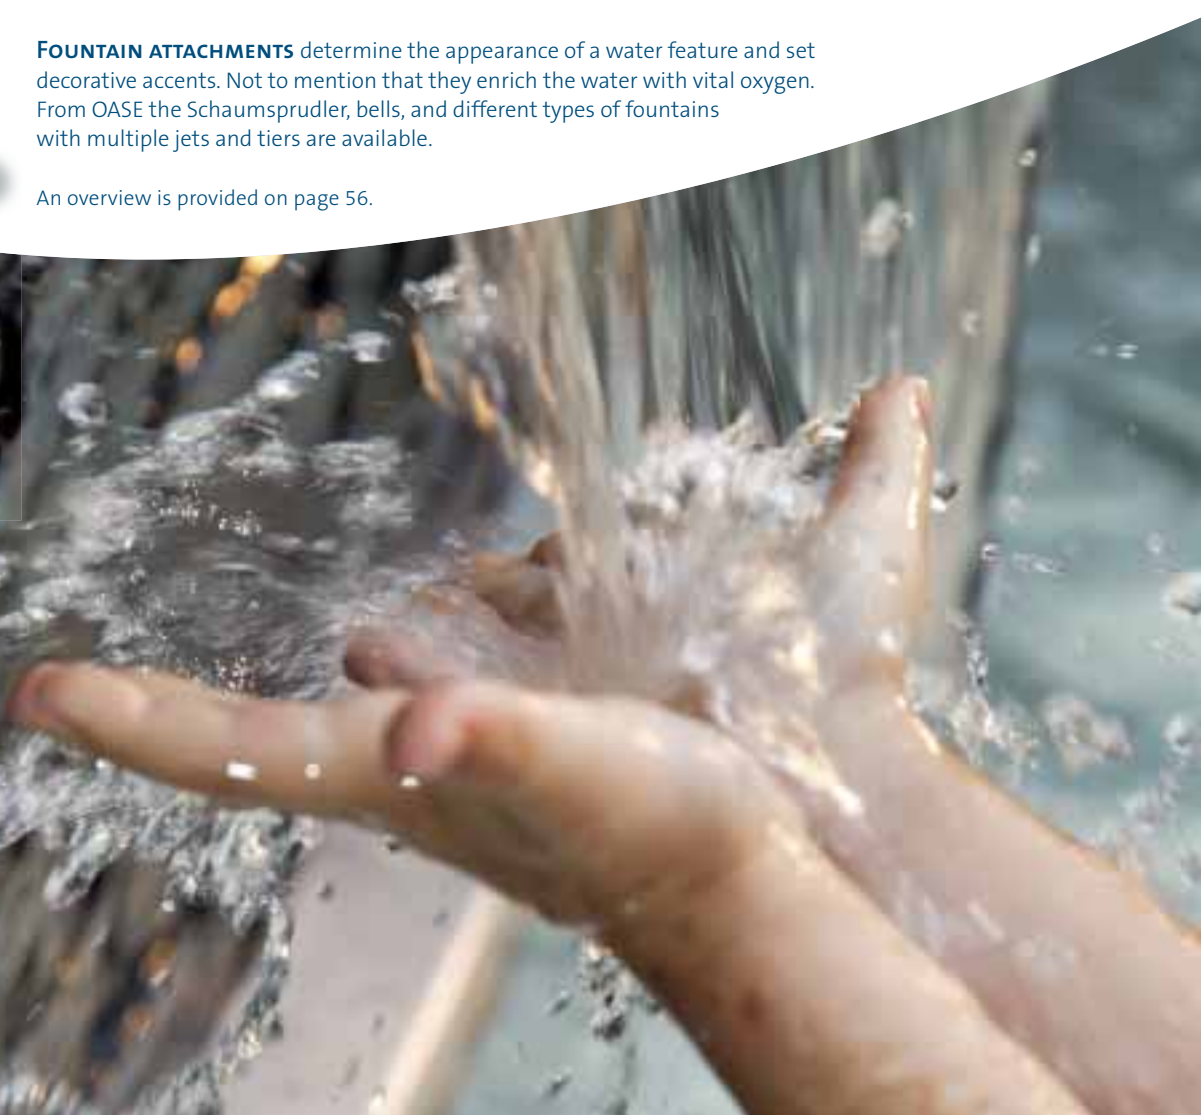

Water feature pumps: Impressive performers

For fountains the water is delivered upward with full force – a characteristic that distinguishes the fountain pumps from the filter and watercourse pumps. This characteristic is easy to recognise from the smallest indoor fountains to the fountain in a palace garden. The models that can be remote controlled are particularly sophisticated; the power

and fountain height can be controlled from distances of up to 80 m. You can conveniently reduce lively splashing to enjoy a quieter evening, for example. We have listed the most important information for you starting on page 42. This is where you will find the suitable pump for your favourite fountain.

FOUNTAIN ATTACHMENTS determine the appearance of a water feature and set decorative accents. Not to mention that they enrich the water with vital oxygen. From OASE the Schaumsprudler, bells, and different types of fountains with multiple jets and tiers are available.

An overview is provided on page 56.

FOUNTAIN PUMPS

STATUARY FOUNTAINS & DECORATIVE FOUNTAINS

Atmospheric splashing of decorative fountains and indoor fountains has a calming and relaxing effect. For smaller planter boxes you need a compact but powerful pump.

AQUARIUS UNIVERSAL 440i – 2000
high capacity for indoors and outdoors: Due to minimal space requirements these pumps are optimal for use in small bubbling stones, statuary or decorative fountains. The water volume of these quiet pumps can be adjusted individually.

WATERFALLS, BUBBLING STONES & LARGE DECORATIVE FOUNTAINS

Bubbling stones have a natural and charming effect. Moss and lichens can grow on rough stone, which enhances the natural appearance.

AQUARIUS UNIVERSAL Eco 3000 – 40000
These premium products satisfy even the most rigorous requirements imposed by the largest of fountains. Maximum head heights of up to eleven metres are possible. The pumps are frost-proof to -20°C and thanks to the stainless steel filter basket they have a particularly long service life.

FOUNTAINS

Fountains with one or more water jets are imposing and richly varied. For bigger heights and forceful spouting you require pumps with greater power.

AQUARIUS FOUNTAIN SETS

The complete sets for fast installation and convenient operation. The fountain can be individually adjusted with telescopic nozzle extension and pivot head. It is available as a set, including one or three nozzle attachments.

Tip!

A fountain completely without mains power: The Aquarius Solar Fountain Set is optimally suited for implementation at locations without power supply. Additional information on this product is available on page 52 and the matching solar components are on page 196.

Aquarius Fountain Set (START)

Aquarius Fountain Set (PRO)
Aquarius Solar

PondJet

Application examples: Aquarius Universal pumps are ideal for small bubbling stones, statuary and decorative fountains

AQUARIUS UNIVERSAL

For statuary fountains & decorative fountains

START

- Ideal for indoor use
- For use even in shallow water
- Particularly quiet running
- Entire product series equipped with thermal cut out
- Easy regulation of the flow rate

From Aquarius Universal 440

- Also suitable for outdoor use (except 440i)

From Aquarius Universal 600

- Can be setup underwater & dry

PRODUCT DETAILS

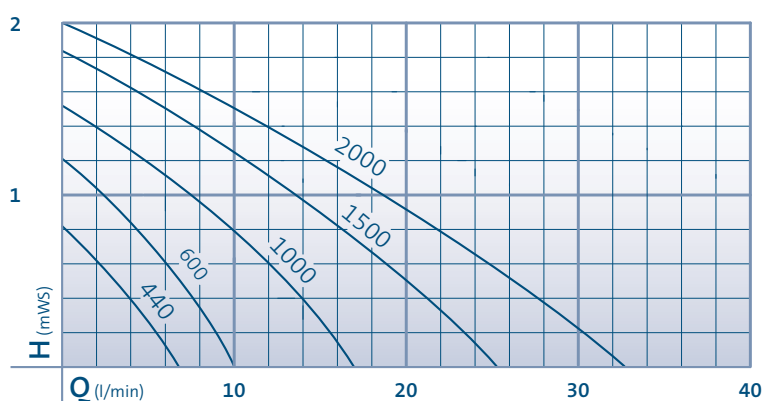

Flow rate adjustment
via the flow-through regulator of
the Aquarius Universal 440.

Flow rate adjustment
with the suction and regulating duct of
the Aquarius Universal 600–2000.

Aquarius Universal 440/440i – 2000

Pump performance curves – comparison see page 228 – 229

Extras

Top 3 product characteristics

- High performance, minimal space requirements
- Flat priming and extremely quiet
- Suitable indoors and outdoors

Recommendation

The small pumps are ideal for small bubbling stones, statuary fountains and decorative fountains of any type. Equipped with optional »OASE LED lights« – they become the highlight in the evening garden. (Page 22)

For an attractive bubbling stone water pattern, for pump selection, ideally calculate 0.5 – 1 l/min water per cm of stone diameter.

Accessories

LunaLed 6s/9s

Innovative illumination with modern LED technology. Ideal for small bubbling stones, statuary fountains and decorative fountains of any type.

*Aquarius Universal 440i

**Aquarius Universal 600–2000

Application examples: Aquarius Universal pumps are outstanding for operating modern waterfalls

AQUARIUS UNIVERSAL

For waterfalls, bubbling stones & large decorative fountains

Aquarius Universal Eco 3000–12000

Aquarius Universal 21000–40000

PRO

- Undisturbed splashing water, thanks to extremely quiet operation
- Easy regulation of the flow rate
- Integrated thermal protection
- Suitable submersed or dry-installed
- Energy-efficient thanks to low energy consumption
- Frost-proof to –20 °C
- High-quality workmanship with stainless steel elements
- Priming even at low water levels (to 12000)
- Removable pedestal for installation where space is at a premium (to 12000)

From Aquarius Universal 4000

- Electronic flow rate adjustment with optional accessory InScenio FM-Master 3 (page 195, except Eco 4000)

From Aquarius Universal 21000

- With adapter set for connection of 1 ½" and 2" nozzles
- Ergonomic handle for easy transport and installation
- Long service life; high capacity
- Electronic adjustment with optional accessory InScenio FM-Profimaster (page 195)

PRODUCT DETAILS

Flow rate adjustment

Easy mechanical adjustment via the flow regulator of the Aquarius Universal Eco 3000 / Eco 4000 and sizes 4000 – 12000

Adapter Set

An adapter set for connecting all 1" and 1 1/2" OASE fountain attachments is included in the scope of delivery of the Aquarius Universal 21000 – 40000 fountain pumps.

Extras

Top 3 product characteristics

- High performance, minimal energy consumption
- Frost-proof to –20 °C
- Electronic flow rate adjustment (starting with Aquarius Universal 4000)

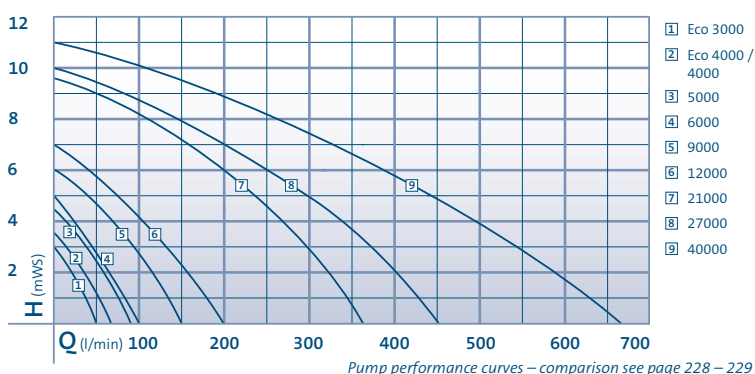

Recommendation

»Aquarius Universal Pro series« fountain pumps are also a great way for operating modern stainless steel waterfalls. (Page 16)

With the OASE fountain attachments, different water patterns can be created to fit your taste. Discover the OASE versatility on pages 54/55. Fountain attachments can be perfectly accommodated in combination with the matching optional OASE illumination.

For an attractive bubbling stone water pattern, for pump selection, ideally calculate 0.5 – 1 l/min water per cm of stone diameter.

AQUARIUS FOUNTAIN SET

Fountain set for attractive water patterns

- Easy mechanical adjustment of the fountain height
- 3 fountain attachments for different water patterns included in the scope of delivery
- Telescopic pipe extension with integrated swivel head for individual alignment of the fountain
- Second, separately adjustable outlet (½" to 1")
- Base footings for stable positioning on the pond floor
- Integrated thermal protection

PRODUCT DETAILS

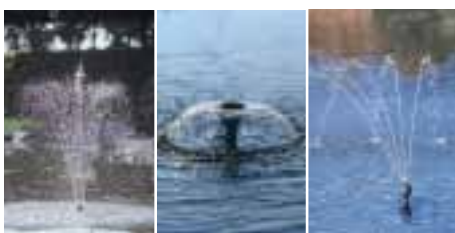

Second outlet

On the second separately adjustable outlet, a small watercourse or water spout can be connected. Suitable for ½" to 1" hoses.

Water patterns

Three different fountain attachments are included in the scope of delivery: Vulkan, Lava and Magma.

AQUARIUS FOUNTAIN SET

Fountain set with large filter surface

- Fountain set with unique filter intake surface
- Effective, over-proportioned filter surface through side-mounted wings
- The detachable wings can be placed in the shallow edges of the pond
- Convenient mechanical adjustment and cleaning from the edge of the pond
- Electronic adjustment
- Telescopic pipe extension with integrated swivel head for individual alignment of the fountain
- Integrated spotlight holder (optional accessory: Spotlight LunAqua 3 Set 1, (page 181))
- Base footings with slotted holes for stable positioning on the pond floor
- Integrated thermal protection
- Click closures for convenient mounting /dismounting
- Included in the scope of delivery: 1 fountain attachment (Vulkan) and an adapter for the filter wings

PRODUCT DETAILS

Filter wings

Easy to remove filter wings can be fitted on the adapter and positioned at the edge of the pond.

Flow regulator

Flow rate on the pump filter and fountain height can be adjusted from the pond edge via the regulator on the adapter.

Extras

Top 3 product characteristics

- Flexible setup and operation exclusively using solar energy
- Perfect solution for locations without power supply
- Removable filter wings, convenient adjustment and cleaning from the edge of the pond

Recommendation

The Aquarius Solar pumps are part of the OASE solar system and should ideally be operated with the SolarModule 35 or the SolarSafe 41.

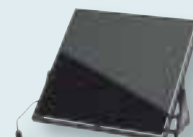

Accessories

SolarModule 35

35 W power and high efficiency level thanks to innovative CIS technology.

Item no. 37105 (Page 197)

SolarSafe 41

With a full battery the storage and control unit of the Aquarius Solar 700/1500 enables solar operation for up to 17 hours, or 8 hours, even without sunlight.

Item no. 56896 (Page 197)

LunAqua Solar

With LEDs and a colour disc set, ensures effective staging above the water surface and below the water surface.

Item no. 56894 (Page 197)

Hoses and accessories

Additional information on suitable OASE hoses and appropriate accessories starting on page 210.

Application examples: **PondJet** with Vulkan 37–2.5 K

PondJet with PondJet nozzle and lighting set

PONDJET

Compact, floating fountain – fast setup, immediately impressive!

- Floating fountain for flexible installation in bodies of water with any type of floor conditions
- Ready to connect complete set, pump, float body and multifunction nozzle
- Easy installation thanks to floating function
- Also ideal for short-term deployment, e.g. for events
- Required minimum water depth for clear water is 1.0 m; for a muddy pond floor the recommended minimum depth is 1.5 m
- Imposing water spectacle up to 3 meters in height and width
- Additional nozzle patterns and illumination set are available as accessories

PRODUCT DETAILS

PondJet nozzle
with 1" thread, cover plate and plug.

Flexible
The 1" thread allows 1" fountain attachments to be attached on the multifunction nozzle of the PondJet. Shown here with mounted Schaum-sprudler 35-10-E as an example.

Connection possibility
for the underwater transformer of the lighting set available as an accessory.

Accessories: Illumination set and fountain attachments
The optional LunaAqua 10 spotlight set wonderfully illuminates the water patterns. Additional fountain attachments on page 56.

Extras

Top 3 product characteristics

- Fountain pumps that can be installed quickly and easily thanks to the float function
- Ideal for difficult terrain or short-term use
- Illumination can be easily retrofitted

Recommendation

Decorative fountain, easy installation, can be quickly and easily placed in service. Ideal for short-term use, e.g. for events. Retrofit illumination for perfect night-time staging!

Accessories

Illumination Set PondJet
This set supplies an atmospheric, illuminated fountain in the twilight hours and consists of:
3 Lunaqua 10 spotlights
3 stainless steel holders
1 underwater transformer
incl. special holder
20 m cable

Item no. 57083

Fountain attachments

With 1" thread for attachment on the multifunction nozzle of the PondJet:
• Vulkan 37 – 2.5 K, H: 400 cm
• Schaum-sprudler 35 – 10 E, H: 140 cm
• Lava 36 – 10 K, Ø: 95 cm

Item number and product details page 56 – 57

FOUNTAIN ATTACHMENTS

For richly varied fountains

Extras

Accessories

Telescopic nozzle extension TE 5 K
For easy extension of the nozzle height.
Connection for mounting fountain attachments with ½" external thread, length can be telescopically extended from 200 mm to 300 mm.

Item no. 54277 (Page 212)

Telescopic nozzle extension TE 10 K
For easy extension of the nozzle height.
Connection for mounting fountain attachments with 1" external thread, length can be telescopically extended from 280 mm to 510 mm.

Item no. 52270 (Page 212)

**Lava
20 – 5 K**

- Bell diameter is easily adjustable

**Lava
36 – 10 K**

- Especially for wind-protected installations
- Operation only with nozzle extension and regulator

**Schaumsprudler
22 – 5 K**

- Water-level independent foam effect nozzle

**Schaumsprudler
35 – 10 E**

- Water-level independent foam effect nozzle
- Installation above the water surface

FILTER- AND WATERCOURSE PUMPS: INTELLIGENT TECHNOLOGY

Waterfalls and watercourses are not only small natural spectacles – moving water can do much more. The advantages are endless with the ingenious pumps from OASE.

For a variety of plants and animals garden ponds are ideal habitats. Water is vital for them, especially the oxygen contained in the water. OASE pumps move the water

in the pond, and thus ensure the required oxygen supply. Watercourses and waterfalls that simultaneously lend your pond a more natural appeal also offer the best addition of oxygen to the water. Consequently, you should include them in your plans. The OASE filter and watercourse pumps can also feed pond filters.

*»Here you can
relax fully«*

AquaMax Eco Classic

The classic in
a totally new form.

Page 66

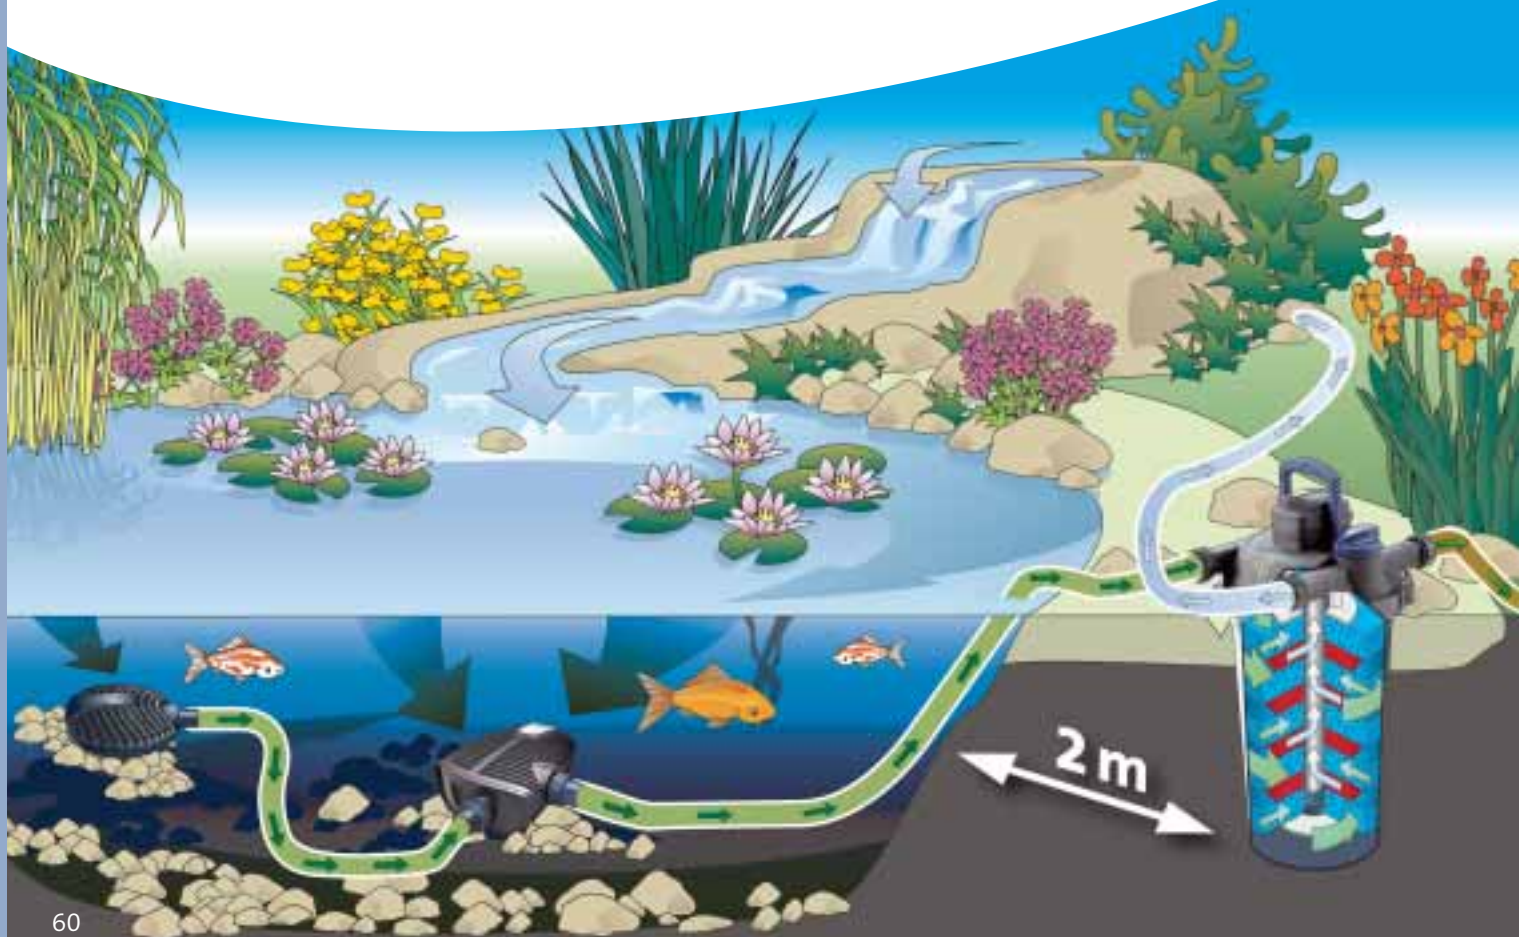

They supply pond filters with water, where it is subsequently freed of coarse debris and toxins. The OASE pumps are real power houses with well thought-out supplemental functions. Thanks to the innovative »Seasonal flow Control« technology, some of these pumps can even adapt the required flow rate to the water temperature.

The pumps are intelligent and save energy, which as a result saves money. Your OASE stockist has the right pump for you, in accordance with your pond size and application. We present our pumps to you in the following chapter, with a complete overview on pages 64 – 65.

Filter- and Watercourse pumps: A strong combination

A filter and watercourse pump must be designed in such a manner that it can pump the correct volume of water, plus the contaminants introduced into the pond through leaves, floating plants or animals, to the filter. However, a filter is necessary to clean the water. Selection of a powerful filter and pump combination is the key factor for the subsequent quality of water.

With the table on page 42–43 you can select the right pump for your pond in a few steps. Suitable filters are listed starting on page 80. OASE stockists would be pleased to help you select the filters as well as the choice of pumps that will supply your watercourse with the ideal water flow rate.

FILTER AND WATERCOURSE PUMPS

THE CLASSIC IN A TOTALLY NEW FORM

AQUAMAX ECO CLASSIC The completely redesigned, reliable and energy-efficient classic is the ideal partner for entry into the garden pond. The pumps supply watercourses and waterfalls and deliver pond water that needs to be cleaned and coarse debris up to eight mm in size, into the filter. Thanks to the energy-efficient OASE motors, the models of the large Eco 2500 – 14500 are state of the art.

THE NEW ORIGINAL. AS ALWAYS. JUST BETTER.

AQUAMAX ECO PREMIUM This clever further development of the filter and watercourse pump now saves even more energy, at the same convincing flow rate, and with its new design it also displaces every other product. For more effective filter performance, filter accessories can be connected on its second, patented inlet, to simultaneously displace the water from multiple pond zones. At temperatures to -20°C , the frost protection technology, which is also patented, guarantees safe protection against frost and damage.

FOR DRY INSTALLATION

AQUAMAX DRY This particularly powerful filter and watercourse pump has been developed especially for dry setup. It is installed below the level of the water surface and is extremely quiet in operation.

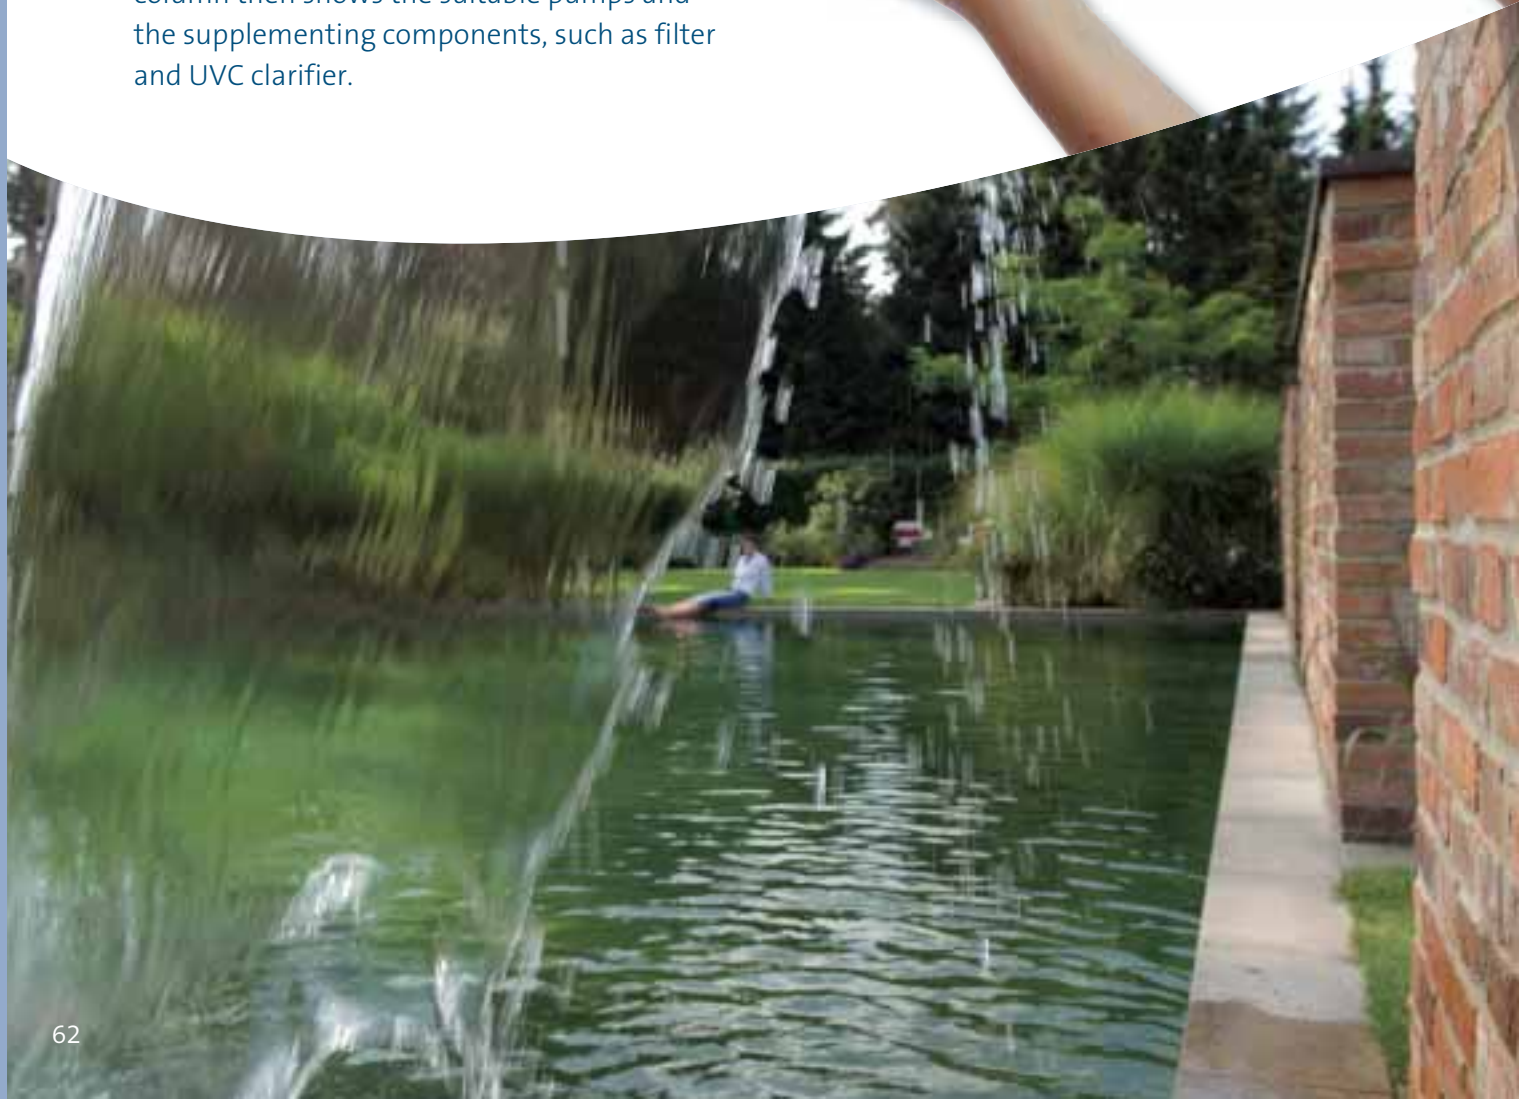

Tip!

Easy, if you know how: The right combination of filter, pump and UVC clarifier for your garden pond or watercourse, essentially depends on the size of the pond, i.e. water volume, and fish stock. Use the tables on page 64 – 65 to determine the suitable products, step by step. Your OASE stockist will also be pleased to help you with the selection.

OASE rotary chart: Optimal selection – it's easy

In order to calculate the water volume, you should precisely plan the size, perimeter, and depth of the pond. OASE has the right product for every creative idea in your water garden. In this regard we rely on clever solutions in which all components are perfectly matched.

OASE makes the planning easy: With the specially developed rotary chart the components necessary for your garden pond can be easily put together: On the outside edge of the chart select the pond volume. The corresponding column then shows the suitable pumps and the supplementing components, such as filter and UVC clarifier.

FILTER AND WATERCOURSE PUMPS

FOR CONVENIENT ADJUSTMENT

AQUAMAX Eco TWIN The delivery capacity of this unusually powerful pump series can be individually regulated with two motors – conveniently regulated by remote control. Effectively matched to the filter activity this can reduce power consumption. Also included is patented frost protection to -20°C .

INCREDIBLE FORCE

AQUAMAX EXPERT This pump range for watercourses or for feeding filters offers three capacity variants that can deliver between 20,000 and 41,000 litres of water per hour. They can be adjusted electronically and are frost-proof to -20°C .

SOMETHING FOR ALL

AQUAMAX GRAVITY ECO Thanks to gravitation-optimised technology this pump range is specially suited for the requirements of gravity-fed filter systems. It is completely winter proof -20°C , and thanks to the stainless steel basket in the filter, coarse debris particles to 6 mm in size can easily be removed.

AQUAMAX Eco CLASSIC *Eco*

The powerful classic in a completely new design

»Environmental Function Control«*

The pumps switch off automatically in the event of dry run which prevent damage to the device.

- Completely redesigned: The classic – the entry level class of filter- and watercourse pumps from OASE
- A totally new form: Thanks to organic design, it can be integrated in ponds and watercourses, almost invisibly
- Uncomprisingly reliable: With high cleaning force, it pumps pond water and coarse debris particles, up to 8 mm in size into a filter
- Wider range available: Now with two additional, even more powerful pumps in the product line: The new 11500 and 14500
- Suitable for use on swim ponds and bathing ponds (Installed in an exterior pump chamber)
- Included in the scope of delivery: Special hose adapter with threaded collar for different hose sizes

From AquaMax EcoClassic 3500

- Extremely economical: Thanks to the energy-efficient EC motor, the AquaMax Eco Classic saves power – and money – in operation.
- »Environmental Function Control« (EFC by OASE)* protects against dry run and blocking)
- AquaMax Eco Classic 8500, 11500 and 14500 available from March 2013

PRODUCT DETAILS

Coarse debris displacement

The large-surface wrap-around strainer allows coarse debris particles like fish waste or dead plants up to 8 mm to pass through.

Special stepped hose adapter

Scope of delivery includes a stepped hose adapter with the sizes 1", 1 1/4" and 1 1/2" and the suitable stainless steel hose clamps. (For AquaMax Eco Classic 2500 3/4" to 1 1/2")

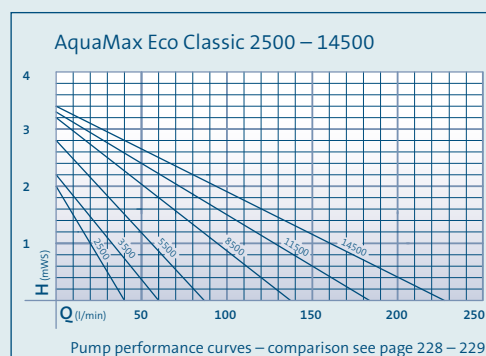

Energy-efficient motor

The efficient motor is particularly economical and effectively reduces running costs.

Extras

Top 3 product characteristics

- Top entry model with first-class price/performance ratio, in a new design
- Thanks to its energy-efficient EC motor, the AquaMax Eco Classic saves power – and thus money – in operation
- Coarse debris displacement of particles up to 8 mm in size

AQUAMAX Eco PREMIUM

Efficient water movement in multiple pond zones

»Seasonal Flow Control«

The pumps adapt to the pond ecology throughout the year and support the pond biology through temperature-dependant water circulation.

»Environmental Function Control«

The pumps switch off automatically in the event of dry run and prevent damage to the device.

- Outstanding energy balance: Reliable displacement using even less energy
- Supplemental, patented connection of optional filter accessories for debris supply from more distant pond zones
- Unique, patented frost protection: The pump will not be damaged to temperatures as low as -20°C , guaranteed
- Flow rate can be mechanically and electronically adjusted
- Elegant design with clever operating elements
- Quiet for dry setup on swim ponds and bathing ponds
- Plant remains or fish waste to 11 mm in size are reliably displaced
- »Environmental Function Control« (EFC by OASE) protects against dry run and blocking
- MADE IN GERMANY: Precise and reliable German engineering

AquaMax Eco Premium 12000 and 16000

- Patented »Seasonal Flow Control« for intelligent and environmentally-conscious regulation of flow rate and delivery head
- With SFC switched on an additional 30 % energy saving is possible

PRODUCT DETAILS

Regulated + 2nd inlet

Flow-through from 0 to 100 % can be mechanically adjusted. Ideal for adjusting skimmer or satellite filter capacity (accessories) in 4-steps. 2nd Inlet allows connection of a satellite filter or the surface skimmer (accessories).

SFC switch

For AquaMax Eco Premium 12000 and Eco 16000. With the SFC function switched on, the pump automatically optimises and reduces flow rate and delivery head by up to 50 %.

Extras

Top 3 product characteristics

- Outstanding energy efficiency and displacement capacity
- Simultaneous contaminant supply through connection of filter accessories on the patented, second inlet
- Patented frost protection to -20 °C

Accessories

Satellite filter AquaMax Eco
Enables intake of polluted water at an additional point on the pond floor.

AQUAMAX Eco PREMIUM 12 V ^{PLUS}Eco

Efficient water movement in multiple pond areas, now also in swim ponds

»Environmental Function Control«

The pumps switch off automatically in the event of dry run and prevent damage to the device.

AquaMax Eco Premium 6000 / 12 V

PRO

- With safe 12 V technology perfect for implementation in swim ponds and bathing ponds
- Outstanding energy balance: Reliable displacement using even less energy
- Supplemental, patented connection of filter accessories for debris supply from more distant pond zones
- Unique, patented frost protection: The pump will not be damaged to temperatures as low as -20°C , guaranteed
- Elegant design with clever operating elements
- Maximum operating convenience thanks to ergonomic and easily accessible handles
- Plant remains or fish waste to 11 mm in size are reliably displaced
- »Environmental Function Control« (EFC by OASE) protects against dry run and blocking
- MADE IN GERMANY: Precise and reliable German engineering

PRODUCT DETAILS

Regulated + 2nd inlet

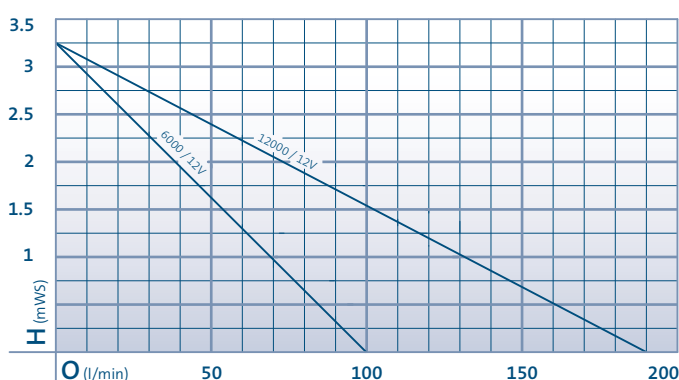

Flow-through from 0 to 100 % can be mechanically adjusted. Ideal for adjusting skimmer or satellite filter capacity (accessories) in 4-steps. 2nd Inlet allows connection of a satellite filter or a surface skimmer (accessories).

12 V power unit

For safety, low voltage transformer, optimally suitable for swim ponds. Power unit must be setup at least 2 m from the pond.

AquaMax Eco Premium 6000 - 12000/12V

Schematic diagram: Dry setup of the filter and watercourse pump AquaMax Dry 14000 (PRO) with concurrent operation of skimmer and satellite filter

AQUAMAX DRY

Especially designed for dry installation

- Powerful filter pump for installation in a dry, separate pump chamber
- Extremely quiet motor operation
- Displaces coarse debris to 8 mm in size
- Extremely stable thanks to its solid base
- Included in the scope of delivery: 2 hose connections 1"–1 ½", as well as 2 stainless steel hose clamps 1 ½"
- Likewise suitable for use on swim ponds and bathing ponds (inserted in an exterior pump chamber)

PRODUCT DETAILS

Coarse debris displacement

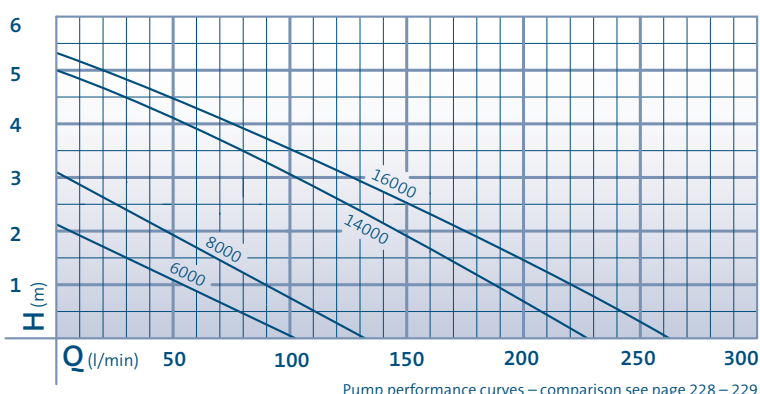

The pump displaces debris particles up to 8 mm in size, such as fish waste or dead plant remains.

Hose clamps

The stainless steel hose clamps 1 1/2" are included in the scope of delivery.

Aquamax Dry 6000 – 16000

Item no.		50393	50066	50068	GB-Version only

Extras

Top 3 product characteristics

- Quiet pump, especially for dry setup
- Extremely stable thanks to its solid base
- Electronically adjustable with the OASE InScenio FM-Master 3 garden power outlet

Recommendation

The AquaMax Dry should be setup below the water level in the separate pump chamber. Consequently, a great advantage of the dry setup is the extremely safe use, particularly for swim ponds and bathing ponds. In addition the pump is easily accessible for maintenance purposes. Optionally, the use of slide valves is recommended. For effective displacement of polluted water, particularly with the AquaMax Dry 14000, we recommend connection of a satellite filter or skimmer, in combination with a Y-distributor.

AQUAMAX Eco TWIN ^{PLUS} Eco

Particularly powerful with flexible capacity adaptation

»Environmental Function Control«

The pumps switch off automatically in the event of dry run and prevent damage to the device.

- Particularly powerful filter pump with individually adjustable flow rate of the 2 motors by remote control
- Thus reduced power consumption and effective adaptation of power to filter activity
- Minimal maintenance requirements thanks to large wrap-around strainer
- Patented damper mechanism guarantees optimal flow rates
- Coarse debris displacement of particles up to 11 mm in size
- In addition to pond floor filtration, simultaneous connection of a satellite filter or skimmer is also possible
- Unique, patented frost protection: The pump will not be damaged to temperatures as low as -20°C , guaranteed
- »Environmental Function Control« (EFC by OASE) protects against dry run and blocking
- Suitable for use on swim ponds and bathing ponds (inserted in an exterior pump chamber)

PRODUCT DETAILS

Controller with LED display

The motors can be separately switched on or off or can be adjusted together via wireless remote control. Digital display of the respective capacity level.

»Intelligent« flap

The patented »intelligent« flap mechanism in the interior of the AquaMax Eco Twin guarantees optimal output, even when only one pump is used.

Flexible regulation of the two motors

The different water intake functions can be switched and regulated individually. The following combinations are possible:

1. Pond floor filtration and satellite filter
2. Pond floor filtration and skimmer
3. Pond floor filtration pure

Max. head	m	4.50	5.20
Connection, pressure-side		2"	
Connection, suction-side		2"	
Connection for hoses		1", 1 1/4", 1 1/2", 2"	
Filter intake surface	cm²	1300	
Coarse debris displacement, max.	mm	11	
Electronic adjustment		Yes	
Setup type		Underwater installation only	
Item no.		50708	50710

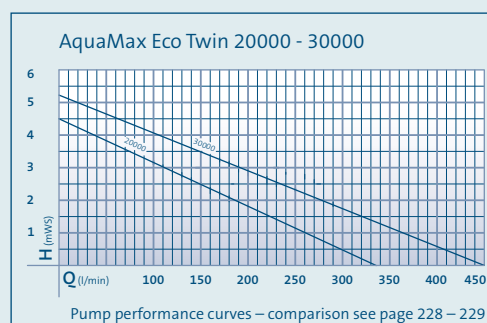

Extras

Top 3 product characteristics

- Flexible adjustment of the flow rate
- On/Off/adjustment conveniently via remote control
- Patented frost protection to –20 °C

Recommendation

Depending on the debris input in the pond, you can decide from which point the water should be delivered into the filter. You can regulate or switch off the pond floor filtration by remote control, and concentrate only on the surface or pond edge.

Accessories

Satellite filter AquaMax Eco
Enables intake of polluted water at an additional point on the pond floor.

Item no. 57177

AquaSkim 40
Frees the pond surface from leaves, food remnants, and other pollutants, and conveys pollutants directly to the filter system.

Item no. 56907 (Page 152)

InScenio 230
Spray water resistant garden power outlet for year-round use offers connection for up to 4 devices.

Item no. 55433 (Page 195)

AQUAMAX EXPERT

Extreme performance for demanding large installations

- Excellent flow rates for sophisticated filter systems or large watercourses and waterfalls
- Coarse debris displacement of particles up to 8 mm in size
- Electronic adjustment by remote control with the InScenio FM-Profimaster (Page 195)
- Side 2" outlet for easier installation in large systems
- Long service life particularly at high capacities
- Ergonomic handle for safe transport
- Suitable submersed or dry-installed
- Unique, patented frost protection: The pump will not be damaged to temperatures as low as -20°C , guaranteed
- Suitable for use on swim ponds and bathing ponds (inserted in an exterior pump chamber)

PRODUCT DETAILS

Robust filter basket

Thanks to this robust stainless steel filter basket, coarse debris particles up to 8 mm in size are displaced easily.

Compact base

Integrated fixing holes in the base facilitate fixed installation on the pond floor, as needed.

Side outlet

Side 2" outlet for easier installation in large systems.

Ergonomic handle

The ergonomic handle is aligned with the pump's centre of gravity and facilitates transport and installation.

Schematic diagram: Gravitation filter pump AquaMax Gravity Eco in combination with the OASE ProfiClear Premium module filters

AQUAMAX GRAVITY Eco

For gravity fed filter systems on koi ponds and swim ponds

»Environmental Function Control«

The pumps switch off automatically in the event of dry run and prevent damage to the device.

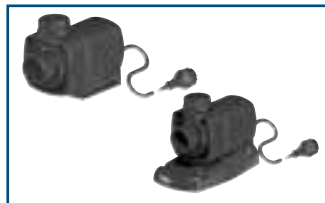

- Energy-efficient filter pump with strong and reliable delivery capacity for large bodies of water with low pressure requirement
- Coarse debris displacement of particles up to 6 mm in size
- High stability thanks to the removable mounting base
- Suitable submersed or dry-installed
- Unique, patented frost protection: The pump will not be damaged to temperatures as low as -20°C , guaranteed
- Included in the scope of delivery: Adapter set for hose (2"/DA 63) and pipe connection (DN 75/DN 110)
- Suitable for use on swim ponds and bathing ponds (inserted in an exterior pump chamber)
- »Environmental Function Control« (EFC by OASE) protects against dry run and blocking

PRODUCT DETAILS

Stainless steel pump guard

Thanks to this high-quality, stainless steel filter basket, coarse pollutant particles up to 6 mm in size are displaced easily.

Removable base

The removable base enables pump installation in confined spaces.

Adapter Set

The included adapter set enables connection of hoses (2"/DA 63) and pipes (DN 75/DN 110).

Extras

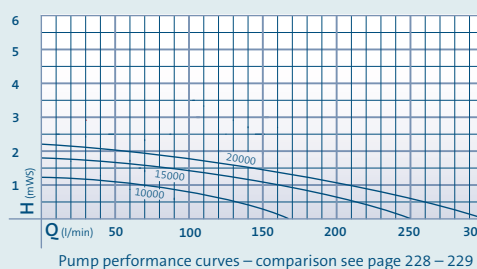

Top 3 product characteristics

- Perfectly matched to the requirements of gravity fed filter systems
- High performance with minimal space requirements
- Patented frost protection to -20°C

Recommendation

These powerful gravitation filter pumps are ideally suited for feeding larger filter systems. Ideal in combination with the OASE module filter systems ProfiClear Classic and ProfiClear Premium. (Page 120–125).

FILTER SYSTEMS: A PERFECT TEAM FOR CLEAR WATER

Every garden owner finds his own way to relax by the pond. The extensive assortment of OASE filters provides you with lots of options to discover what's best for you.

Whether you prefer a garden pond with fish, a larger koi pond or even a swim pond – the water in the pond will be clear, and will remain clear! OASE even gives

you a Clear Water Guarantee (page 226). The prerequisite is that everything must be installed and used as recommended. OASE shows you how easy it is to find the right filter equipment for your individual pond environment: With the underwater filters (page 88) beautiful ponds are created even where space is at a minimum. Small to medium-size ponds, with and

*»More time
to enjoy.«*

ProfiClear Premium

For the most rigorous demands.

With no compromises.

From page 122

without watercourses get the ideal filtration with pressure filters (page 92). However, usually medium-size to large pond pools and koi ponds have bigger filter capacity requirements. OASE flow-through filters (page 98) perfectly meet these requirements. The filter capacity of the OASE filters is further supplemented with UVC clarifiers that significantly

reduce suspended algae and harmful bacteria. Finally, pond aerators supply the water with additional oxygen and provide an ideal pond climate. Complete filter systems are impressive through their ingeniously combined components. Filter pump, filter and UVC clarifier are optimally matched – Your team for clear water!

Filter systems from OASE: Clear water, guaranteed

Every pond imposes individual demands on the filter system. Whether large or small, with or without fish stock – the perfectly matched products from OASE make it easy for you to find the right solution.

A filter system consists of:

- a filter pump to feed the filter
- a pond filter that ensures biological / mechanical cleaning, and
- a UVC clarifier to eliminate suspended algae and reduce pathogens.

Whether an underwater filter, pressure filter, flow-through filter or a module filter is used depends on factors such as; pond type, pond volume and fish stock.

Depending on size, position and condition of the garden or the terrace, the important thing is to identify the correct water design.

Ideally you should plan for an appropriately matched filter system when constructing your pond: For example, a pond filter can also simultaneously feed a watercourse. Our pressure filters, BioPress and FiltoClear, are ideally suited in this regard.

In order to select the optimal filter size, first the right pond volume must be calculated!

Here is a rule of thumb for determining the right number of litres: **Pond volume in $\text{m}^3 = \text{length} \times \text{width} \times \text{depth}$**

Example: $3 \text{ m} \times 4 \text{ m} \times 1 \text{ m} = 12 \text{ m}^3$ equals 12,000 litres

The extent of fish stock influences the choice of filter. The more fish that live in the pond, the greater the nutrient input, and thus the more powerful the filter should be.

Tip!

*Filter systems with Clear Water Guarantee
For every body of water – from a garden pond with or without fish, ecological biotope or water pool in a modern design – at OASE there is an optimal filter. With Clear Water Guarantee! Additional information is on page 226 or at:*

www.oase-livingwater.com

OASE makes it easy:

With the special rotary chart developed by OASE the components necessary for each individual pond can be easily put together: Learn about the OASE filter systems in a discussion with your personal advisor.

At www.oase-livingwater.com you will find the OASE stockist in your area.

OASE FILTER SYSTEMS AT A GLANCE

This brief overview shows you the four filter categories and briefly explains the main features of the respective system.

UNDERWATER FILTERS (Page 88)

With the OASE underwater filters you create a beautiful feature even where space is at a minimum.

Suitable for:

- Decorative pools such as galvanised troughs or wine barrels
- Pre-fabricated pools up to 5,000 litres
- Small ponds
- As supplemental filter element with fountain

Filtral UVC 5000 (START) Filtral UVC 2500 (START)

PRESSURE FILTERS (starting on page 92)

Pressure filters are suitable for small and medium-sized ponds. If needed the water can be routed to higher positioned watercourses, because the pump pressure remains intact through the filter.

Suitable for:

- Medium-sized ponds up to 30 m³
- Direct infeed of watercourses or fountains
- Architectural pools without visible technology

BioPress Set 6000 (START)

FiltoClear Set 12000 (PRO)

FLOW-THROUGH FILTERS (starting on page 98)

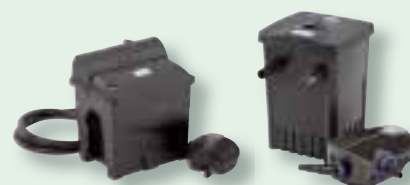

Flow-through filters are used for medium-sized to large ponds or koi ponds. They stand above the water surface at the edge of the pond or above a watercourse so that the water flows back into the pond under gravity.

Suitable for:

- Larger ponds up to 140 m³
- Ponds with fish stock
- High circulation capacities

BioTec ScreenMatic Set 40000

BioSmart Set 5000 (START)

FiltoMatic CWS Set 7000 (PRO)

MODULE FILTERS (starting on page 116)

Large natural ponds or swim pond with or without koi – these modular systems remain flexible at any time.

Suitable for:

- Large ponds, swim ponds, koi ponds and lakes

ProfiClear Premium

Filter comparison

Important note

When planning a new pond with koi stock, please ensure a minimum pond size of 5 m³!

Ponds with plants,
without fish stock

Ponds with plants and
fish stock up to 1 kg/1000 l

Ponds with plants and fish

For the pond size specifications cited above (FiltroClear/Sets) 1 m delivery head and 5 m 1 ½" hose were taken into consideration. Larger pumps should be used for longer hose lengths and/or greater delivery heads. Clear Water Guarantee* in accordance with a Secchi light penetration depth of 1 m. Please note that in case of extreme temperature fluctuations, friction losses for hose lines longer than 5 m or direct sunlight due to the position of the pond (south facing) more intensive planning is required.

PROFICLEAR PREMIUM

- Perfect for koi ponds, swim ponds and other large bodies of water
- New generation of module filters for professional water quality
- Intelligent self-cleaning and self-control system

For the pond size specifications cited above (BioTec) 1 m delivery head and 5 m 1 ½" hose were taken into consideration. Larger pumps should be used for longer hose lengths and/or greater delivery heads. Clear Water Guarantee[™] in accordance with a Secchi light penetration depth of 1 m. Please note that in case of extreme temperature fluctuations, friction losses for hose lines longer than 5 m or direct sunlight due to the position of the pond (south facing) more intensive planning is required.

Pressure filters: Invisible helpers

As opposed to flow-through filters, pressure filters route the pump pressure through the filter. In this closed system they are primarily used for higher elevated watercourses to a height of 1.50 m and architectural pools. Here they can be recessed into the ground, even below the water surface and do not impair the natural look of the garden.

An additional advantage offered by the pressure filter is its convenient operation and cleaning, without having to be opened. The filter capacity is perfectly supplemented by a UVC clarifier that is located in the cover of the filter. Prefect performance every time!

The filter that is fed by the pump is **CONCEALED IN THE GROUND**. If needed the water can be routed to higher positioned watercourses.

PRESSURE FILTERS

BioPRESS SETS Different filter materials ensure optimal filter biology. The cleaning function integrated in the cover enables easy maintenance. A UVC clarifier is integrated. Available as a set with pump and hose.

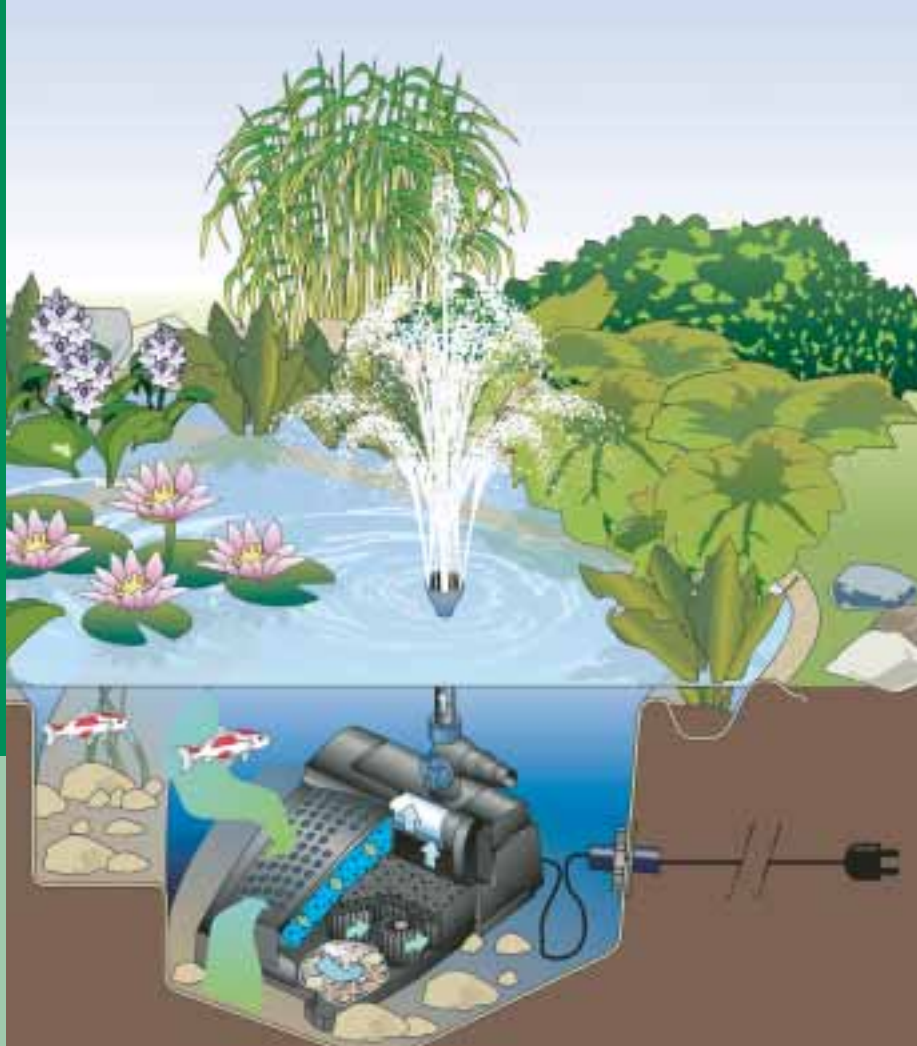

FILTOCLEAR A multi-port valve facilitates cleaning and flushing out. A UVC clarifier is integrated. Its functional capacity can be visually checked via an indicator light. Also available as a set with matching pump.

Tip!

For small ponds and decorative pools (e.g. a wine barrel or a galvanised trough) up to 5,000 litres, the underwater filter, Filtral is the optimal compact solution, consisting of filter, UVC and fountain. Additional information on these filters is provided on page 88.

Schematic diagram: Underwater filter Filtral UVC inserted in a pond

FILTRAL UVC *C

Underwater filter with UVC and fountain

- Suitable for ponds and pre-formed pools up to 5 m³
- A multi-talent with filter function and fountain
- Including OASE Clear Water Guarantee*^C
- Compact filter unit with UVC technology and 4 different filter materials
- Pump is already integrated for attractive fountains
- Telescopic extension for adapting the nozzle to the pond surface
- Adjustable T-piece for operating spouts and small watercourses
- Individual adjustment of flow rate and fountain height
- Setup completely under water – the appearance of the pond remains undisturbed
- Visual function check of the UVC clarifier
- Included in the scope of delivery: 3 fountain attachments for different water patterns

PRODUCT DETAILS

Filter media and UVC

Two different filter sponges, as well as bio-surface elements and filter pebbles ensure mechanical and biological cleaning. 7/11 watt UVC power for clear and healthy water.

Bio-cores and filter pebbles

The filter pebbles in the net bag and the bio-surface elements offer adequate settling surface for the micro-organisms.

Replacement filter set Filtral UVC 5000

Item no. 35836 (Page 213)

Schematic representation: Underwater filter Filtral UVC (GB-Version) inserted in a pond

FILTRAL UVC

(EXCLUSIVELY AVAILABLE IN GB)

Underwater filter with UVC for small ponds

START

- Suitable for ponds up to 9,000 litres
- Compact filter unit with integrated UVC technology for guaranteed clear water
- Contains 4 different filter materials
- Supplied with 90 degree bend and stepped hoesetail for feeding a small watercourse or water feature
- Setup completely under water – the appearance of the pond remains undisturbed
- Visual function check
- Can be operated with the additional Filtral Nozzle Kit (50089) to create a fountain effect

PRODUCT DETAILS

Filter media and UVC

Two different filter sponges, as well as bio-surface elements and filter pebbles ensure mechanical and biological cleaning. 7/11 watt UVC power for clear and healthy water.

Bio-cores and filter pebbles

The filter pebbles in the net bag and the bio-surface elements offer adequate settling surface for the micro-organisms.

Integrated UVC unit

7/9 or 11 watt for clear and healthy water.

Coarse particle strainer

Coarse particles of up to 8 mm in size are taken out by the strainer.

BIOPRESS SETS *C

Entry-level pressure filter with UVC and filter pump

BioPress Set 4000

- Suitable for ponds up to 10 m³
- Combination of mechanical biological cleaning and effective UVC technology
- Including OASE Clear Water Guarantee*^C
- Ideal for feeding higher elevated watercourses
- Patented cleaning function, integrated in the cover facilitates cleaning of the filter
- Quick-release for convenient opening and closing of the filter
- It can be buried for almost invisible integration in the water garden
- With all hose connections for fast and trouble-free installation

From BioPress Set 6000

- Different filter materials for optimal settlement of filter biology

BioPress Set 4000

- Included in the scope of delivery: 4.5 m ¾" hose and OASE filter pump 1500: 25 W; 1,500 l/h Qmax; 1.9 m Hmax

BioPress Set 6000

- Included in the scope of delivery: 5 m 1" hose and OASE filter pump 2500: 40 W; 2,500 l/h Qmax; 2.2 m Hmax

BioPress Set 10000

- Included in the scope of delivery: 5 m 1" hose and OASE filter pump 3500: 70 W; 3,400 l/h Qmax; 2.7 m Hmax

START

PRODUCT DETAILS

Cleaning handle

Easy cleaning via the cleaning function integrated in the cover.

Quick-release

For easy opening and closing of the filter when performing maintenance tasks.

Integrated UVC unit

The UVC unit integrated in the cover ensures fast elimination of algae and reduction in pathogens in the pond water.

Filter materials

In addition to the filter foams, bio filter surfaces with the specially-developed flow control offer supplemental settlement surface for filter organisms. They are able to move freely in the water flow. (only BioPress 6000/10000).

Schematic diagram: Pressure filter FiltroClear in combination with filter and watercourse pump

Extras

Top 3 product characteristics

- Clear water guaranteed through the ideal combination of filter, pump and UVC technology
- Convenient cleaning thanks to patented Easy-Clean-Technology
- Almost invisible integration in the environment

Recommendation

Fountains or watercourses should have a maximum height differential of 1.5 m relative to the filter.

FILTOCLEAR *C

Pressure filter with UVC and patented cleaning function

- Suitable for ponds up to 30 m³
- Combination of mechanical biological cleaning and effective UVC technology
- Including OASE Clear Water Guarantee*^C
- Ideal for supplying higher elevated watercourses or waterfalls
- Setup below the surface level of the water is also possible
- Patented Easy-Clean-Technology for easy and convenient cleaning without opening the filter
- Easy-to-operate waste outlet function
- UVC indicator light for monitoring of the UVC clarifier
- Pollutant level indicator and flow-through indicator
- All function-regulating parts are arranged so that they are easily accessible in the cover
- Through burying or covering with a decorative rock cover it can be perfectly integrated in the water garden
- Perfectly suited for architectural pools thanks to virtually invisible technology
- Optimal ratio of device dimensions and biological-mechanical cleaning capacity thanks to the compact design
- High-quality, impact-resistant material
- New: FiltroClear 12000 and 16000 with improved UVC performance and filter performance compared to the predecessor model
- New: From FiltroClear 16000, up to 25 % larger filter surface compared to the predecessor model

PRO

Starting with FiltroClear 12000

- Incl. UVC clear rinse function
- Incl. 2" hose connection

PRODUCT DETAILS

1. Multi-port valve:

»Filter« setting

The UVC clarifier eliminates algae and reduces pathogens. Then the »treated« water flows through the fine mechanical and large-pored biological filter elements of the filter unit that decompose the pollutants and clarify the water.

2. Multi-port valve:

»Clean« setting

Turning the rotary switch activates the cleaning function. Then move the cleaning lever up and down to »squeeze out« the filter elements. Simultaneously clean water flows into the filter and forces the polluted water out of the unit. Then you simply return the switch to the filter position.

Extras

Schematic diagram: Pressure filter FiltoClear in combination with filter and watercourse pump

Top 3 product characteristics

- Clear water guaranteed through the ideal combination of filter, pump and UVC technology
- Optimally matched sets
- Attractive price advantage over separate purchase of the individual components

Recommendation

With the matching FiltoCap the OASE pressure filters can be recessed into the ground and inconspicuously integrated in the garden landscape. The filter capacity of the entire set can be further increased through connection of the innovative OxyTex CWS Set.

FILTOCLEAR SETS

Pressure filter systems with UVC and filter pump

FiltoClear Set 20000

PRO

- Suitable for ponds up to 30 m³
- Ready to connect complete filter set
- Perfect combination of FiltoClear pressure filter with integrated UVC clarifier and matching filter pump
- Including OASE Clear Water Guarantee*^C
- Ideal for supplying higher elevated watercourses or waterfalls
- Incl. AquaMax Eco Premium filter and watercourse pump with extremely energy-efficient performance
- Pressure filter with convenient, patented cleaning function (Easy-Clean-Technology), pollutant level indicator and flow control
- Through burying or covering with a decorative rock cover, it can be perfectly integrated in the water garden

Your advantages with the set:

- Optimally matched components
- Naturally with Clear Water Guarantee[®]
- Attractive price advantage over separate purchase of the individual components!
- 100 ml Biokick CWS FREE!

Save with complete filter sets!

For the pond size specifications cited above (FiltoClear/Sets) 1 m delivery head and 5 m 1 ½" hose were taken into consideration. Larger pumps should be used for longer hose lengths and/or greater delivery heads. Clear Water Guarantee[®] in accordance with a Secchi light penetration depth of 1 m. Please note that in case of extreme temperature fluctuations, friction losses for hose lines longer than 5 m or direct sunlight due to the position of the pond (south facing), more intensive planning is required.

Important note: When planning a new pond with koi stock, please ensure a minimum pond size of 5 m³!

Ponds with plants,
without fish stock

Ponds with plants and
fish stock to 1 kg/1000 l

Ponds with plants and fish stock to
1 – 3 kg/1000 l (koi ponds)

Flow-through filters: The effortless path to clear water

A flow-through filter is fed by the pump in the water. The filter is the highest point in this cleaning cycle; from this point the water then flows back into the pond. Foam elements clean the water in the interior of the filter; over time these foam elements also become the home of industrious microorganisms. The advantage of flow-through filters: They are easy to reach,

they are above ground. Cleaning and maintenance are quickly executed. In this area there are many innovative products in the OASE product range. Systems with self-cleaning function, such as the FiltoMatic CWS or the ScreenMatic prefilter spare you endless hours of pond cleaning. You will have more time to enjoy your garden!

FLOW-THROUGH FILTERS are installed for medium-sized to large ponds or small koi ponds. They stand above the water surface at the edge of the pond or above a watercourse so that the water flows back into the pond under gravity.

FLOW-THROUGH FILTERS

BIOSMART The combination of filter foam and integrated UVC clarifier ensures ideal filter capacities. Thanks to a sludge drain it is easy to clean and it is the ideal entry model.

FILTOMATIC CWS The self-cleaning filter controls the integrated sludge pump and UVC clarifier as needed. More detailed information on the Clear Water System is provided on pages 106 / 107.

BIOTEC SCREENMATIC Particularly low maintenance effort thanks to automatic Screenmatic coarse debris extraction.

BioTec 30 Offers microorganisms a particularly large settlement surface area. The low-maintenance multi-zone filter system cleans ponds of up to 120,000 litres. Ideally combined with either the Bitron C 72 W or Bitron C 110 W UVC clarifier.

Tip!

OASE Filter Sets – complete solutions with perfectly matched components.

BIOSMART

Ideal flow-through filter for beginners

BioSmart UVC 16000

BioSmart 30000

START

- Suitable for ponds up to 30 m³
- Additional oxygen enrichment through special water channeling
- Cleaning handles for convenient maintenance
- Including displays for pollutant level and water temperature
- Sludge drain for easy removal of coarse debris
- Filter can be buried to 1/3 of its height
- Optimally matched to the OASE AquaMax filter and watercourse pumps (from page 66)

BioSmart UVC 16000

- Guaranteed clear water through the combination of mechanical-biological cleaning with effective UVC technology

BioSmart 30000

- Can be optimally combined with the Bitron C 24 W and 36 W UVC clarifiers

PRODUCT DETAILS

Nitrification and efficient zones

Toxic ammonia and nitrite are transformed into harmless end products, such as gaseous nitrogen, in the different foams.

Temperature display

The thermometer indicates the current water temperature at all times.

UVC unit*

The integrated UVC unit ensures fast elimination of suspended algae and reduction of pathogens.

Integrated sludge drain

After activating the cleaning lever, the bottom drain can be opened and coarse debris can be disposed of.

Entry-level flow-through filter sets with UVC and filter pump

BioSmart Set 5000

- Suitable for ponds up to 30 m³
- Combination of mechanical biological cleaning and effective UVC technology
- Incl. OASE Clear Water Guarantee*^C
- Oxygen enrichment through special water channeling
- Cleaning handles for convenient maintenance
- Including displays for pollutant level and water temperature
- Sludge drain for easy removal of coarse debris
- Filter housing can be buried to 1/3 of its height
- Filters and pumps are optimally matched

BioSmart Set 5000

- Included in the scope of delivery: 3 m 3/4" hose and OASE filter pump 1500: 25 W; 1,500 l/h Qmax; 1.9 m Hmax

BioSmart Set 7000

- Included in the scope of delivery: 3 m 3/4" hose and OASE filter pump 2500: 40 W; 2,500 l/h Qmax; 2.2 m Hmax

BioSmart Set 14000

- Included in the scope of delivery: 3 m 3/4" hose and OASE filter pump 3500: 70 W; 3,400 l/h Qmax; 2.7 m Hmax

BioSmart Set 20000

- Included in the scope of delivery: 5 m 1 1/2" hose and OASE AquaMax Eco Classic 5500: 60 W; 5,300 l/h Qmax; 2.8 m Hmax

BioSmart Set 30000

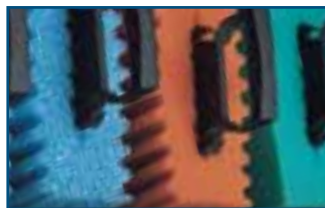

- Included in the scope of delivery: 5 m 1 1/2" hose and OASE AquaMax Eco Classic 8500: 80 W; 8,300 l/h Qmax; 3.2 m Hmax

BioSmart Set 20000 / 30000

START

PRODUCT DETAILS

Nitrification and efficient zones

Toxic ammonia and nitrite are transformed into harmless end products, such as gaseous nitrogen, in the different foams.

Temperature display

The thermometer indicates the current water temperature at all times.

Integrated sludge drain

After activating the cleaning lever, the sludge drain can be opened and coarse debris can be disposed of.

* Only BioSmart Set 20000/30000

UVC unit

The integrated UVC unit ensures fast elimination of algae and reduction of pathogens.

* Note: When planning a new pond with koi stock, please ensure a minimum pond size of 5 m³!

Clear Water System:

Year-round biologically clear water without having to do much – previously this was wishful thinking for many pond owners, now it can be easily achieved. The Clear Water System consists of up to six different components. Used together, they become the managers of the pond. Perfectly matched, the set fulfills all the tasks associated with intelligent pond cleaning. The pond filter detects the temperature and can vary its capacity as

needed, and if necessary switch on the integrated UVC bulb. The result is not only optimally cleaned water, the result is also energy savings of up to 40 % compared with devices in continuous operation. So that you can enjoy clear water with as little disturbance as possible, the new Filtomatic CWS pond filter automatically frees itself of silt deposits. This leaves more leisure time for enjoyment and a clear view of the life in the pond.

THE CLEAR WATER SYSTEM

1. FILTER PUMPAQUAMAX Eco PREMIUM

The heart of the Clear Water System works reliably at a high level of energy efficiency. Even debris particles up to 10 mm in size are pumped from the pond floor into the filter – the first step towards clear water. Additional information on page 68.

2. FILTER FILTOMATIC CWS

The nutrients and pollutants are removed from the water by the filter system in biological-mechanical processes. The system monitors the water temperature and activates the integrated silt pump, as well as the UVC device as needed, and thus offers power savings of up to 40 % compared with devices in continuous operation. The filter module is available in three different sizes.

3. FILTER STARTER BIOKICK CWS

The filter starter contains microorganisms and bacteria nutrients. These ensure rapid settlement of the filter foams with the microorganisms that decompose contaminants. High-performance bacteria decompose the nutrients and detoxify the water.

4. SURFACE SKIMMER SWIMSKIM CWS

Contaminants, such as leaves and nutrients that enter the pond through the surface, also reduce the water quality. The skimmer removes these contaminants before they sink, and supplies the pond with vital oxygen. Sediment on the pond floor is stirred up and is carried into the filter via the AquaMax Eco Premium filter pump.

5. POND AERATOR OXYTEX CWS

Oxygen is important for maintaining good water quality, as it keeps the microorganisms alive. The OxyTex aerates the water, recirculates it, and thanks to its surface-optimised fibre structure, offers a large settlement surface for extra microorganisms that decompose the nutrients. The pond aerator can increase the effect of the filter by up to 25 %.

6. ROCK COVER FILTOMATIC CAP CWS

The decorative cover with a natural-sand surface protects the FiltoMatic CWS buried in the ground. The cover in rock decor is weather-resistant, and thanks to its near-natural design is integrated inconspicuously into the garden. The technology in garden installations and pond landscapes becomes virtually invisible.

FILTOMATIC CWS *C

Pond manager with automatic self-cleaning

- Suitable for ponds up to 25 m³
- Intelligent pond manager through innovative control unit with temperature control display
- With improved UVC performance and filter performance
- Up to 40 % power savings thanks to UVC unit with patented self-cleaning that is activated as needed plus oxygen enrichment
- Incl. OASE Clear Water Guarantee*^C
- Virtually invisible as the filter device can be buried to 70 % of the device height
- Auto. sludge discharge through the self-cleaning function of the filter
- Convenient cleaning of the filter foams
- Optimal conditions for the filter biology thanks to long service life and high-quality filter sponges
- Less string algae through continuous removal of phosphates and nutrients
- Interval cleaning, UVC and pump function can also be controlled manually
- Optimal ratio of device dimensions and biological-mechanical cleaning capacity
- Lower costs for replacement bulbs thanks to UVC runtime meter
- Easy installation, low-maintenance and user-friendly
- Available in three different sizes

FiltoMatic 25000

- UVC with integrated stainless steel reflector for even more effective sterilisation and clarification

* Relative to devices in continuous operation

PRODUCT DETAILS

Automatic control unit

The innovative control system ensures energy savings through a clocked UVC unit and automatic cleaning intervals.

Filter cover

Easy to open and close with one hand. Unintentional opening is prevented through integrated lock element.

Compact design

Strong filter effect in the smallest space. With the FiltoCap the device can be hidden so that it is virtually invisible.

Cleaning

In addition to the automatic sludge discharge, the foam elements are cleaned conveniently, your hands stay clean.

Top 3 product characteristics

- Perfect and efficient combination of filter and filter pump
- Attractive price advantage over separate purchase of the individual components
- Can be extended with the OxyTex CWS pond aerator

Recommendation

With the nearly natural rock cover FiltoMatic Cap CWS, the FiltoMatic can be integrated virtually invisibly in the pond landscape.

FILTOMATIC CWS SETS

Convenient filter solutions for every pond

FiltoMatic CWS

PRO

- Suitable for ponds up to 25 m³
- Ready to connect, complete filter sets
- Up to 40 % power savings thanks to UVC unit with patented self-cleaning that is activated as needed plus oxygen enrichment
- Perfect combination of flow-through filter FiltoMatic CWS with integrated UVC and energy-efficient filter pump AquaMax Eco Premium
- Intelligent pond manager through innovative control unit with temperature control display
- With improved UVC performance and filter performance
- Incl. OASE Clear Water Guarantee*^C
- Automatic sludge discharge through the self-cleaning function of the filter
- Convenient cleaning of the filter foams
- Optimal conditions for the filter biology thanks to long service life and high-quality filter sponges
- Less string algae through continuous removal of phosphates and nutrients
- Optimal ratio of device dimensions and biological-mechanical cleaning capacity
- If there is a supplemental requirement for filter capacity, if the pond is enlarged or due to increased fish stock, the set can be extended with OxyTex CWS (see selection table)
- Available in three sizes, incl 100 ml BioKick CWS

Delivery heads ranging from 0 to 1.2 m and hose length of 5 m with a hose diameter of 1 ½" were taken into consideration for the pond size information cited above (FiltoMatic CWS). Larger pumps should be used for longer hose lengths and /or greater delivery heads. Clear Water Guarantee* ^c as specified by Secchi to a visual depth of 1 m.									

Ponds with plants, without fish stock

Ponds with plants and fish stock to 1 kg/1000 l

Ponds with plants and fish stock to 1 – 3 kg/1000 l (koi ponds)

Important note
When planning a new pond with koi stock, please ensure a minimum pond size of 5 m³!

Schematic diagram: BioTec 30 in function with a filter and watercourse pump and a Bitron C

BioTec  *C

Multi-zone filter for larger ponds and koi ponds

- Suitable for ponds up to 120 m³
- Multi-zone filter with special filter foams
- Highly-effective mechanical / biological decomposition of pollutants and nutrients
- Large surfaces for settlement of filter bacteria
- Coarse debris extraction through filter brushes
- Sludge drain for easy flushing out of coarse pollutants
- Easy cleaning and maintenance
- Connection possibility for OASE Bitron UVC clarifiers
- High-quality GRP material and first-class workmanship

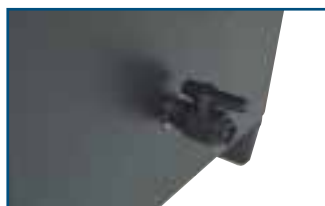

PRODUCT DETAILS

Brushes and mat meshwork
For separating the coarse debris.

Filter foams
For optimal settlement of micro-organisms for decomposition of pollutants and nutrients.

Ball valve
The clean water outlet back to the pond lowers the water level in the filter and thus enables water-saving filter cleaning.

Discharge chamber
with DIN 110 connection.

AquaActiv BioKick Premium
BioKick Premium, the filter starter for pros with more than 50 billion microorganisms/ml. Quickly provides adequate biology in the filter, whether at restart or after cleaning.

Item no. 51280

Schematic diagram: UVC in combination with OASE BioTec ScreenMatic

BIOtec SCREENMATIC

High-performance filter with automatic coarse-debris extraction

BioTec ScreenMatic 12

BioTec ScreenMatic 36

PRO

- Suitable for ponds up to 140 m³
- Highly-effective flow-through filter also for medium-size koi ponds
- Incl. OASE Clear Water Guarantee*^C
- Significantly less filter maintenance is required thanks to coarse debris extraction at the top of the filter
- Automatically driven 30 minute interval cleaning of the ScreenMatic sieve
- Collection tank for removal of extracted coarse pollutants
- Different filter media and large settlement surface for optimal development of filter bacteria
- Flow speed of the incoming water can be adjusted individually
- Sludge drain with slide valve for removing debris from the filter system
- Convenient cleaning of filter foams directly in the filter, without removal
- Individual chamber filled with effective ammonia removing media
- Use of the PhosLess filter media tubes as needed for string algae reduction (optional accessory)
- Optimally matched to OASE AquaMax filter pumps
- Direct connection possibility for Bitron C UVC clarifiers
- New: BioTec ScreenMatic 36 now with high quality DN 110 outlet

PRODUCT DETAILS

Setup possibility

Free access to the foams through 90° setup possibility for easy and fast maintenance.

Water distributor with flow regulator

Adaptation of the ScreenMatic sieve to different pump capacities for optimal function.

Electric motor

For the electric drive of the ScreenMatic preliminary filter in 30 minute intervals.

Triple separator

Frees the ScreenMatic from accumulated debris in three stages.

AquaActiv PhosLess

Algae protection
Binds excess phosphates, as well as heavy metals, such as lead and copper.

Item no. 36981 (Page 171)

AquaActiv PhosLess

Refill pack
Item no. 57477 (Page 171)

AquaActiv BioKick Premium

BioKick Premium, the filter starter for pros with more than 50 billion microorganisms/ml. Quickly provides adequate biology in the filter, whether at restart or after cleaning.

Item no. 51280

Extras

Top 3 product characteristics

- Including OASE Clear Water Guarantee*^C
- Filter, pump and UVC device are perfectly matched
- Easy installation

Recommendation

Filter foams should not be cleaned too often because valuable bacteria can be lost with each cleaning, and they redevelop slowly!

BIOtec SCREENMATIC SETS *^C

Flow-through filter systems with UVC, pump and automatic coarse debris extraction

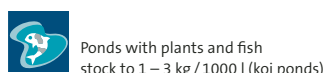

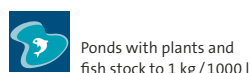

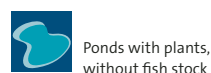

- Suitable for ponds from 5 – 54 m³
- Ready-to-use perfectly matched complete filter sets consisting of BioTec ScreenMatic flow-through filter, self-cleaning Bitron UVC clarifier and AquaMax Eco Premium filter pump
- Incl. OASE Clear Water Guarantee*^C
- Combination of mechanical biological cleaning and effective UVC technology
- Fast and easy start-up
- Included in the scope of delivery: BioKick CWS filter starter for the initial settlement of microorganisms

For the pond size specifications cited above (BioTec) 1 m delivery head and 5 m 1 ½" to 2" hose were taken into consideration. Larger pumps should be used for longer hose lengths and / or greater delivery heads. Clear Water Guarantee[™] in accordance with a Secchi light penetration depth of 1 m. Please note that in case of extreme temperature fluctuations, friction losses for hose lines longer than 10 m or direct sunlight due to the position of the pond (south facing) more intensive planning is required.

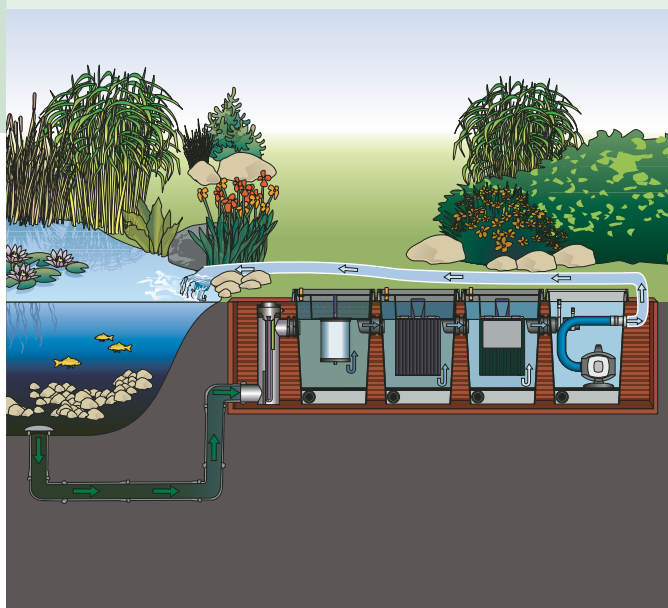

Important note
 When planning a new pond with koi stock, please ensure a minimum pond size of 5 m³!

Module filters: Large ponds perfectly equipped

Owners of large natural bodies of water or swim ponds have the most rigorous requirements on the performance of filters and value of convenient operation. Koi enthusiasts, in particular want to know that flora and fauna are optimally protected. Every pond owner can extend and create the clever and powerful module filter systems from OASE, in accordance with their requirements. The filter system based on

the gravity fed principle that maintains an extremely low level of energy consumption, is particularly convincing. The filter can be concealed in the ground or under the terrace. Discover the OASE ProfiClear Premium system, proven professional filter performance and innovative functions, for example, the automatic self-cleaning and the intelligent self-monitoring functions!

THE PROFICLEAR CLASSIC filter system consists of 4 modules that together ensure clear natural ponds, swim ponds or fish ponds.

Even koi owners can fully rely on **THE INTELLIGENT PROFICLEAR PREMIUM FILTER SYSTEM** with 3 modules, because with the fully automatic system, even koi and other ponds get outstanding water quality.

MODULE FILTERS

PROFICLEAR CLASSIC This reliable filter system is characterised by powerful filter performance and flexible modules that can be extended. These modules enable individual capacity adaptation if the pond is enlarged or if fish stock is increased.

Special features

- High filter capacity for large natural ponds and swim ponds to 200 m³
- Can be used as a gravity-fed system or as a pump fed system
- Consists of 4 modules with flexible extension possibility
- Convenient – only requires occasional, manual cleaning
- Average water circulation of 12 m³/h
- Noiseless function
- Moderate space requirements

PROFICLEAR PREMIUM This new generation of intelligent filter system is the further development of the Classic series provides incomparable filter performance and unique functions.

Special features

- First-class filter capacity for natural ponds and swim ponds up to 200 m³, in particular for koi ponds to 45 m³
- Can be used as a gravity-fed system or as a pump fed system
- Consists of 3 modules with flexible capacity extension possibility through addition of a Moving Bed module, as well as filling of the individual module
- Maximum convenience thanks to intelligent self-cleaning and reliable self-control
- Maximum water circulation of 25 m³/h
- Low-noise function
- Low space requirements

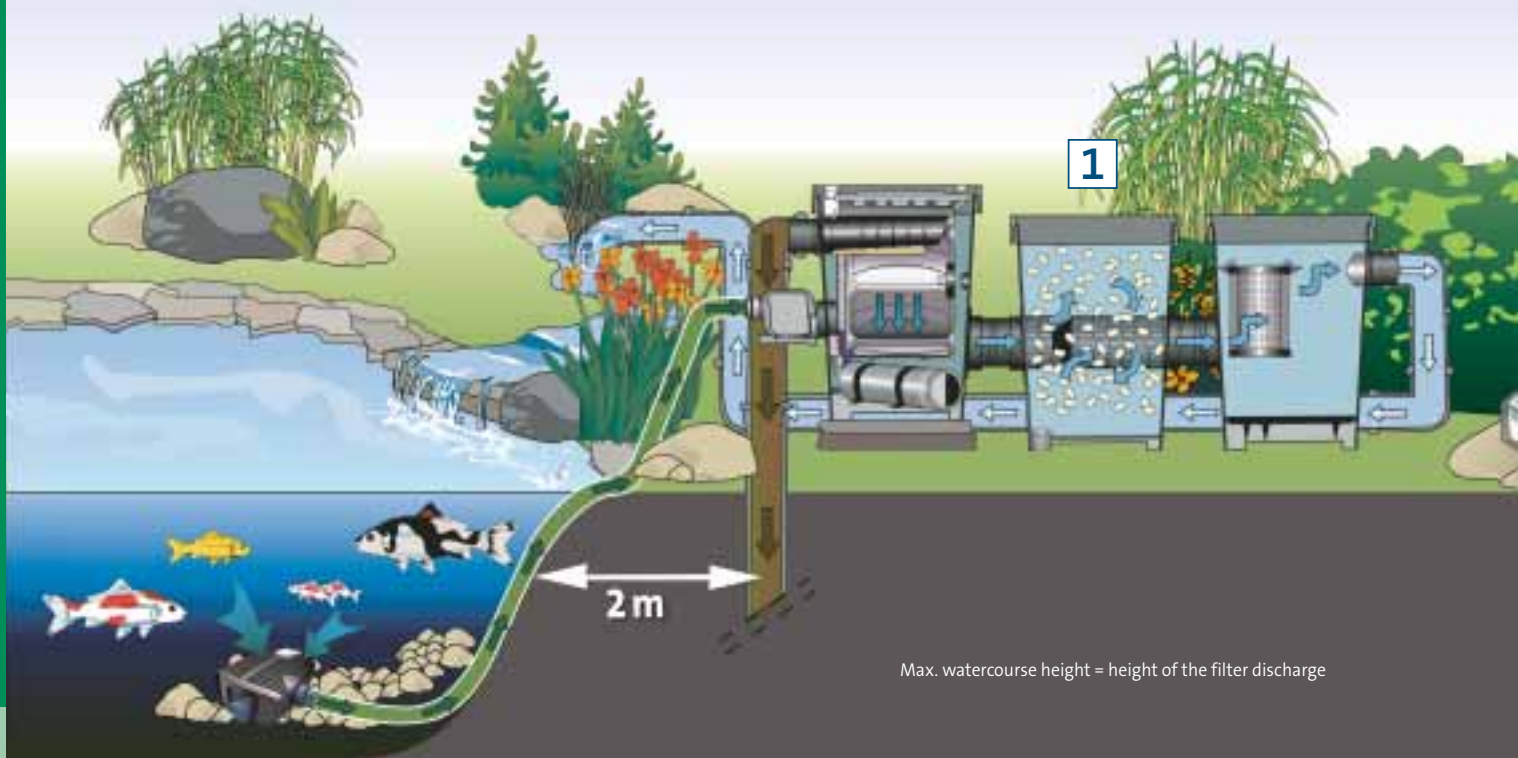

Tip!

With the AquaSkim Gravity surface skimmer you can equip your gravity-fed system with a skimmer, even if you do not have a shallow pond. Suitable for all DN 110 pipes.

The ProfiSkim Premium is suitable for pond surfaces up to 65m² and its stainless steel base enables easy installation. It is equipped with 2" and DN 110 connection possibilities and is suitable for use in gravity-fed systems, as well as in pump-fed systems.

Max. watercourse height = height of the filter discharge

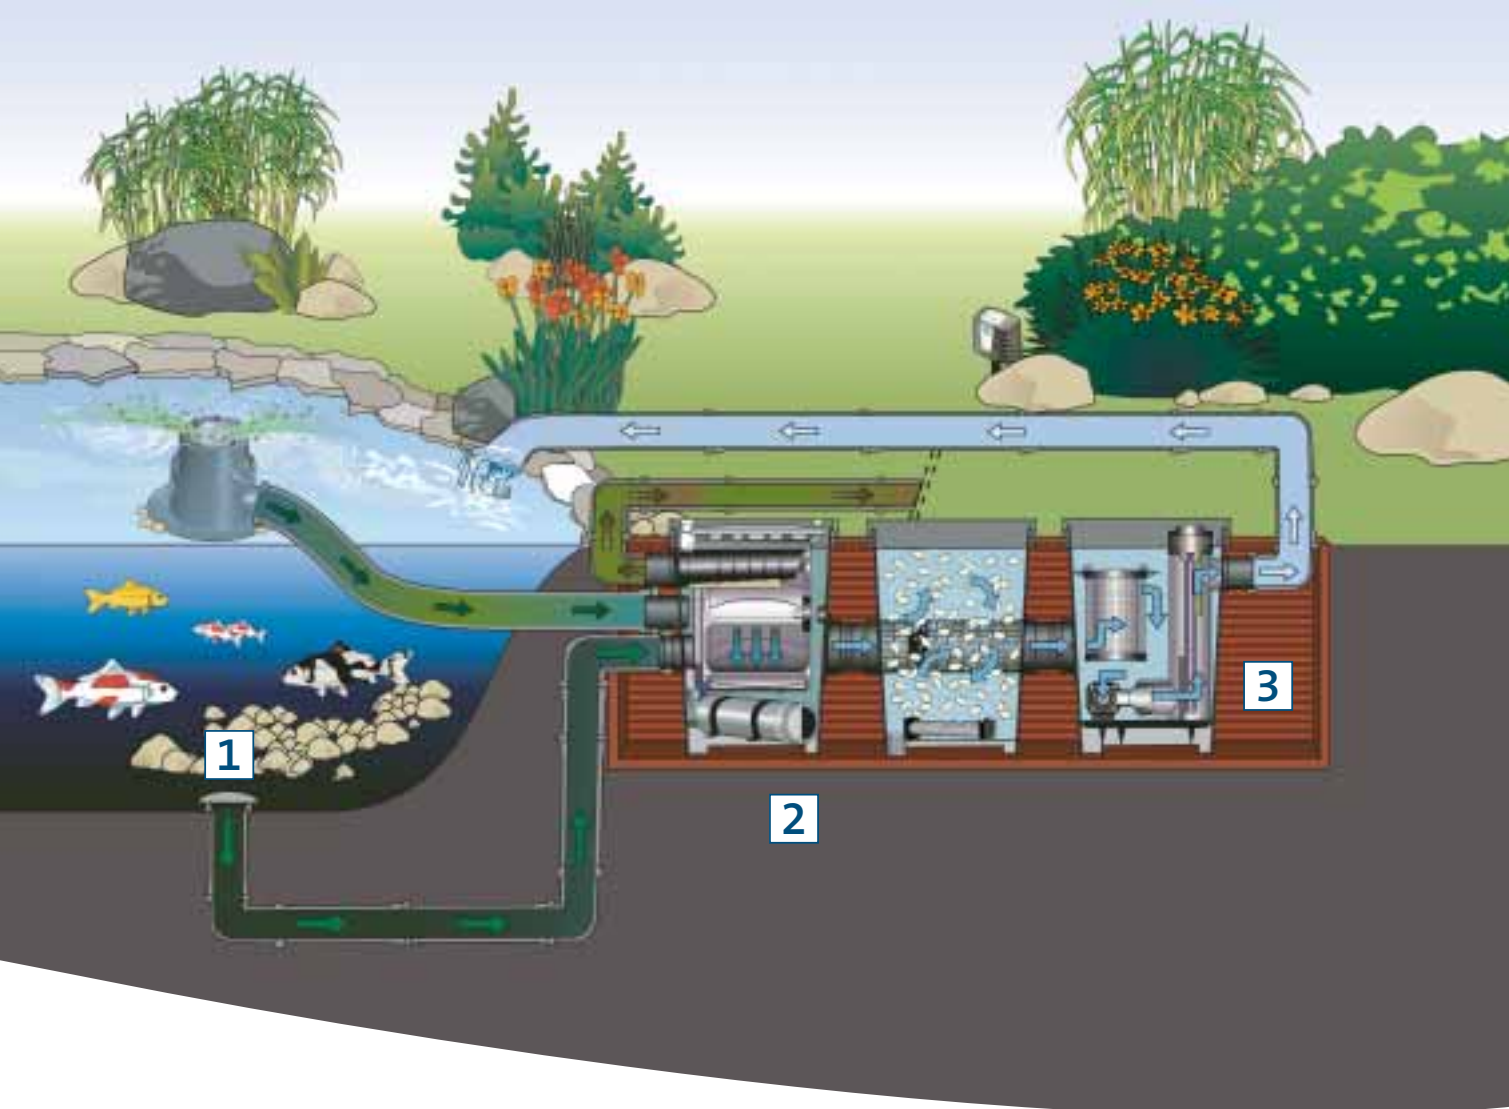

The ProfiClear modular filter systems can be operated in two different ways depending on the local conditions: In accordance with the gravity-fed principle or as a pump-fed system.

ProfiClear: Pump-fed principle

With the pump-fed principle the filter system is installed above ground, and is also above the water level of the pond. The polluted pond water is fed out of the pond or out of the levelled pump chamber and into the filter system [1](#) using a pump. The cleaned water flows back via a freely inclined pipeline, watercourse, or waterfall. In this process the source of the watercourse is not higher than the filter discharge.

SYSTEM ADVANTAGES AT A GLANCE:

- Can be easily retrofitted in existing ponds
- Minimum installation effort
- Easy upstream installation of UVC devices (page 134)
- Easy to extend the system
- Optimally matched to OASE AquaMax Eco Twin / Premium filter pumps (page 68)

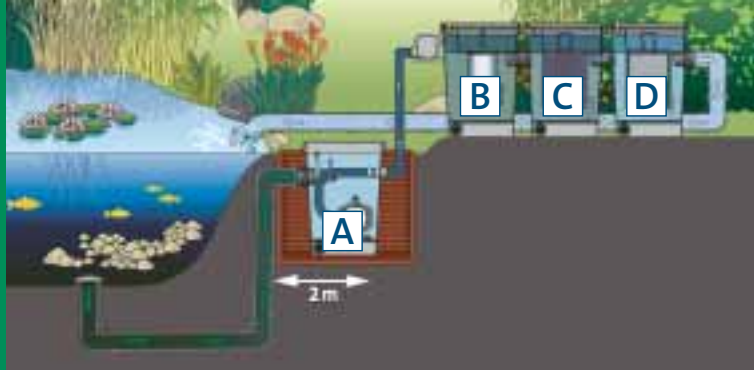

ProfiClear: Gravity-fed principle

With the gravity-fed system the filter is recessed into the ground and made level to the water line of the pond. Polluted pond water reaches the first filter module via the bottom drain or a liner transition. Because the pump is not positioned at the beginning of the system, the coarse debris extractor can remove suspended matter in the water very effectively. The pump is in the pump chamber at the end of the system and conveys the cleaned water back into the pond.

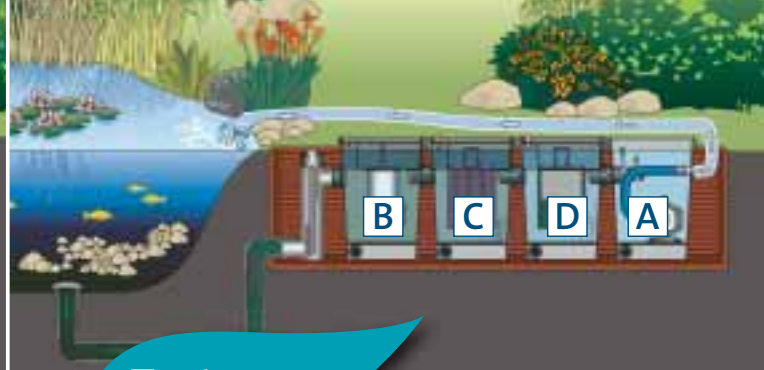

Since there are no significant height differentials to overcome, energy-efficient AquaMax Gravity Eco pumps can be used.

SYSTEM ADVANTAGES AT A GLANCE:

- Effective removal of suspended matter through exploitation of the gravity-fed principle
- Energy-efficient, as there is virtually no height differential and only minimal friction losses occur
- Can be integrated inconspicuously in the water garden
- UVC devices can be installed downstream or even upstream with the new Bitron Gravity (page 136)
- Optimally matched to OASE AquaMax Gravity Eco filter pumps (page 78)

Module filter ProfiClear Classic pump fed system

Module filter ProfiClear Classic gravity fed system

Extras

Top 3 product characteristics

- Can be individually matched to the size and the conditions of the pond
- Can be modularly extended if the pond changes
- Can be used in the energy-saving gravity-fed system

Recommendation

Matching filter and watercourse pumps:
 AquaMax Eco Premium (Page 68)
 AquaMax Gravity Eco (Page 78)

Matching UVC clarifiers:
 Bitron C 72 W / 110 W (Page 134)

PROFICLEAR CLASSIC *C

Reliable modular filter system for large bodies of water

ProfiClear Classic pump chamber

PRO

- Ideal for large ponds and swim ponds up to 200 m³
- Modularly extendible filter system for individual adaptation to local conditions
- Individual solutions through bringing together of different components
- Can be implemented in any size of pond and under any pond conditions
- Can be used as a pump-fed version, as well as an energy-saving gravity-fed filter
- Coarse pollutant extraction with automatic cleaning (optional accessory)
- Easy-maintenance cleaning handles and floor drains in each filter chamber
- High-quality and impact resistant GRP and perfect workmanship
- Optimally matched to OASE filter pumps
- Protection against disproportionate algae growth when using the phosphate binder module

ProfiClear Premium: For the most rigorous demands. With no compromises.

The solution for large koi ponds. Koi pond owners know that what starts as a small pond with a few koi can quickly become a larger installation. With the number of fish and use of the pond, the demands imposed on performance and convenience of a filter system increase as well; no one wants to make any more compromises.

The new generation ProfiClear Premium module filter system has been developed jointly in intensive cooperation with leading koi experts. With its extremely reliable filter performance, its well thought-out functions, and its unusual price / performance ratio, it sets totally new standards. It consists of three modules, drum filter module, Moving Bed module and individual module, the entire system even ensures clear water and will be extended by an additional 45 m³ or

if there is a desire for swimming. The secret is its flexibility: Depending on the use of the pond a second or even third Moving Bed module can be connected, and the Individual module can be equipped with additional filter media. In a manner that is completely uncomplicated, this increases the overall filter capacity. Even large bodies of water, such as natural ponds and swim ponds to 200 m³ remain clear.

See this new product for yourself and be inspired by the ProfiClear Premium product film!

www.oase-livingwater.com/proficlearfilm

Extras

1 Drum filter module – intelligence sets the pace.

The drum module is not only an intelligent filter system, it also removes coarse debris before the debris reaches the filter bacteria. Then the exceptional filter with a maximum flow rate of 25 m³/h ensures crystal clear water. A micro-controller system automatically monitors and controls the main functions. Maximum convenience is guaranteed; with the easy operation the automatic self-cleaning can also be individually adjusted.

2 Moving Bed Module – Hel-X ensures optimum media circulation.

In this module professional Hel-X biomedias ensure an extremely effective decomposition of nutrients and pollutants in the water. With their unusual structure they offer an incomparably large protected settlement surface for microorganisms. The moving bed process and the innovative bypass technology ensure optimal movement of the bio-media, even at high flow-through rates, as well as for self-cleaning of the dead biomass. The pre installed, aerator bar integrated in the module ensures additional oxygen.

3 Individual Module – flexible with maximum effectiveness.

Here the filter system is adapted individually to the pond and the desired use. The module offers extensive connection possibilities for additional system products, such as AquaMax Gravity Eco filter pumps or Bitron Gravity UVC clarifiers. In addition stainless steel baskets with a fill volume of 8 litres are integrated in the flow area; these baskets can be filled with additional filter media, such as active charcoal or zeolite.

PROFICLEAR PREMIUM

- Maximum partial removal down to 60 µm
- Automatic self-cleaning
- High flow rate of 25 m³/h for fast recirculation rates

New!

Schematic diagram: ProfiClear module filters are outstandingly suited for use on koi ponds

PROFICLEAR PREMIUM

- Perfect for koi ponds, swim ponds and other large bodies of water
- New generation of module filters for professional water quality
- Developed by and with koi experts
- Excellent decomposition rates of ammonium / ammonia and nitrite.

PROFICLEAR PREMIUM *C

Sophisticated filter system for koi ponds

Extras

Top 3 product characteristics

- New generation, sophisticated filter system for koi ponds and other large ponds
- Intelligent controller completely handles the self-cleaning
- First-class price / performance ratio

Recommendation

Matching filter and watercourse pumps:
AquaMax Eco Premium (Page 68)
AquaMax Gravity Eco (Page 78)

Matching UVC clarifiers:

Bitron C 72 W / 110 W (Page 134)
Bitron Gravity (Page 136)

- Innovative high-end module filter system for koi ponds and other large bodies of water to 200 m³
- Outstanding filter capacity with intelligent control functions
- Intelligent self-cleaning function for unique maintenance-free operation (drum filter module)
- Highly effective decomposition of pollutants and nutrients thanks to professional filter media and moving bed process (MovingBed Module)
- Flexible adaptation of the filter system to individual requirements (individual module)
- Mature, professional technology with more than 3 years of development time
- Innovative and reliable product »made in Germany*«

DRUM FILTER MODULE

Intelligence sets the pace. The intelligent switch centre removes coarse debris to 60 µm – i.e. finer than a hair.

- Maximum partial removal to 60 µm and flow-through rates to 25 m³/h for a crystal clear view
- Automatic self-cleaning offers maximum convenience
- Rinsing is executed with cleaned pond water, a water connection is not required
- A watertight microcontroller system monitors and controls the main functions, operation is as easy as child's play (Plug&Play)
- Control system with retrospective display of errors in running operation, as well as adjustment possibilities for forced cleaning, duration of cleaning and supplemental cleaning
- Pollutant rakes on the sieves reliably remove string algae and other larger particles from the drum

- Pollutant trough made of ductile EPDM material prevents jamming of larger particles
- VDE/GS testing certifies reliable and safe functions
- Flexible implementation possibilities; can be used in the gravity-fed system, as well as in the pump-fed system
- Safety level switch in the pumped system prevents jamming due to debris particles
- Stable housing thanks to solid stainless steel elements and dimensionally stable Duroplast
- Individually removable sieve elements (no tools required) and free-wheeling functions for easy access to the drum
- Incomparably quiet through extensive noise damping
- Powerful, high quality pressure pump is integrated for flushing the drum
- Full flexibility for the connection with up to 4 x DN 110 inlets (1 x optional)
- Screen elements in 150 µm mesh width optionally available as accessories

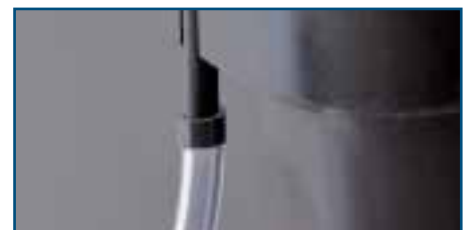

MOVING BED MODULE

POWERED BY
Hel-X

Hel-X ensures optimum media circulation, Original Hel-X biomedias are highly effective at degrading pollutants in the moving bed process.

- Extremely large, protected settlement surface for microorganisms (704 m²/m³)
- Innovative bypass technology for optimal movement of the Hel-X bio-elements, even at high flow rates
- Removal of toxins, such as ammonium / ammonia and nitrite.
- 50 l of Hel-X decomposes approx 300 g of fish food per day (can be extended to 100 l per module with an additional aeration)
- Aerator bar for optimal oxygen enrichment and turbulence already installed
- Advantages of the moving bed process: Permanent, optimal oxygen supply; self-cleaning effect from dead biomass, know-how from industrial water treatment
- Integrated bottom drain with high-quality, finely engineered slide valve

Integrated aerator can be connected to AquaOxy aerator pumps.

Biological surface for settlement of the microorganisms (left – biomedias that has not yet been used, right – with settled microorganisms).

INDIVIDUAL MODULE

Flexible with maximum effectiveness. The filter system is flexibly aligned to the individual conditions of the body of water.

- Space-saving pump and UVC chamber for easy integration of: AquaMax Gravity Eco filter pumps and Bitron Gravity UVC clarifiers
- Maximum flexibility in the connection through DN 110 and 2" ducts
- To increase the filter capacity, it is possible to fill the 2 individual baskets in the flow area with additional filter medium up to 8 litres fill volume
- Integrated bottom drain with high-quality, finely engineered slide valve

Convenient filling of the 2 individual baskets with up to 8 litres fill volume.

	* Double-row configuration (the filter system must be operated in two filter rows that are separate from each other) see illustration below. This table considers the usual flow losses within the filter system and expert recommendations for sterilisation capacity in koi ponds.								

BIOLOGICAL PERFORMANCE OF THE HEL-X BIO MEDIUM IN THE MOVING BED MODULE:

50 l of Hel-X decomposes approx 300 g of fish food per day. If necessary, the fill level already contained can be extended from 50 l to 100 l (600 g fish food) per Moving Bed Module with an additional aeration. Up to 3 Moving Bed Modules per row can be inserted in succession. Among other factors, biological performance depends on temperature, food quality and the degree to which the Hel-X is settled with microorganisms.

RULES OF THUMB

How to calculate the right UVC power for your pond

Ponds without fish stock: 1 W UVC power per m³ pond volume
Ponds with fish stock: 2 W UVC power per m³ pond volume
Ponds with koi stock: 4 W UVC power per m³ pond volume

Note: To keep the bacterial load low in the koi pond, the Bitron Gravity should be operated with a max. flow rate of 12.5 m³/h. In this regard recirculation of 55 % of the pond volume/h should be the objective. These recommendations are already considered in the table above.

Double-row configuration with ProfiClear as the example
The filter system must be operated in two filter rows that are separate from each other.

Setup – gravity fed system

Setup – pump fed system

	* Double-row configuration (the filter system must be operated in two filter rows that are separate from each other) see illustration below. This table considers the usual flow losses within the filter system and expert recommendations for sterilisation capacity in koi ponds.								

BIOLOGICAL PERFORMANCE OF THE HEL-X BIO MEDIUM IN THE MOVING BED MODULE:

50 l of Hel-X decomposes approx 300 g of fish food per day. If necessary, the fill level already contained can be extended from 50 l to 100 l (600 g fish food) per Moving Bed Module with an additional aeration. Up to 3 Moving Bed Modules per row can be inserted in succession. Among other factors, biological performance depends on temperature, food quality and the degree to which the Hel-X is settled with microorganisms.

RULES OF THUMB

How to calculate the right UVC power for your pond

Ponds without fish stock: 1 W UVC power per m³ pond volume
Ponds with fish stock: 2 W UVC power per m³ pond volume
Ponds with koi stock: 4 W UVC power per m³ pond volume

Note: To keep the bacterial load low in the koi pond, the Bitron Gravity should be operated with a max. flow rate of 12.5 m³/h. In this regard recirculation of 55 % of the pond volume/h should be the objective. These recommendations are already considered in the table above.

Double-row configuration with ProfiClear as the example
The filter system must be operated in two filter rows that are separate from each other.

Setup – gravity fed system

Setup – pump fed system

UVC clarifiers and aerators: Provide optimal clarity and conditions in the pond

Clear and healthy water ensures undisturbed pond enjoyment. But what happens when suspended algae or other particles turn the water green and lessen the enjoyment of the garden pond? There is a remedy. Simply place the UVC clarifier in the water circuit; ideally before your filter. The special light radiation in the interior of the UVC clar-

ifier kills off algae and bacteria, and germs are eliminated. Pond type and water volume determine the capacity your UVC device should have. The ideal supplement to a filter system is an additional oxygen supply. With the OASE aerators, as well as the new generation OxyTex CWS, you provide an optimal and healthy climate in your pond.

UVC CLARIFIERS AND AERATORS

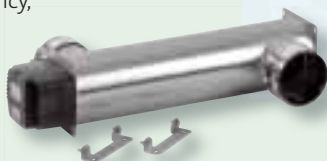

VITRONIC The OASE Vitronic is the ideal entry to the world of UVC clarifiers. The algae pumped through the housing are safely eliminated. Thanks to the visual function check the status of the UVC bulb is always shown.

BITRON C With this UVC clarifier the integrated automatic cleaning rotor continuously cleans the quartz tube and thus ensures optimal UVC radiation. The bypass technology enables high flow rates and sufficient contact time. The Bitron C is the ideal supplement for the OASE flow-through filters.

BITRON GRAVITY This stainless steel UVC clarifier is nothing other than ground breaking. Particularly suited for gravity-fed applications, it shows its worth with not only outstanding UV performance and extremely high efficiency, but also with 100 % VDE certified safety.

AQUAOXY This pond aerator ensures perfect aeration in the pond. Some models can even be set up outdoors. The air flow rate can be variably adjusted (except AquaOxy 240).

OxyTex CWS With its plant-like appearance the pond aerator is seamlessly integrated in the pond. With use of the OxyTex CWS filter capacity can be increased by as much as 25 % thanks to the large surface and extra oxygen. It is also available with an aerator pump in a set.

VITRONIC 

Universal UVC clarifiers

Vitronic 11 W

Vitronic 18 W

Vitronic 36 W / 55 W

START

- Suitable for ponds up to 60 m³
- Elimination of suspended algae (green water)
- Reduction of harmful bacteria and pathogens
- Visual function check of the UVC bulb
- Quick-release closure for easy bulb change and cleaning of the quartz glass
- High-quality workmanship with impact-resistant plastic housing
- Easy installation thanks to an extensive range of connection accessories
- Incl. high-quality UVC bulb

PRODUCT DETAILS

High quality UVC

The use of high-quality UVC bulbs guarantees a long service life.

Stepped hose adapter

Hose adapters for the connection of $\frac{3}{4}$ " to $1\frac{1}{2}$ " hoses or 1" to $1\frac{1}{2}$ " hoses included in the scope of delivery.

Inspection window

For checking the bulb function (not for Vitronic 11 W).

Closure technology

Quick-release for easy bulb change and cleaning of the quartz glass.

Extras

Top 3 product characteristics

- Clear pond water through UVC clarification
- Highly effective against suspended algae, bacteria and pathogens
- Can be combined with almost all off-the-shelf filters

Recommendation

The UVC bulbs should be changed at regular intervals, ideally in spring before the season starts, to guarantee the full-strength capacity of the UVC light waves!

BITRON C *C

UVC clarifiers with patented self-cleaning and bypass technology

Bitron C 24 W

Bitron C 36 W / 55 W

Bitron C 72 W / 110 W

PRO

- Suitable for ponds up to 110 m³
- Elimination of suspended algae (green water)
- Reduction of harmful bacteria and pathogens
- UVC radiation is fully effective at all times thanks to patented, automatic bulb cleaning
- Well thought-out bypass technology enables optimum radiation
- Individual water flow adjustment for optimal adaptation to the connected filter pump
- Energy efficient thanks to electronic ballast
- Integrated magnets protect the UVC technology against limescale deposits
- Ideal supplement to the BioTec pond filter range
- Visual function check of the UVC bulb
- Quick-release closure for easy bulb replacement
- High-quality workmanship with impact-resistant plastic housing
- Incl. high-quality UVC bulb
- Including OASE Clear Water Guarantee*^C in conjunction with the OASE flow-through filters, BioSmart, BioTec and ProfiClear

PRODUCT DETAILS

Automatic cleaning rotor

The automatic cleaning rotor is continuously guided around the quartz glass tube by the water flow and prevents debris from settling.

Closure technology

Quick-release for easy opening of the bulb housing and particularly easy bulb replacement.

Throttle handle

Easy adjustment of the water flow rate.

Inspection window

The function of the UVC bulb can be checked at any time through the inspection window.

Extras

Top 3 product characteristics

- Clever bypass system combines high flow rates with optimal contact time
- Permanent self-cleaning thanks to patented cleaning rotor
- Up to 30 % energy savings through electronic ballast

Recommendation

Do not forget to replace UVC bulbs regularly, ideally in the spring!

Bitron Gravity inserted in the Individual module of the ProfiClear Premium system

BITRON GRAVITY

Highly-efficient – perfect for gravity-fed filter systems

- Suitable for ponds up to 70 m³
- Extremely effective elimination of algae and reduction in pathogenic bacteria levels (to 12.5 m³/h) – similar to an immersion UVC
- 100 %, VDE-certified safety; does not cause eye injuries
- Energy efficient thanks to electronic ballast
- Effective sterilisation thanks to long exposure time in the Bitron
- Flow-optimised reactor design ensures direct and virtually loss-free UV radiation
- High-quality V4A stainless steel housing for stability and good reflection rates
- Extremely easy installation with stainless steel connection elements
- Flexible connection before or after the ProfiClear filter system – also for other gravity-fed applications
- In the event of pond enlargements or increase in koi stock, extension with additional Bitron Gravity UVC devices is possible at any time
- Visual function check
- Horizontal or vertical setup possible
- Incl. 2 x DN 110 quick-release couplings, thus easy to install
- With the adapter set (18127) it is also be suitable for pump-fed operation
- Clear water guarantee*^C when used in conjunction with OASE ProfiClear filters

PRODUCT DETAILS

High-quality V4A stainless steel housing

Provides stability and good reflection rates.
Can be used even with increased salt content (dry setup).

Easy installation

Thanks to stainless steel connection elements.

Flexible installation

Possible before or after the filter system.
Also ideal for other gravity-fed applications.

Extras

Top 3 product characteristics

- Unusually powerful, efficient UVC clarifier
- Extremely effective sterilisation thanks to well thought-out flow optimisation
- Extremely easy and flexible installation before or after the filter system

Recommendation

Do not forget to replace UVC bulbs regularly, ideally in the spring!

AQUAOXY

Oxygen supply for ponds to 50 m³

AquaOxy 240

AquaOxy CWS 4800

- Suitable for ponds up to 50 m³
- Optimal oxygen supply for pond fish and plants
- Safe 12 V technology for AquaOxy 400 – 2000
- Reduced noise, energy-efficient operation
- Flexible location thanks to sufficiently long hose length
- Easy and convenient handling
- Robust motor and high-quality UV-stabilised housing
- Included in the scope of delivery: Air stones and replacement membrane set

From AquaOxy CWS 400

- Air stones are wear-free
- Easily adjustable air outflow rate

AquaOxy CWS 4800

- Crafted with high-quality aluminium housing
- Thanks to the strong air flow can be used as ice preventer

PRODUCT DETAILS

Air stones

Ensure high-volume, uniform dissipation of oxygen into the water through newly designed air guidance channels. The AquaOxy 240 is delivered with a classic air stone.

Regulating valves

For connection of the silicon hoses. Easy, 0–100 % adjustment of the oxygen rate is possible.

OxyTex CWS / SETS

Pond aerator and filter medium in one

OxyTex CWS 400

OxyTex CWS Set 1000

- Unique combination of oxygen supply, circulation and nutrient decomposition
- Ample space for microorganisms thanks to surface-optimised fibre structure
- Ideal supplement for the FiltoMatic CWS and FiltoClear, filter capacities can be increased up to 25 %
- Attractive plant-effect design
- Optimised for connection to existing aerator pumps (incl. adapter for 9 mm hoses)
- Connection-ready complete sets with aerator pump AquaOxy and OxyTex CWS
- Patent applied for

PRODUCT DETAILS

OxyTex CWS

The OxyTex CWS as standalone product for previously installed aerator pumps. Incl. adapter for 9 mm hoses.

OxyTex CWS Set 400

The OxyTex Set CWS Set 400, consisting of an OxyTex CWS 400 and a high-performance AquaOxy CWS 400 pond aeration pump.

OxyTex CWS Set 1000

The OxyTex Set CWS Set 1000, consisting of an OxyTex CWS 1000 and a high-performance AquaOxy CWS 1000 pond aeration pump.

OxyTex CWS Set 2000

The OxyTex Set CWS Set 2000, consisting of 2 OxyTex CWS 1000's and a high-performance AquaOxy CWS 2000 pond aeration pump.

Extras

Top 3 product characteristics

- Unique combination of aeration, circulation and settlement surfaces
- Harmonises with the surroundings thanks to plant-effect design
- Increases overall filter capacity up to 25 %

Recommendation

With an AquaOxy CWS 4800 (page 139), either up to four OxyTex CWS 1000 units can be operated at a max. depth of 1.5 m or a single unit can be operated at a max. depth of 3 m. The individual OxyTex 400 and 1000 units can be operated with a max. flow rate of 400 or 1000 l/h. Here as well the AquaOxy 400 – 4800 (page 139) are optimally matched.

Schematic diagram: Pond aerator AquaAir 250 in use – optimally distributes oxygen in the pond

AQUAAir 250

*Focussed oxygen enrichment –
easy installation*

- Suitable for pond surfaces up to 250 m²
- Adjustable injector nozzle for optimal oxygen input with depth penetration to 4 m
- High flow speeds get standing water moving
- Extremely long service life thanks to high-quality workmanship and stainless steel elements
- Low-noise underwater operation
- Fastening material included in the scope of delivery
- Optimal oxygen supply thanks to small bubbles

PRODUCT DETAILS

Injector nozzle

Adjustable injector nozzle for focussed oxygen input.

Professional oxygen supply

Powerful pump with Venturi principle enables optimal oxygen supply in small bubbles.

Stainless steel basket

High-quality design with corrosion-resistant filter basket and suspension element.

Fastening material

Easy, secure anchoring of the aerator thanks to the fastening material (2 x 20 meter, steel ropes) included in the scope of delivery.

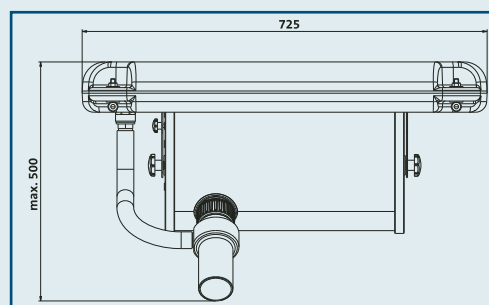

Extras

Top 3 product characteristics

- Injector nozzle for optimum oxygen distribution even on the pond floor
- Penetration depth to 4 m
- High-quality, durable workmanship with stainless steel

Recommendation

Pay attention to the placement of the AquaAir – it performs to its full capacity in quiet edge areas that are particularly low in oxygen where air flow is inadequate.

TECHNICAL DATA

		AquaAir 250
Dimensions (L x W x H)	mm	725 x 555 x 310

Suitable for ponds up to max.	m³	250.0
Item no.		57479

Before: Standing water with excessive algae formation

After: Uniform oxygen enrichment plus circulation

Application examples: Three sizes of the trumpet nozzle pattern are included – two additional nozzle patterns can be retrofitted (top centre and right)

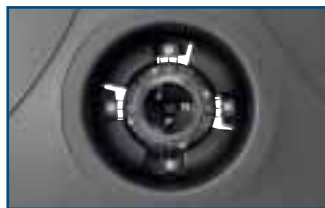

AIRFLO

Strong combination of oxygen supply and fountain for ponds and large bodies of water

- Floating aerator for oxygen supply through powerful water patterns for water surfaces up to 15,000 m²
- Axial propeller technology for water flow rates up to 295,000 l/h
- Maximum oxygen supply for any large body of water
- Easy installation and maintenance through bayonet technology
- Foamed float for extraordinary stability and noise reduction
- Pump basket of corrosion-resistant stainless steel
- Included in the scope of delivery: Fastening set, as well as 3 »Trumpet« type nozzle attachments
- LED Lighting sets with stainless steel holder available as an accessory

PRODUCT DETAILS

Bayonet technology
for easy mounting.

Fastening material
Easy, secure anchoring of the aerator thanks to the fastening material (3 x 30 meter, steel ropes) included in the scope of delivery.

Earthing pin plug + control box
The 230V version is delivered ready-to-operate with control box.

CEE-connector + protection switch
The 400 V version comes with a ready-to-connect, 5-pole CEE connector and motor protection switch.

CLEANING AND CARE: HELPING IN ALL SEASONS

True beauty comes from within and must be cultivated. The quality of your pond water is crucial for the overall biological balance. With OASE you easily succeed in this regard.

In the course of a year your pond experiences different development phases and in the process is subjected to a variety of stresses. A number of new products that are even better adapted to the respective

conditions now enhance the OASE pond care product line. These include the clever pond vacuums or surface skimmers of the AquaSkim series. They remove course pollutants before they burden the water quality. New additions are the extremely powerful ice preventer, IceFree Thermo 200 und 330. The FlexiCut 2 in 1 pond scissors for pond plant care are also new.

*»The best care
for my pond!«*

**Discover
the new
products!**

AquaSkim,
BioKick Premium,
IceFree Thermo,
FlexiCut

The clearly structured AquaActiv pond care product line also offers new products. For example, high-performance starter cultures, such as BioKick Premium, protection against algae growth through PhosLess or ALGo Bio Protect, as well as biological pond care via BioKick Care. With the proven QuickStick you can test water quality and can then react

appropriately with products from the OASE 3-step plan, you keep your garden pond algae free. The pond care program is perfectly supplemented by OASE fish medicine, which gently and highly effectively ensures the well-being of your fish. Learn more on the following pages.

Skimmers and pond vacuums: High-power suction for clean, healthy water

Observing the change of seasons around the pond is one of the nicest experiences in the garden. However, if pollen in the spring or falling leaves in the autumn impair the quality of the water, then help is required. Plant remnants make the pond surface turbid and the nutrients input into the pond in this manner allow algae to grow rapidly.

Skimmers keep the water clean by removing contaminants before they sink to the bottom of the pond. Now and again it is also necessary to vacuum the pond floor and remove floor silt. The PondoVac pond and pool vacuum has been the ideal helper for these tasks for more than 10 years.

AN ICE PREVENTER in winter ensures that there is a gap in the ice cover. This gap allows harmful fermentation gases to escape and ensures oxygen exchange. Your pond inhabitants safely get through the winter. New in the product line are the powerful ice preventers, **IceFree Thermo 200 and 330** – the solution for extreme below-freezing temperatures and shallow ponds. Read more on page 164.

SURFACE SKIMMERS

SWIMSKIM CWS

The floating skimmer powerfully cleans a pond surface of up to 50 m². Thanks to its unique outlet and aerator functions, sedimentation on the pond floor is prevented and in addition, oxygen is introduced into the pond.

AQUASKIM This stable skimmer reliably ensures clear water surfaces for ponds up to 40 m². Ideally connected on the second inlet of the AquaMax Eco Premium 4000–16000, it powerfully pulls debris particles into a collection basket that can be easily removed for cleaning.

Tip!

Useful pond helpers for relaxed work in the garden pond – pond nets, pond pliers and the new flexi tool. Additional products and information starting on page 162.

POND VACUUMS

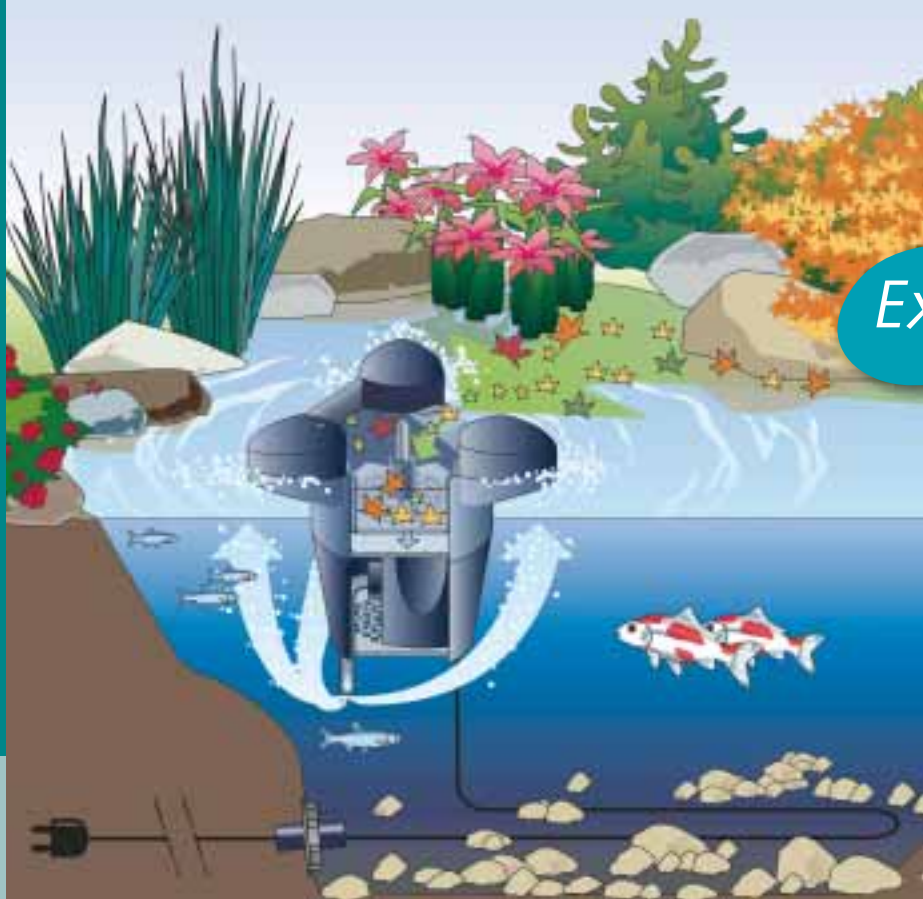

PONDOVAC CLASSIC is a perfect wet and dry vacuum for pond and household! Equipped with 4 different suction nozzles it effectively removes any type of debris, algae and silt to a maximum depth of 2 m.

POND & POOL VACUUMS

PONDOVAC 4 The convenient pond and pool vacuum is equipped with 5 suction nozzles and also with high-quality aluminium suction pipes. With rated power of 1,700 watts, it vacuums continuously at a maximum depth of 2.4 m. It is a practical helper for garden ponds, pools, and swim ponds, as well as a wet vacuum in the household.

Schematic diagram: SwimSkim 25 in use

Extras

Top 3 product characteristics

- Powerful suction cleaning of pond surfaces up to 25 m²
- Integrated aerator function for oxygen supply
- Easy and convenient cleaning

Recommendation

The SwimSkim models offer a particularly high level of cleaning convenience thanks to easy basket removal.

SWIMSKIM 25

Floating for clear water surfaces

- Powerful suction cleaning of pond surfaces up to 25 m²
- The result is clearly improved water quality and viewing depth through direct removal of pollutants on the surface
- Integrated injector that enriches the pond with oxygen
- Easy cleaning thanks to convenient basket removal
- Automatic adjustment to any water level (from 40 cm water depth)
- Extremely strong suction thanks to patented flap technology

TECHNICAL DATA

		SwimSkim CWS 25
Dimensions (L x W x H)	mm	332 x 297 x 263

Extras

Top 3 product characteristics

- Powerful suction cleaning of pond surfaces up to 50 m²
- Including unique outlet and aerator function
- Easy cleaning thanks to convenient basket removal

Recommendation

The SwimSkim CWS can be fixed in place either on the pond floor or with the provided ground stakes and tethering line.

SWIMSKIM CWS

Floating skimmer with aerator function

- Powerful suction cleaning of pond surfaces up to 50 m²
- The result is clearly improved water quality and viewing depth through direct removal of pollutants on the surface
- Including unique outlet function for agitation of floor sedimentation
- Including aerator function for oxygen supply of the pond
- Extremely powerful and energy efficient
- Automatic adjustment to any water level (from 40 cm water depth)
- Extremely strong suction thanks to patented flap technology
- Easy cleaning thanks to convenient basket removal
- Ideal supplement for the OASE filter system FiltoMatic CWS

Schematic diagram: AquaSkim in use with filter and watercourse pump AquaMax Eco Premium

Extras

Top 3 product characteristics

- Powerful suction cleaning of pond surfaces up to 40 m²
- Adapts automatically to changes in the water level to 120 mm
- Effective supplement in the entire filter system

Recommendation

The AquaSkim is the ideal supplement for the filter pump AquaMax Eco Premium.

AQUASKIM

Variable, stationary and gravity fed skimmer for every occasion

- Powerful suction cleaning of pond surfaces up to 40 m²
- The result is clearly improved water quality and viewing depth through direct removal of pollutants on the surface
- Base with large-surface receptacle for rocks as ballast
- New: AquaSkim 20 now also allows use of the AquaMax Eco Premium models 4000–8000
- New: AquaSkim Gravity with high-quality DN 160/110 adapter, allows easy integration in DN 110 line systems
- Easy maintenance with easily accessible coarse debris basket
- Debris basket can also be taken out from a distance via grip hooks

Extras

Top 3 product characteristics

- Powerful suction cleaning of pond surfaces up to 50 m²
- Excellent accessibility at the edge of the pond
- Can be perfectly integrated in the pond landscape with a rock look cover

Recommendation

For the best possible result, surface skimmers should be installed on the side of the pond that is away from the wind.

BioSys SKIMMER +

Skimmer for installation on the pond edge

- Powerful suction cleaning of pond surfaces up to 50 m²
- Permanent installation directly at the edge of the pond
- Easy installation through flanging the unit onto the pond liner
- Convenient cleaning thanks to easy removal of the coarse debris
- Compensation of water level fluctuations up to 100 mm
- For operation with optionally available AquaMax Eco in integrated pump chamber
- Included in the scope of delivery: Cover in natural rock look

Schematic diagram: ProfiSkim 100 in use

Extras

Top 3 product characteristics

- Powerful suction cleaning of pond surfaces up to 80 m²
- Can be used with large filter systems and in shallow water zones
- Perfect dimensions for large quantities of water

Recommendation

Ensure that the skimmer is installed in a precisely horizontal position and confirm this with a spirit level. Place the skimmer in such a manner that you can execute maintenance tasks, such as emptying the basket conveniently.

PROFISKIM

The pro for the shallow water zone

- Powerful suction cleaning of pond surfaces up to 65 or 80 m²
- Ideal implementation in shallow water zones
- Optimal water routing for effective suction capacity
- Perfect supplement for filter systems in the gravity-fed, as well as the pump-fed system
- For pump-fed systems the suction effect can be more clearly detected than is the case in the gravity-fed system
- Large, easy-to-clean stainless steel basket
- Incl. debris basket with 8 mm mesh width. A debris basket with 2 mm mesh width is available for the ProfiSkim Premium on request

PONDOVAC CLASSIC

Wet and dry vacuum for pond, and household

- Effective silt removal through powerful 1400 W motor
- Automatic activation and emptying through intelligent motor control
- Compact design with 27-litre wastewater tank
- High-power suction to a depth of 1.5 m
- With 4 different suction nozzles: Crevice nozzle, algae nozzle, flat nozzle with rubber lip and variable universal nozzle
- Included in the scope of delivery: 4 m suction hose and 2 m discharge hose

PRODUCT DETAILS

Accessories

With 4 suction tubes and 4 nozzles, one filter bag for dry vacuuming and a coarse debris collection sack.

Switch

Convenient, illuminated rocker switch for starting the vacuum process.

Plug connections

For fast installation of the suction and discharge hoses.

Quick-release

For easy opening of the motor unit.

Extras

Top 3 product characteristics

- Multifunction use for pond, pool, and household
- Maximum suction depth of 2 m
- Complete with extensive range of accessories

Included in the scope of delivery

Universal nozzle

The all-round talent (2 – 10 mm) reliably removes pond floor debris, without vacuuming up gravel.

Special string algae nozzle

With this nozzle, strands of string algae can be separated and very easily removed.

Flat nozzle

The flat nozzle has rubber lips that permit trouble-free wet suctioning of residual water, or enables use in the household as a dry vacuum.

Crevice nozzle

Pollutants between stones and plants can be suctioned out with ease.

Wastewater discharge

Simply dispose of it as »organic fertiliser« in a flower bed or the sewer.

Accessories

Extension discharge set PondoVac

2.5 m hose with connection union and collection bag for coarse debris particles. Not suitable for pond silt!

Item no. 55448

PONDovac 4

*Convenient and effective –
fast and effective pond cleaning*

PRO

- Vacuum non-stop thanks to the patented two-chamber system – simultaneous vacuuming and emptying of the tank
- Maximum suction depth of 2.4 m thanks to high-performance 1700 W motor with optimised blade geometry
- Can be used for cleaning garden ponds, pools and swim ponds, as well as a wet vacuum in the household
- Extensive suction depth of up to 2.4 m
- Transparent suction tube for flow-through control
- Easy to move with transport rollers and adjustable handle
- Hand regulator for adjusting the suction power
- Included in the scope of delivery: 4 robust aluminium tubes, special string algae nozzle, broadened universal nozzle, wet suction brush, brush nozzle, debris collection bag, 5 m long suction hose and 2.5 m long discharge hose

PRODUCT DETAILS

Two-chamber system

Two same-size cylinders are filled and emptied in alternating cycles. This enables non-stop vacuuming.

Hand regulator

For adjusting the suction power, for example in shallow water.

Wastewater discharge

Simply dispose of it as »organic fertiliser« in a flower bed or the sewer.

Handle, transport rollers + suction tube receptacle

Fast and convenient transport to the pond site via the adjustable and ergonomic handle.

Debris collection bag

Ideal for returning cleaned water when suctioning larger particles > 1 mm (not suitable for pond silt).

Extras

Recommendation

Regular care is important for healthy growth of pond plants. For this we recommend the new FlexiCut 2 in 1. It simultaneously cuts and firmly grasps so that plant remains can be quickly and easily removed from the pond. The adjustable head protects the pond liner from cuts and enables convenient work, even at locations that are difficult to access.

Extras

Top 3 product characteristics

- To -20°C an ice-free area is generated around the float element
- IceFree Thermo 330 contains an integrated frost monitor
- Temperature zones in the pond remain intact

Recommendation

A minimum water depth of 80 cm is recommended for reliable operation of the IceFree 20.

ICEFREE *Ensure your pond is safe this winter*

- To -20°C an ice-free area is generated around the float element
- Ensures oxygen access to the water and allows harmful fermentation gases to escape
- Extremely energy-efficient pump technology without additional heating element for the IceFree 20 (requires a depth of at least 80 cm)
- Maintains the warm temperature zones on the floor, particularly with the IceFree Thermo models
- The IceFree Thermo is also suitable for shallower ponds, as well as for continuing cold periods with freezing temperatures
- IceFree Thermo 330 contains an integrated frost monitor function. It activates the device only when there is danger of frost. This means energy is not consumed on warmer days
- Resistance heating technology for higher performance in the frost area and protection against temperature damage

Recommendation

Ensure that you have a well maintained filter system. It can save you a lot of work. More in this regard starting on page 80.

The comprehensive AquaActiv care program helps you care for your garden pond and your fish. Starting on page 166.

POND CARE – IT'S EASY

Suitable helpers for any season

Spring, summer, autumn and winter: Each season has its peculiarities, and thus the garden pond also requires appropriate care. We have put together several tips for seasonal cleaning and care to ensure enjoyment of your pond throughout the year, to ensure the well-being of the fish and that the natural balance remains intact.

Spring: Getting started! At the start of the season there are some things to do. Now it is time for water cleaning and plant care. Optimal water conditions can be easily achieved with the basic care product AquaActiv OptiPond, and you can really get the filter biology moving with the BioKick filter starters. The algae net removes bothersome pond growth, and to prevent subsequent algae growth simply suction up any silt on the pond floor, ideally with the PondoVac 4. Bring on the summer!

Summer: The motto for this season is: As little as possible and as much as necessary. Only intervene in a support capacity, in order to maintain the beauty of your garden pond for as long as possible and to prevent the body of water from spoiling. Remove undesired leaves and string algae, and cut back plants that have blossomed with the FlexiCut 2 in 1 pond scissors, so that the water quality is not impaired due to excess nutrients from the roots. In this season a surface skimmer not only ensures a good view of your fish, it also ensures better water quality. Ensure the water level is topped up, if the quantity of water is reduced due to evaporation in dry spells. Keep the filter system, as

well as watercourses run 24 hours per day. Your pond in addition will be supplied with important oxygen. And then: Enjoy the most beautiful time of year at your pond!

Autumn: In the Autumn things get serious: Use of effective pond helpers is now required. Remove silt and other sediments (e.g. with the PondoVac 4) and remove the plant remains. Now strengthen the fish for the winter with QuickFit and cover the garden pond with the AquaNet pond net; the net prevents leaves from blowing into the pond, sinking to the bottom, and prevents excessive nutrient input from impairing the water quality.

Winter: Naturally winter is the quietest time of year. This also applies for the pond and its care. Nevertheless, you should prepare the garden pond and its inhabitants for colder temperatures and frost. The fish in the pond need a depth of at least one metre, so that there is sufficient space for settlement and warmer zones in spite of the layer of ice. Always ensure that there is a small hole in the ice cover, so that pond inhabitants can breathe and fermentation gases can escape. A practical ice preventer from the IceFree series (page 164) helps in this regard. Using PhosLess inserts during the winter removes excess phosphates and thus prevents algae growth in the new season. Also remember to make the entire filter system winter-proof in accordance with the recommendations – this ensures that your garden pond and its inhabitants are prepared for the cold season.

AquaActiv: Clear living water

The sensitive pond biology is frequently burdened by excessive fish stock, rainfall and too much sunlight or leaves. The consequences are poor water quality, excessive algae and silt formation or even fish disease.

AquaActiv is an effective treatment against these factors and restores the biological balance in the pond. You help your pond to help itself.

The entire concept of the successful pond care series has been optimised, extended and logically coordinated. Innovative products, developed based on our years of experience, and with support from recognised experts, have been added.

The AquaActiv **3-Step Plan** shows you the biologically effective path to an algae-free

AquaActiv	January	February	March	April	May	June	July	August	September	October	November	December	Page

* Use algacides safely! Always read the label and product information before use!

Tip!

Your direct path to ideal water values:

If you want to know precisely what the status of the water quality is in your pond, with the new OASE online laboratory you get the analysis of individual parameters, and best of all – you also get helpful tips and recommendations:

www.oase-livingwater.com/onlinelabor

pond and allocates the AquaActiv products to steps A, B, or C. In this plan the two first steps ensure decomposition of the excess nutrients, step C contains algacides that you can subsequently use if steps A and B are not successful.

Improving water quality

Binding nutrients

Controlling algae

Clear division of the products facilitates the selection. In addition there is extra talent behind the clever bottle concept; the supplemental container has three functions:

1. Measuring cup
2. Storage space for useful accessories that come with the product, such as test strips or instructions for use
3. Storage compartment for 2-component products, such as »BioKick Fresh«.

Tip!

Your direct path to ideal water values:

WATER ANALYSIS

For safe monitoring of water values

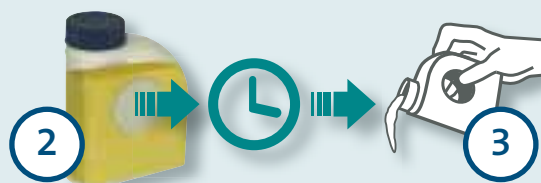

AquaActiv	QuickStick 6 in 1	Water analysis Pro set
Description	<ul style="list-style-type: none"> For fast, simple, and reliable water analysis of the 6 most important values One minute is all it takes Suitable for testing approximately 50 water samples (300 parameters) 	<ul style="list-style-type: none"> Professional drop solutions for precise determinations of all important pond parameters Phosphate test incl. shelf life check solution Incl. measurement accessories, colour charts, and useful application instructions Delivered in a modern plastic case
Simple and accurate determination of:		
pH value	•	•
Total hardness (GH)	•	•
Carbonate hardness (CH)	•	•
Nitrite (NO ₂)	•	•
Nitrate (NO ₃)	•	•
Phosphate (PO ₄)	–	•
Ammonium (NH ₄)	–	•
Ammonia (NH ₃)	–	•
Chlorine (CL ₂)	•	–
Item no.	50570	50571

Extras

Activation »BioKick fresh«

1. For activation add the preserved dry cultures to the nutrient solution.
2. The solution turns yellow and indicates the correct mixture.
3. After 20 minutes the microorganisms are active and can be added in the filter or pond.

STARTER CULTURES

For use in filter and pond

AquaActiv					
	BioKick CWS			BioKick fresh	BioKick Premium
	Starter bacteria				High-performance bacteria for pond filters
Container size	100 ml	200 ml	2 l	500 ml	4 x 20 ml
Suitable for ponds up to max. m³	5.0	10.0	100.0	10.0	40.0
Description	<p>Like BioKick CWS, however:</p> <ul style="list-style-type: none"> • Wakes up the biology in the filter in the spring or for a new start • Detoxification of nitrite, ammonium, and ammonia starts immediately • Well-suited for post-dosing if some of the water is changed or when cleaning the filter • Follow-up dose is not required • Easy application • Free of pathogens • More than 10 million active microorganisms/ml* • Ideal for near natural garden ponds • Full capacity of the pond filter within a few weeks 			<p>Like BioKick CWS, however:</p> <ul style="list-style-type: none"> • Combination of dry culture and nutrient solution • Contents: 450 ml nutrient solution + 50 ml bacteria concentrate • Long lasting and highly active • Now ready to start after 20 minutes through significantly increased number of bacteria • Ideal for activating filter systems, particularly if there is fishstock • More than 1.000 million active microorganisms/ml* • Ideal for ponds with moderate fish stock • Decomposition capacities in the filter within 2 weeks

New in the product range: Category D – Disinfection

In many gardens, water has become a regular trend in many peoples design. The categories extend from small ornamental fountains to large architectural pools. However the typical formation of bio-film, build up of odours, micro-organisms or algae growth on surfaces quickly develops and for most garden owners, becomes an irritation; certainly for modern garden design in particular, clear pools are the main focus. The Category D products ensure a body of water that is as sterile as possible – note, however, that disinfection that occurs is prohibited for use in fish ponds or wildlife ponds. Correctly dosed they keep all other bodies of water, such as swim ponds, architectural ponds or ornamental fountains sustainably clear and fresh.

Disinfection

AquaActiv				
	NEW AlGo Fountain Ornamental fountain clarifier		NEW OxyPool 9.9 % Cleaner for larger ponds and swim ponds	
Container size	500 ml		25 l	
Suitable for ponds up to max.	m ³ 0.2		100	
Description	<ul style="list-style-type: none"> • Fast help against algae and odours in ornamental fountains, decorative pools and water features • Keeps the water fresh and clear • Also effective against slimy bio-film formation • Prevents calcium deposits • Compatible with surfaces and technology • Protects against bacteria and fungus • Long-lasting effect • Not suitable for ponds with animals or plants <ul style="list-style-type: none"> • Use biocides safely! • Always read the label and product information before use! 		<ul style="list-style-type: none"> • Efficient water cleaner with the active ingredient hydrogen peroxide 9.9 % and silver ions • Eliminates algae and acts against bacteria and fungus • Suitable for ornamental ponds, swim ponds, spray fountains and water features • Leaves, silt, algae and calcium deposits are floated to the surface and can be removed • Up to 100 % biologically degradable, without chlorine and alcohol additives • Colourless and odourless • Product is marked »harmful to health«! <ul style="list-style-type: none"> • Use biocides safely! • Always read the label and product information before use!

Fish medicine*: For healthy fish.

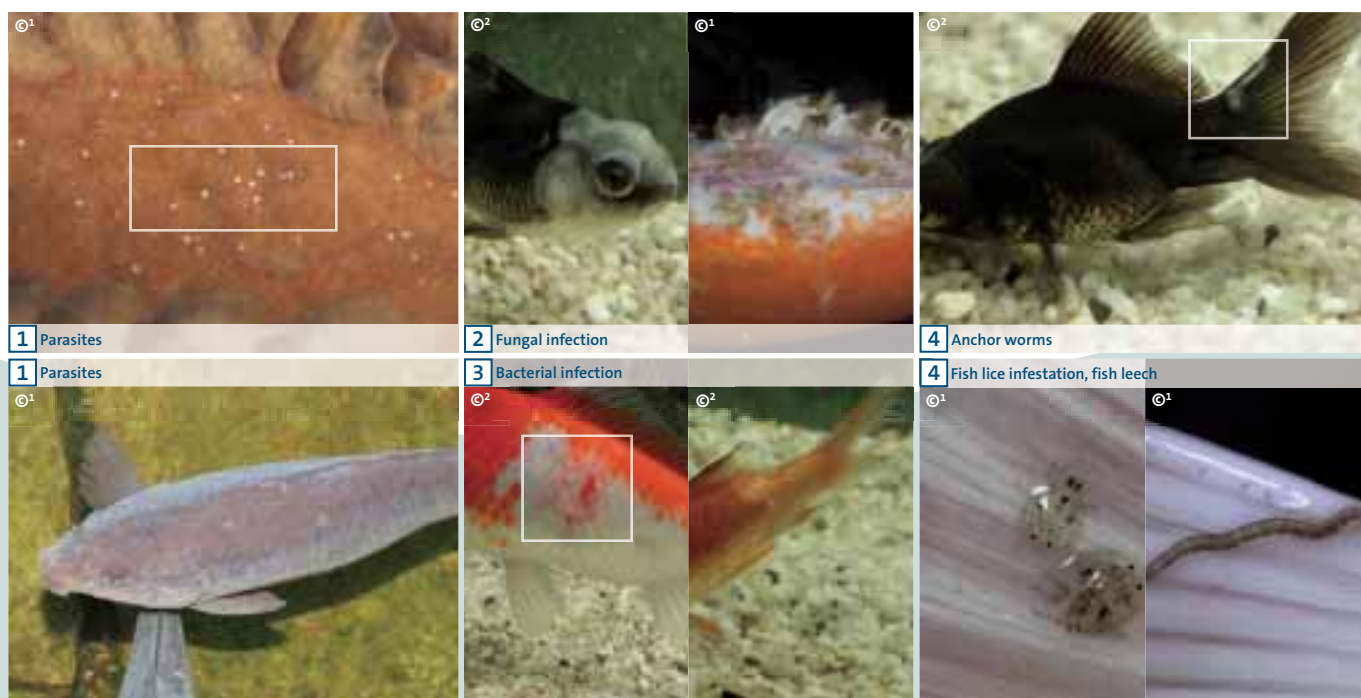

With the OASE fish medicine you support the recovery of your pond inhabitants if there is disease or new stock in the water. Competent, reliable and highly-effective; the products ensure the health and well-being of your fish. We have developed these special products in close collaboration with the company,

Aquarium Münster, esteemed for more than 80 years of experience in the keeping and medical treatment of ornamental fish. Diseases such as parasite infestations, fungal or worm infestations or sometimes mixed infections can be treated with these products.

ILLUMINATION & POWER: FASCINATING LIGHT AND ENERGY EFFICIENCY COMBINED

Every garden owner looks forward to the quiet evening hours as they enjoy relaxing outside alone or with friends. The flexible, economical lighting sets from OASE provide atmosphere.

Bring the late hours to life with a variety of possibilities from OASE. With well placed

flood lights or spotlights, such as the OASE LunAqua series, trees and shrubbery can be highlighted and the water world can be made luminous. For example, the LunAqua Terra LED light can be fitted flush to the ground; there is no tripping hazard. Thanks to its small dimensions, modern

*»My pond becomes
a luminous haven
of tranquillity«*

**Easy installation
as a complete set!**

LED technology offers flexible design and setup possibilities on terraces, paths, in and around the pond, as well as high energy efficiency and safe 12 V technology. Flexible InScenio power management ensures reliable power supply, both for illumination and for the entire pond technology.

Operating the technology via remote control is comfortable and convenient. And where mains power is not available OASE has suitable products for your haven of tranquillity with its solar product line.

Pond illumination: Radiantly beautiful

When the colours of trees and plants fade into the background in the evening, it is light that can enchant. OASE provides garden owners with a variety of possibilities to lend the residential garden a special charm. Special effects are produced when shrubs or grasses obstruct the light beam and ensure exciting shadows. Skilfully illuminated,

figures and ornaments ensure a mystic atmosphere. Bubbling stone fountains, for example, can be easily transformed into highlights through the LED illumination of the LunaLed S series. Even watercourses are radiant with a new light, with the aid of our LunAqua Maxi LEDs.

The **LUNAQUA TERRA LED** that is recessed into the ground for illuminated paths, driveways or gardens ensures warm and pleasant light.

POND ILLUMINATION

WATER AND LIGHT SKILFULLY COMBINED

WATERFALL ILLUMINATION 30, 60 AND 90 The new waterfall lighting with elegant warm-white LED light provides light accents in our waterfall range. Thanks to the inconspicuous silver-grey plastic holders, the OASE waterfalls in widths 30, 60, and 90 cm, as well as the two standing Waterfall Set 30 and Waterfall Set 60, can be easily retrofitted with light.

ABOVE WATER AND UNDERWATER

LUNAQUA CLASSIC LED The all-rounder among garden lights: Robust and equipped with a 1 W multiple LED in warm-white, the LunAqua Classic LED ensures flexible implementation in and on the pond with a broad beam angle. The light can be quickly and easily aligned thanks to adjustable base. In a star circuit, each light with a 5 m rubber cable, can be easily integrated in every garden scene – all in all an optimal price/performance ratio!

HIGH-QUALITY SET

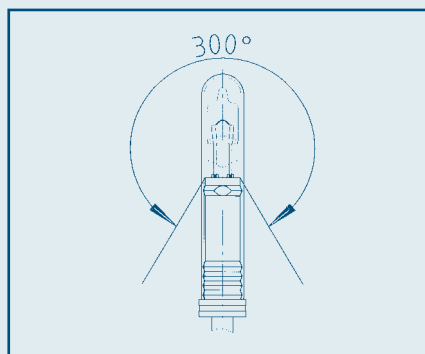

LUNAQUA MINI LED LED light fixtures that can be ideally integrated in any garden scene. The spotlights can be moved to get the best possible position. They are available in the colour tones of cold white and warm white. Placed in series, each with 1.5 m cable, they are the eye-catchers in every garden – not least thanks to the high-quality stainless steel trim.

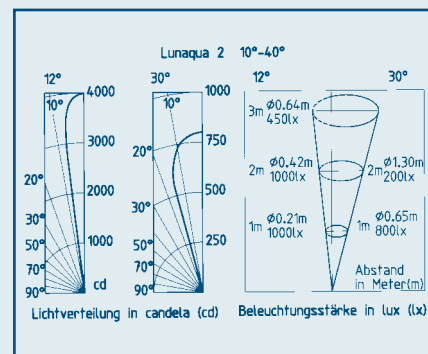

STAINLESS STEEL DESIGN

LUNAQUA MAXI LED Appealing design and maximum functionality: With the LunAqua Maxi LED there is nothing more to be desired in a light. The warm-white power LED with interchangeable lens offers multifunctional implementation as pond light fixture, wall light fixture or as an in-ground light fixture, e.g. in a gravel bed. One spotlight per set can be retrofitted. – for maximum flexibility.

Schematic diagram: Halogen spotlights / LED spotlight systems in use

LUNAQUA 10 SYSTEM

Powerful & flexible: The spotlight system for every implementation site

LunAqua 10 Halogen

LunAqua 10 LED/01

- Optimally matched lighting system
- Robust connection technology with many implementation possibilities
- Seamlessly compatible with the existing LunAqua 10 connection technology
- Easy installation via a connecting cable with convenient special connections

LunAqua 10 Halogen

- Available as spotlight without bulbs, cable and transformer (available as an accessory)
- Pivot range approximately 180° thanks to the integrated mounting bracket

LunAqua 10 LED/01

- Thermal protection function: Luminous intensity is reduced automatically if the ambient temperature is too high
- Incl. illuminant (not dimmable)
- Additional illuminant available as a spare part, easy replacement
- Illumination range to 12 m

Underwater transformer UST 150/01

- Connection possibility for up to 4 spotlights: 4 x 35 W, 3 x 50 W, 2 x 75 W halogen or 4 x 10 W LED spotlight
- With the PowerBox 12 V, up to 12 LunAqua 10 LED/01 spotlights can be connected (8 spotlights in series on one plug-in position)

LunAqua 10 spotlight

This spotlight offers versatile implementation, whether as illumination for floating fountains or as a flexible light system for every garden.

Underwater transformer

Simple and safe – this connection technology is unrivalled.

Connecting cable

This robust rubber cable is available in three lengths. Longer connecting cables with larger cable cross-sections are in our commercial catalogue.

LunAqua 35 Set

Halogen spotlight including 35 W bulb, transformer and 7.5 m cable.

Extras

Top 3 product characteristics

- Powerful light system
- Spotlight and transformer suitable for underwater setup
- Flexible extension

Recommendation

With the OASE PowerBox 12 V up to 12 LunAqua 10 LED spotlights can be connected on one UST 150/01 (up to 8 units in one series).

LED SYSTEMS FROM OASE

The world's first IP 68 underwater connection technology with 2 year guarantee^G*

At last, no more unsafe wiring and connecting of light fixtures: The IP 68 connection technology from OASE sustainably ensures safety and it is particularly easy to install.

With the worldwide unique IP 68 connection technology, connection and operation of light fixtures underwater is now particularly safe.

All connecting cables, transformers and power units of this series guarantee all-round water-tightness to a depth of 4 m! An axial flat seal with integrated capillary barrier in the plug connectors of the connecting cable and the associated boxes (PowerBox and DMX box) make it possible. OASE even provides a guarantee*^G of 2 years.

Through this innovative technology the entire system is perfectly matched and can be put together to suit individual requirements:

Simply select from among the extensive OASE assortment of pumps, LED illumination, Jumping Jets, as well as connecting cables and PowerBoxes.

Tips & tricks:

- Our LunAqua 10 LED or ProfiLux LED offer power savings of up to 80 % compared with the halogen variants.
- If the LED illuminant should actually fail, it can be easily replaced by plug connection.
- The cable cross section of the connecting cable that must be used is 2.5 mm² and the maximum cable length should not exceed 60 m for each line overall.

Extras

PowerBox 12 V

With the PowerBox up to 12 LunAqua 10 LED spotlights can be connected on one UST 150/01 (up to 8 units in one series).

Dimensions: 75 x 80 x 95

Rated voltage: 12 V

Number of outlets: 2

Item no. 50492

Extras

Top 3 product characteristics

- Pleasant warm light out of the ground for perfect evening atmosphere
- Individual installation possibilities:
In the garden above the water and underwater
- Easy installation

Recommendation

Whether on the terrace, in the swim pond or in the pavement – the LunAqua Terra LED is suitable for various implementation areas in the garden or in driveways. Installation is incredibly easy: Cable ducts, insert the bulb in the 40 mm bore – the romantic evening atmosphere is provided!

Application examples: The right choice underwater and above the water: LunAqua Terra LED

LUNAQUA TERRA LED

Warm light recessed in the ground – as complete install set

- Warm white LED light fixture, extremely energy efficient and long lasting
- Crafted in polished, high-quality stainless steel material
- Installation is particularly easy thanks to stainless steel clip for fastening in the 40 mm bore opening
- Robust PUR rubber cables
- IP 68 for continuous safe operation underwater and above the water (IP44 connection)
- Load bearing capacity for pedestrian and vehicular traffic up to 3 t
- 10 m extension cable available as an accessory and suitable for bulb and 6x connector (max. 2 x per strand)

The waterfall illumination emphasises the contours of the water pattern and ensures atmospheric lighting

WATERFALL ILLUMINATION

*LED waterfall lighting –
for stylish light accents in the evening*

NEW

- LED for waterfalls, for terrace pond edge decoration, in widths 30, 60 and 90 cm
- Easy to retrofit thanks to innovative plastic carriage
- Pleasant warm-white light colour
- High-quality, stainless steel enclosure
- Incl. robust 10 m rubber cable and cord transformer

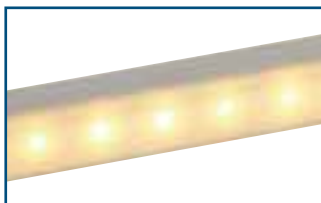

Available from March 2013

PRODUCT DETAILS

Plastic carriage

The innovative plastic carriage in discrete grey enables easy retrofit of the waterfall lighting at any time.

LED

The warm-white, slim line LEDs ensure pleasant lighting.

Attractive water pattern

The light rail is placed at an optimal height in the waterfall and supports a harmonious water pattern.

- Easy to retrofit waterfall lighting
- Pleasant warm-white light colour
- It is also ideal as terrace or pond edge lighting

Recommendation

Combine Waterfall Illumination with Waterfall 30, 60 and 90 (see page 16) or with the stands, Waterfall Set 30 or Waterfall Set 60 Solo (see page 17).

Waterfall 30, 60 and 90

Waterfall Set 30

Waterfall Set 60 Solo

Set focussed accents at the edge of the pond or on the terrace, as well as between cobblestones, or for framing a wooden terrace.

Extras

Application examples: LunaLed 6 s/9 s

Top 3 product characteristics

- High-quality stainless steel cap
- Easy installation through hose connectors, ideal for bubbling stones
- Adjustable fountain height

Recommendation

Be creative – combine multiple LunaLeds using the OASE multiple distributor (page 212) and design your individual fountain.

LUNALED

Innovative illumination with modern LED technology

- Each has 6 or 9 neutral-white LEDs
- Suitable for use underwater and above the water
- Suitable for permanent underwater use (protection class IP 68)
- High-quality stainless steel cap, with which the water flow rate can be regulated
- Diameter 30 mm or 50 mm
- Half peak angle of the LED: 30°
- Incl. low-volt plug transformer
- Easy installation via the innovative hose connector

LunAqua Maxi LED Set 1

LunAqua Maxi LED Set 3

Reliable power management: Offering you the best power supply, always and anywhere!

The technology in the pond, such as pumps, filters, and UVC clarifiers, as well as the illumination in the garden would be impossible without the appropriate power supply. OASE InScenio power management offers the possibility of connecting up to four devices simultaneously. These devices are controlled via remote control with total comfort and convenience – even at distances of up to 80 m. With the splash guard protecting the power outlets, functionality and safety

are guaranteed in any wind and weather. Those who prefer to relax in nature or the allotment garden where they must get by without mains power can rely 100 % on the OASE solar products. The heart of the system is a solar module that converts solar energy into usable power. Thanks to a storage module, power supply to the matching fountain pump and light fixture is available even when the sky is overcast.

POWER MANAGEMENT & SOLAR COMPONENTS

The **INSCENIO FM-MASTER 3** is a small multi-talent. Of its 4 connectible power outlets not only are 2 switchable by remote control, but an additional power outlet is also dimmable, for connection of a fountain pump, for example.

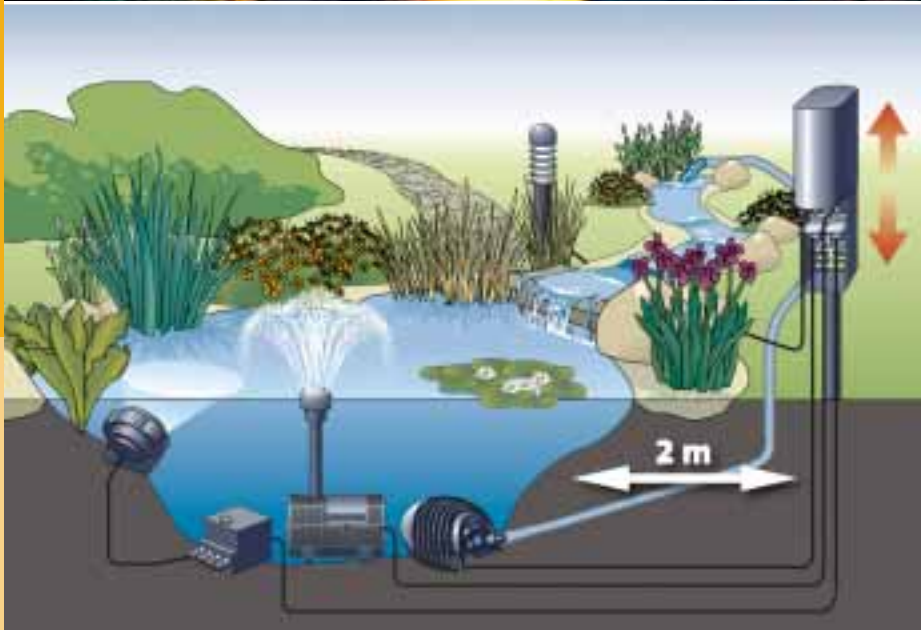

The **SOLARSAFE 41** as storage and control unit promises reliable power supply of the other solar devices, even in bad weather.

Tip!

The InScenio Rock sand cover in a near-natural rock design fits naturally in the garden and serves as a splash guard thanks the weather-resistant and robust material. Additional information is provided on page 222.

Schematic diagram: Connection possibilities with the OASE InScenio garden outlets

INSCENIO

Flexible & decorative power management

Cover in sandstone-effect

InScenio Rock cover in stone décor elegantly conceals the technical unit. (optional accessory)

Splash guard

For your safety the InScenio cover protects the electronic components from splashing water.

Main module

Example – InScenio FM-Master 3 offers four power outlets of which two can be switched on and off. One input offers permanent power and one a dim function.

Remote control

From a range of up to 80 metres all functions can be easily and conveniently activated.

- Clever power connection system for the complete garden
- Extremely easy and flexible installation, no digging whatsoever
- Retroactive extension is possible at any time
- Year-round use thanks to splash-proof and strain-relieved power outlets
- Ground stake guarantees secure anchoring in the ground

From InScenio FM-Master 1

- Remote control range of the FM-Master to max. 80 m if there is no transmission interference

PRODUCT DETAILS

Strain relief

Strain-relieved outlets are specially protected against mechanical stress and perfect for safe, year-round use.

Splash guard

To be on the safe side: The InScenio cover protects the electronic parts from splashing water. In addition, with the optional InScenio Rock cover the InScenio can be ideally integrated in the garden world.

Ground stake

The ground stake for easy installation without digging and secure anchoring in the ground, is included in the scope of delivery.

Remote control

The remote control unit of the FM Master included in the scope of delivery, and of the FM-ProfiMaster, has a range of up to 80 m, (if there is no transmission interference).

Extras

Top 3 product characteristics

- Flexible modular system
- Easy installation, can also be retroactively extended
- Protective cover protects against splashing water and mechanical stress

Accessories

InScenio Rock
Cover in rock-effect suitable for all InScenio FM-Master housings.

Schematic diagram: Interaction of the different solar components

SOLAR COMPONENTS

Use new energies – and not only for the good of the environment

Extras

Top 3 product characteristics

- Holistic solar system with matched components
- Easy installation thanks to convenient plug connection
- Off-grid power supply for incredible flexibility

Recommendation

With a full battery the SolarSafe 41 enables solar operation of the Aquarius Solar 700/1500 for up to 17 hours or 8 hours, even without sunlight. The devices can then be used day and night, and even in poor weather conditions.

- The solution is as elegant as it is simple for allotment gardens and other locations without a power supply
- High-quality optimally matched components: Solar cell, storage and control unit, fountain pump and illumination
- Extremely robust and convenient plug connections for all components ensure safe and fast installation
- The items operate even in poor light conditions thanks to the SolarSafe electronically regulated storage and control unit (optional)

SOLARMODULE 35 *Solar cell for power generation*

- Extremely high efficiency levels
- Compact dimensions, high impact resistance and break resistance, long service life and convincing aesthetics
- With stand, 10 m power cable and special plugs for connecting to the other OASE solar devices

POND CONSTRUCTION MATERIAL: HIGH-QUALITY FOR LONG-LASTING ENJOYMENT OF THE POND

With the extensive pond construction product range, construction of your pond is surprisingly easy. The well-designed program makes OASE the perfect pond partner.

Any type of pond is a genuine natural experience and lends the garden a very special, individual highlight. Starting with the smallest pools to larger liner ponds

with fish, to large swim ponds – for every pond OASE has the ideal construction concept with the right material at hand. The advantage of a preformed pond is the easy installation with integrated plant zones, for different pond sizes and shapes the first-class and flexible OASE pond liners AlfaFol PVC, and OaseFol EPDM are well

*»Pond construction
can be so easy!«*

**A reliable liner
assortment for
construction of
your pond!**

suited. The previously cut-to-size PVC liner sections with which you can find the right size of pond liner are very convenient. You can rely on the high-quality, tested and long lasting quality of our pond liners – with a guarantee*^G of up to 20 years! The pond liners are supplemented with an extensive, well thought-out, optimised line of fleece

and accessories. All connections for filter and power fit perfectly together and can be inconspicuously integrated in the garden. With additional information material and building instructions available as film and brochure, you can rely on OASE as your pond construction partner!

Pond planning & implementation: Plan correctly, right from the start

To make your garden dream a reality it needs to start with proper planning. You must take size, position and condition of the garden or the terrace into account. A few ground rules must be complied with to ensure long-term enjoyment of your very own garden pond!

Important prerequisites

Pond type: Garden ponds with fish should be constructed close to the terrace or patio for observation. If you prefer a natural pond to encourage wildlife, then use the space in your garden to your advantage. Design-orientated fountains and architectural ponds can be effectively integrated into the design of any garden.

Sunlight exposure: Four to six hours of direct sunlight per day are ideal for a pond. Extended deep water zones help prevent excessive warming of the water and algae formation in areas exposed to a lot of sunlight.

Trees and shrubbery: Deciduous trees and conifers, as well as plants that develop strong roots, should be far enough away from the pond. Root barriers offer containment possibilities for plants, such as bamboo, that develop strong, penetrating roots.

Minimum water depth: In winter to prevent the pond from completely freezing solid, OASE recommends a minimum water depth of 80 cm.

There are virtually no limits to the design possibilities of a liner pond. Before laying out the liner, a protective fleece that protects the liner from damage due to roots and small stones should always be used. Pond liner is best laid out on sunny days in warmer temperatures. Alternatively preformed ponds can be used for pond construction. The OASE Stonecor preformed ponds with natural look are easy to install.

Basic garden pond equipment includes:

- **Pond liner** (page 204) or **preformed pond** (starting on page 216)
- **Pond fleece** (page 204) to protect the pond liner
- **Pump** for operating a filter, a fountain or a watercourse (starting on page 40)
- **Filter** for biological-mechanical cleaning (starting on page 80)
- **Skimmer** for surface cleaning (starting on page 150)
- **Pond aeration** to supply the pond with oxygen (starting on page 138)

Extras

Power and water connections: Proximity of the pond to power and water connections can facilitate operation and control of the devices in and on the pond.

Hose diameter: When selecting hoses select a diameter that is as large as possible to avoid excessive friction losses.

The right pond technology: In addition to selecting the right combination of pump, filter, and UVC clarifier, the position of the pump in the pond also plays a role: A filter pump should be placed as deep as possible so that it can displace pond floor sediment. Fountain pumps are positioned closer to the surface for reduced maintenance.

Step-by-step instructions for pond construction are on the next page.

Recommendation

For selecting the right fountain pump the following applies:
Maximum fountain height = minimum distance to the nearest edge of the pond!

To feed a higher-elevated watercourse the OASE pressure filters BioPress (page 92) and FiltoClear (page 94), as well as the matching AquaMax (from page 66) filter pump are suitable!

Rule of thumb for determining the right pump for a watercourse:

Watercourse width (cm) \times 1.5 = pump capacity in l/min.

FiltoClear Sets
Pressure filter sets for supplying higher elevated watercourses. (Page 96)

EASY POND CONSTRUCTION

Step-by-step with products from OASE

1. Location

The right location for the garden pond should be half in shade; 4 – 6 hours of sun a day are ideal.

2. Pond contours

First mark out the pond contours with sand. The different deep zones should also be marked with sand.

3. Determine the dimensions of liner and fleece

Then use a cord to measure the necessary length of the fleece and the pond liner.

7. Planting on steep areas

Steeper sections are planted using marginal plant holders. Use large rocks to first weight the plant holders so that you can insert the plants.

8. Pond technology

Carefully read the instructions for installing the OASE pond technology (pumps, filters, lights) and follow these instructions precisely.

9. Gravel and water

After the gravel, at last it is time to put water in the pond: First fill the pond half-way full; completely fill the pond only after the liner has settled in place.

1

DEEP WATER ZONE

This is where the filter and watercourse pumps or possibly pond drains are placed.

2

MARSH ZONE

Offers space for plants and micro organisms and makes an important contribution to nutrient reduction in the pond. It is approx. 30 – 40 cm deep and should be laid out as wide as possible.

3

MOIST ZONE

Ideal for lush embankment plants.

4

WATERCOURSES (OPTIONAL)

When selecting the location for the watercourse, pay attention to damming stages, damming depths, as well as the overflows that are as large as possible so that additional movement and oxygen comes into the pond.

Extras**Recommendation**

The movement of water through watercourses and waterfalls supplies the pond with necessary oxygen.

The topsoil you removed for the garden pond can be used to create a watercourse or waterfall.

Slopes for a watercourse should not be steeper than 40 %.

**4. Fleece**

After excavation, first clad the hole with fleece, to protect against root and rock penetration.

**5. Liner and stone liner**

Then carefully lay out the liner. Stone liner is particularly well suited for a natural-looking edge area.

**6. Planting on level areas**

Coconut mats are laid out for planting level areas. They provide an optimal opportunity for plants to take root.

**10. Edge area décor**

The final step is to fill the edge area with rock (pebbles or similar) and landscape it as you desire.

**11. Lighting**

For atmospheric ambiance in the evening hours we recommend considering the appropriate lighting from the outset.

**That's it!**

The result deserves to be seen: Living water landscapes with pond construction materials from OASE.

Extras

Liner information

PVC liner

- PVC liner is manufactured from plastic and can be welded or bonded.
- It is characterised by an outstanding price/performance ratio; minor damage, e.g. due to garden tools can be quickly and easily repaired.
- Temperatures above 10 Celsius are ideal for installation.
- PVC liner is suitable for all pond types, small reservoirs and rainwater retention basins.
- We recommend protecting the pond liner from rocks and roots through a pond fleece.
- We provide a 15-year guarantee*^G on our AlfaFol PVC pond liner.

EPDM liner

- Consists of a synthetic rubber material and is environmentally friendly.
- It is flexible, ductile, and easy to process. EPDM liner is UV-resistant and ozone-resistant.
- OaseFol EPDM is available in the standard thickness of 1.00 mm, as well as in thicknesses 1.14 mm or 1.52 mm (in container loads).
- EPDM is suitable for all pond types, small reservoirs and rainwater retention basins. We recommend protecting the liner from rocks and roots through a pond fleece.
- We provide a 20-year guarantee*^G on our OASEFol EPDM pond liner.

Calculation aid

*How much liner is required for a pond?
There are two formulas for calculating liner requirements:*

*Length + 2 x depth (at the deepest point of the excavation) +
2 x 50 cm = length of the liner*

*Width + 2 x depth (at the deepest point of the excavation) +
2 x 50 cm = width of the liner*

Recommendation

The pond liner can be damaged by strong root development, such as occurs with bamboo. Consequently ensure that strong rooting plants are always planted in the pond with root protection liner and root barrier. We recommend coordinating your planting ideas with your plant supplier beforehand.

FLEECE & LINER

Liner types and areas of implementation

Choosing Pond Liner

Constructing a pond with liner offers an infinite variety of design possibilities. The larger the pond or the more stress to which the pond is subjected, the thicker the liner should be. Single liner strips from the roll can be quickly and easily connected together with the appropriate OASE accessory (see page 203).

They are available in different versions:

Pond liner

- **OASEFol** rubber liner offers particular stretch capacity, it is particularly robust, flexible to lay out, and easy to work with.
- **AlfaFol** is a single-ply PVC liner; it is available in two thicknesses and colours.

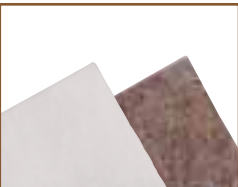

Swim pond liners

- **SwimFol** is extremely tough and ideally suited for implementation in swim ponds.

Decorative liner

- **Stone liner** is a robust decorative liner with fleece coating that can be quickly and easily applied to the pond liner with PVC liner adhesive or UniFix+.

Extras

Top 3 product characteristics

- Natural design of well-known lakes
- Extremely robust, long service life
- Easy installation with preformed pond zones

Recommendation

Plants in and on the pond not only look nice, but they also offer their own contribution to maintaining the biological balance. Speak with your OASE dealer about optimal planting.

PREFORMED PONDS STONECOR

Easy to mistake for nature

- Incomparable material: Durable, abrasion resistant, impact resistant, as well as weather-resistant; made of linear high-pressure polyethylene LLD-PE
- Grained surface offers ideal conditions for settlement of pond biology
- Perfectly matches nature in form and material
- Unique design – topographically based on the most beautiful lakes in the world
- High inherent stability
- Uniform density of material in the entire preformed pond
- Frost-proof
- Environmentally friendly
- 100 % recyclable
- 15 year guarantee*^G

Our Stonecor® preformed ponds offer a lot of living space for a wide variety of plant life with their pronounced deep zones – planting is easy with this table.

INSTALL IT YOURSELF

Easy step-by-step!

1. Location
The ideal pond location is away from deciduous trees and conifers and enjoys approximately 4 – 6 hours of sunlight daily.

2. Tools
For installation you require: Spade, shovel, filler sand, level, yardstick, and a garden hose with water connection.

3. Marking
First, position the preformed pond in the desired location, then mark the contours with sand.

7. Fill-in
Adjust the different depths with filler sand until the finished excavation looks like this.

8. Levelling
The preformed pond is inserted and levelled out in length and width. Then fill with water to approximately 1/3 of the total volume.

9. Backfilling
All around the perimeter wet sand is backfilled under the edge of the preformed pond to fill any cavities.

Extras

Tips for correct watercourse calculation

- Use the pump performance curve to identify the required pump capacity (page 228). To deliver the desired water quantity from the pump to the source of the watercourse, minimum hose diameters are required, e.g. to 20 l/min = 1" or from 50 l/min 1 ½", etc.
- In addition, it is important for the watercourse to pay attention to the pressure loss of the water supply line. Generally this is considered with 0.4 mWc.

Here is a rule of thumb for determining the right pump for a watercourse:

Width of watercourse in cm x 1.5 l/min. = capacity l/min.

WATERCOURSE ELEMENTS

The classics for custom watercourses

- Near-natural elements fit perfectly in the environment
- 3 different elements for individual routes of the watercourse
- Long service life, robust GRP material

CLEAR WATER GUARANTEE

*C

Clear Water Guarantee conditions from OASE:

OASE guarantees clear water in the pond to all purchasers of an OASE filter system designated with the “*C” suffix, based on proper system use in accordance with the selection table, if the system is set up properly in accordance with the set up instructions/and in compliance with the instructions in the operating manual, and in compliance with the achievement of clear water through the addition of OASE Filter Starter bacteria as defined in the instructions.

Clear water means that fish, plants, or rocks on the pond floor are recognizable to a pond depth of 1 m below the pond surface. Ponds with string algae are not considered to be unclear, as scarcely any suspended substances are formed. Pond water is not tap water. Turbidity and colouration are always present and are also natural, and these conditions exclude a guarantee case.

The Clear Water Guarantee is granted exclusively for ponds in the conventional sense of the term. A pond is an artificially created body of water made of liner or a preformed pond, with minimum planting of 1/3 of the water surface and is exposed to sunlight for 4 to 6 hours a day. The location of the pond is 4 m away from deciduous trees and/or conifers.

For the first use and every new use in the spring, the application of OASE filter starter bacteria is prerequisite. It can take up to 6 weeks until the pond is clear, depending on the burden of the pond. The filter works mechanically and biologically. Settlement of microorganisms is required for biological cleaning. Consequently the clear water guarantee assumes that the pump, and thus the filter system, is in 24 hour operation during the pond season (approximately from March to September). Too much cleaning prevents adequate formation of microorganisms in the filter foam. If not cleaned regularly enough the filter foams cannot absorb any more pollutants. Only if the flow rate is significantly reduced.

The guarantee applies for the period of unlimited operational use in accordance with the provisions of the OASE use instructions, which however is a maximum of 3 years from the date of purchase from the OASE stockist (first purchase, not resale of the new product). A directory of OASE stockists is available at www.oase-livingwater.com.

The Clear Water Guarantee is obtained by registering with OASE within 3 months from the initial purchase date. Registration is executed by sending the registration card to OASE together with a copy of the purchase receipt (date/stockist name) or alternatively via the Internet (www.livingwater.com).

Prior to submitting a guarantee claim the customer is obligated to report the deficiencies determined on the OASE Service Hotline (see below). After logging the fault, OASE will provide assistance for correction of the fault. If help cannot be provided on-site or if the help does not bring the desired success, the customer must then inform the Hotline specified above of this situation. If OASE cannot suggest any other remedy possibility that should be particularly attempted, the customer has a claim for processing of the guarantee through the stockist, if in all other aspects the stockist affirms/determines that prerequisites of the guarantee are satisfied. Otherwise the stockist has a last opportunity to attempt to implement the consulting. In the case of a guarantee claim the stockist refunds the purchase price to the customer, against submission of the original purchase receipt, if OASE has previously accepted the guarantee claim. More extensive claims arising from the Clear Water Guarantee do not exist.

The legal guarantee rights of the purchaser remain unaffected through the Clear Water Guarantee.

The guarantee is invalidated if the installation instructions in the operating instructions are not complied with, and/or in the case of wrong system selection or if pond care products from other manufacturers are used, particularly if pond care products containing copper are used or if the customer's behaviour otherwise is in violation of the customer's obligations.

Other frequent causes for unclear water

- Failure to replace parts subject to wear, e. g. UVC bulbs or filter foams
- The height difference between the water surface and the highest point in the pressure system is greater than 1 m (assumed value in the OASE selection tables)
- Pressure losses due to excessive hose lengths or a hose diameter that is too narrow
- Missing inlet barrier (capillary barrier). Surface water flushes mud and/or fertiliser (nitrogen, lawn fertiliser etc.) into the pond from the garden
- Over-intensive feeding of fish generates nutrient loads in the pond
- Incorrect placement of the pond results in imbalance (e. g. excessive sun, excessive shade)
- Faulty mixing of the pond water, i.e. deficient circulation

GUARANTEE

***G**

Guarantee

For the device designated with the “*G” suffix, OASE GmbH grants a manufacturer’s guarantee under the conditions cited below; the guarantee period is designated on product-specific basis. It is provided in the form of supplemental text with the product.

The designated guarantee period starts with the first-time new product purchase from an OASE stockist. In the event of subsequent sale the guarantee period does not start over again from the beginning. The guarantee period is neither extended nor restarted through guarantee performances.

If the content of the guarantee is not otherwise specified separately, OASE grants a guarantee in the scope of the legal guarantee performance. Defects or damage that are due to faulty installation or operating errors, as well as insufficient care, or for example, due to the use of unsuitable cleaning agents or omitted maintenance, non-intended use, damage, impact, the effects of freezing, etc. cutting off the plug, shortening the cable, calcium deposits or improper repair attempts, do not fall under the protection of the guarantee. With regard to intended use we refer you to the use instructions, compliance with which is the basic prerequisite for a guarantee claim. Parts subject to wear : Bulbs are expressly not part of the guarantees. See the use instructions of the respective product for the wear parts.

We provide guarantee performances at our discretion, through no-charge repair or no-charge delivery of spare

parts or of a replacement device of comparable value. If the type in question is no longer manufactured, we reserve the right, at our discretion to deliver a replacement device from our product line that most nearly approaches the type that is the object of the guarantee claim.

Reimbursement of expenses for removal and installation, inspection, claims for lost profit and compensation for damages are not covered by the guarantee, nor are more extensive claims for damages and losses, regardless of type, that have been caused by the device or its use.

The guarantee only applies for the country in which the product was purchased from an OASE stockist. German law applies for this guarantee; with exclusion of the United Nations Convention on Contracts for the International Sale of Goods (CISG).

The legal rights of the purchaser, particularly from the warranty, continue in effect and are not limited by this guarantee.

If there is a guarantee case please contact your OASE stockist that sold the product to you. If this possibility does not exist, claims arising from the guarantee can also be made binding directly against OASE GmbH & Co. KG Tecklenburger Strasse 161, 48477 Hörstel, Germany, by shipping the device or the parts in question with the original to us at your expense with the purchase receipt of the OASE stockist, the guarantee certificate, as well as written information about the claimed defect.

A directory of OASE stockists is available at www.oase-livingwater.com.

FRICTION LOSS IN PIPELINES AND HOSE LINES:

Flow rate (liter/min.)	Clear widths (mm/inch)	Pressure loss per running meter (m/water column)
30 50	20 mm – ¾"	0,12 mWS 0,32 mWS
50 75 100	25 mm – 1"	0,08 mWS 0,19 mWS 0,34 mWS
100 150	32 mm – 1¼"	0,11 mWS 0,21 mWS
100 150 200 250	40 mm – 1½"	0,03 mWS 0,07 mWS 0,12 mWS 0,15 mWS
200 250 300 350 400 450	50 mm – 2"	0,04 mWS 0,06 mWS 0,08 mWS 0,10 mWS 0,14 mWS 0,17 mWS

To get the most out of the pump, select the largest hose diameter possible.

Inadequate hose diameters or angled hose joints and flow-through obstructions through hose connections impact the flow-rate!

PUMP PERFORMANCE CURVES

What is the pump performance curve used for?

The pump performance curve, also referred to as performance data, helps you in correctly advising customers. It shows the relationship between the flow-rate (Q) and the delivery head (H) of a pump.

Determining the operating point (example)

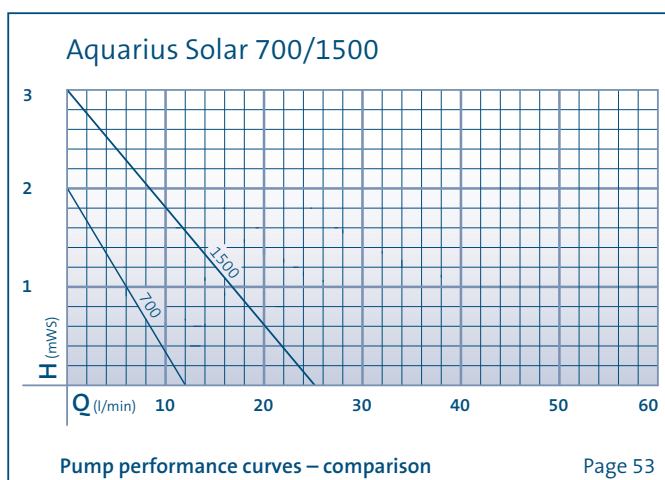

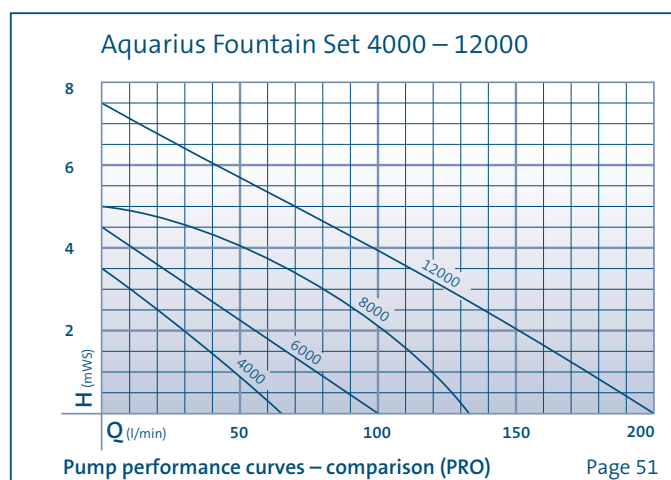

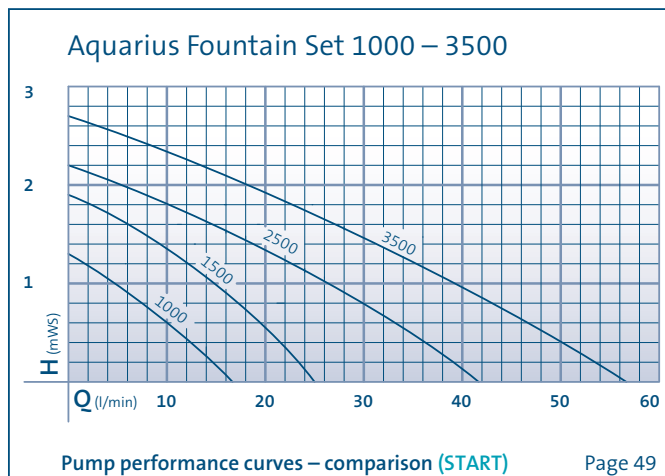

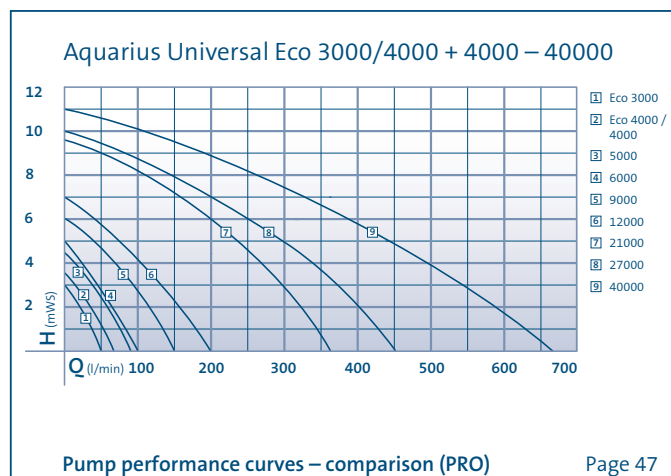

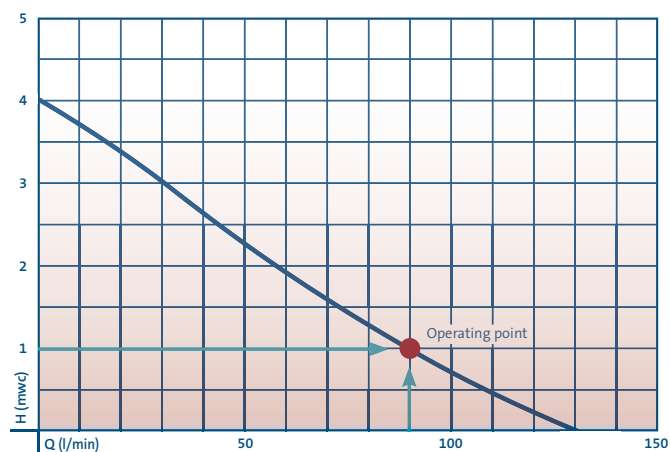

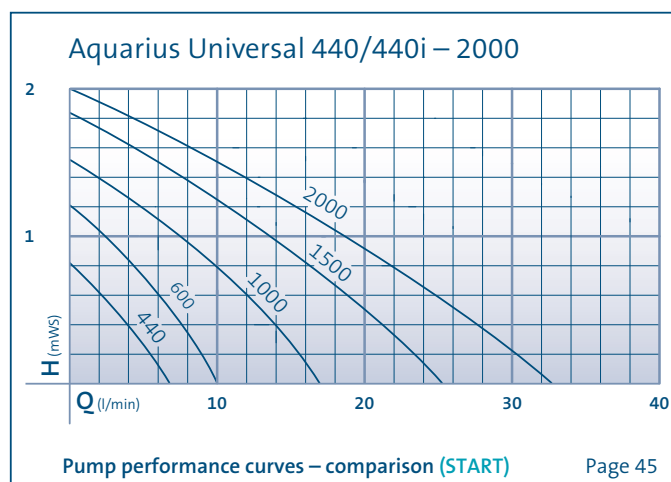

The pump should displace water 1 m above the water surface. At the operating point you can read out that approx. 90 l/min are displaced (determined theoretically). Small hose diameter, the hose length and built in curvature can change the value in the extreme.

The delivery head is specified in mwc (metre water column).

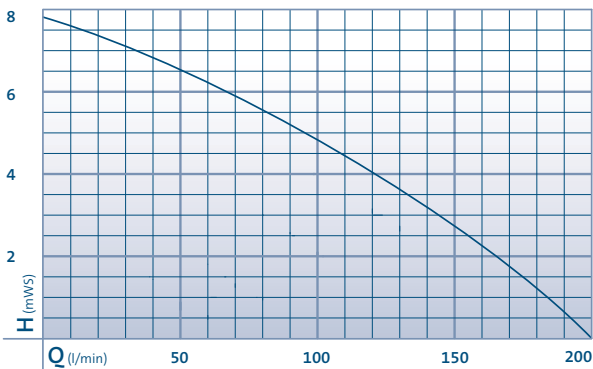

1 mwc ~ 0.1 bar

Explanation of the performance curve below

At the maximum flow rate (Q) of 133 litres per minute, measured directly on the pressure duct of the pump, the delivery head equals 0 cm. At maximum delivery head (H) of 400 cm the flow-rate equals 0 litres.

WATERCOURSE DIAGRAMS

Easy, if you know how: Which pump is right for your watercourse?

These diagrams serve as recommendations for selecting the right pump for your watercourse (average watercourse application). In this regard, approx. 5 m of a 1 1/2" hose are considered (with a pressure loss of approx. 0.15 head height).

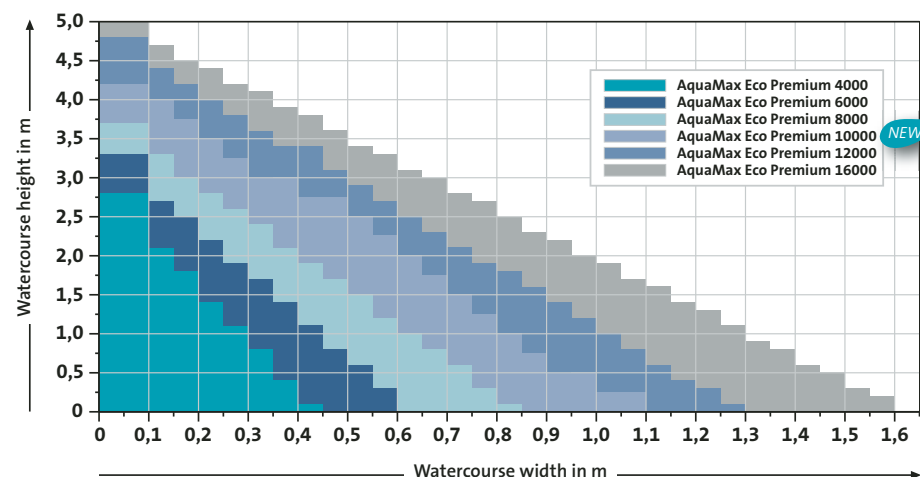

Here is a rule of thumb for determining the right pump for a watercourse:

Wide watercourse in cm x 1.5 l/min. = capacity l/min.

Tested safety, certified by VDE (Association of German Engineers), includes monitoring of the manufacturing facilities.

Explanations:

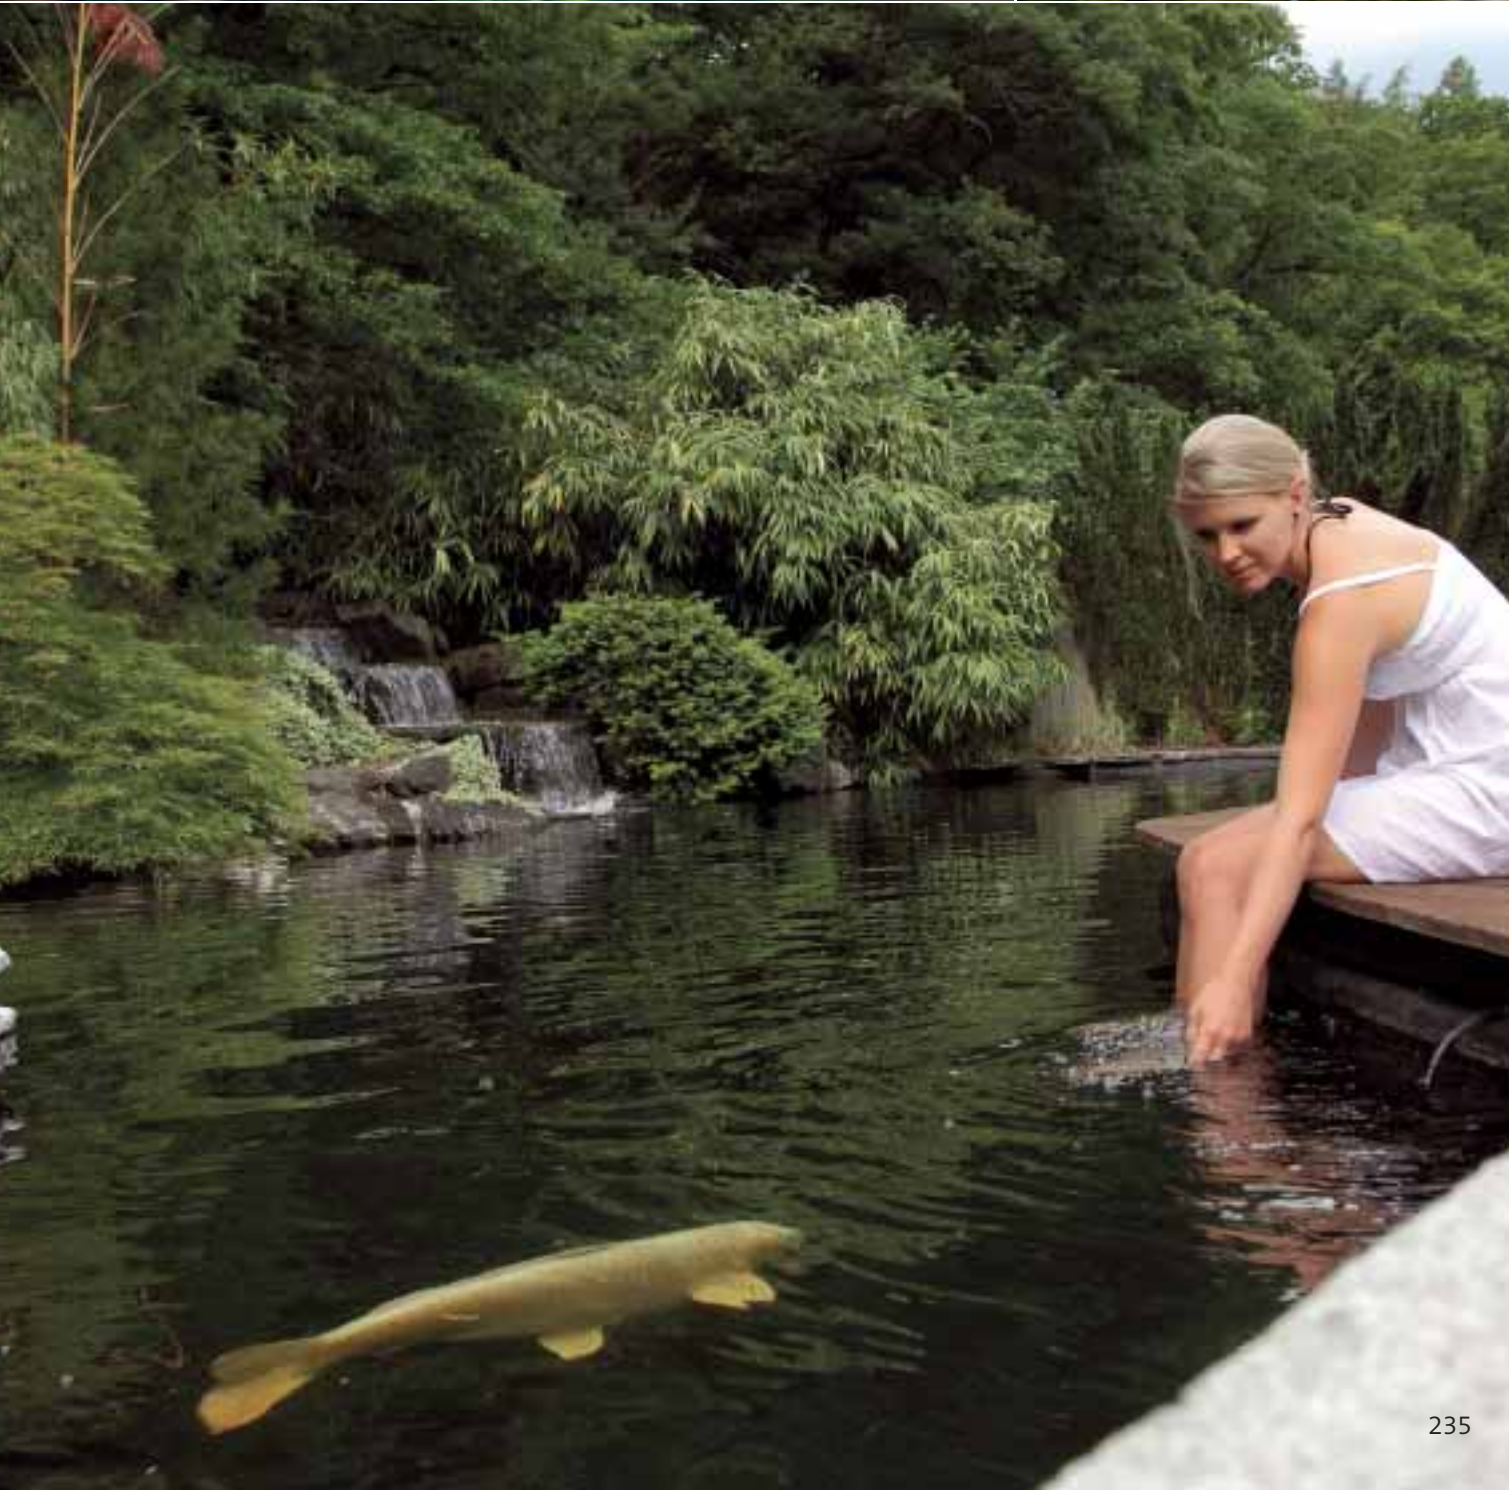

An overview of all icons and their meanings is provided on the Internet at: www.oase-livingwater.com/icons

All specified values for the fountain attachments are approximate values.
H = height in cm
Ø = diameter of the spray water in cm
Spray diameters and spray heights can vary through individual installation and different water qualities.

Note: Electrical connection points must be at least 2 m from the edge of the pond; they must be dry and secured with a max. 30 mA residual current protection circuit.

The products listed in this catalogue are designed for the respective described application and have been tested accordingly by OASE. OASE assumes no liability for damage to the product that occurs through non-intended use. We reserve the right to deviate slightly from the text and illustrations in this catalogue in the interest of technical progress.
